SEWER BIDS ASKED

The Oakland city commissioners have ordered bids called to construct the Seventh Street Outfall sewer to be financed under the \$1,147,000 bond issue voted last year. The Seventh street unit will cost approximately \$250,000.

NEW BULLETIN ON RURAL ROADS IS ISSUED

There were 2,941,294 miles of rural public roads in the United States on January 1, 1922, according to a bulletin issued by the United States Department of Agriculture entitled "Rural Highway Mileage, Income, and Expenditures, 1921 and 1922." Of the total road mileage, 387,760 miles had been improved with some form of surfacing such as sand-clay, gravel, macadam, or pavement when the year 1922 began.

The total road mileage is sufficient to encircle the earth at the equator 118 times while the surfaced mileage was sufficient to gridiron the United States with 75 east and west routes extending from ocean to ocean and an equal number of north and south routes extending from border to border. Since 1921 surfaced mileage has been built at a rate of between thirty and forty thousand miles per year of which an undetermined portion has been in the nature of resurfacing of roads previously surfaced.

The bulletin is the result of an investigation by the Bureau of Public Roads and contains the only complete report covering the entire road work of the country for any recent year and will be valuable not only in studying the present highway situation but for

the future as a record of highway improvement progress.

Complete data are given for all rural highways by States with reference to types of roads existing in 1921, mileage constructed in the years reported on, sources of highway funds and how expended, and motor vehicle registration statistics. The statistics on highway income and expenditure show State funds and those of local units separately.

TELL THE WORLD

The smart cat carries his mouse right into the house and lets everyone know that he caught it—that he's a genuine pantry protector and earning his keep. The dumb pussy cats his and says nothing. The wise kitty who advertises has a warm home, a saucer of cream and a kind word from all. The poor slow-witted tom who kept his capture a secret is starving in an alley. His folks figured him a liability and when they moved he was thrown on his own. Tough! But it's his own fault. It's necessary to produce the goods. Having done so, it's just as essential to let the world know. — "Federaleter," published by the Federal Surety Co.

CALIFORNIA RANKS HIGH IN TERRA COTTA PRODUCTION

California is third state in the Union in production of architectural terra cotta, according to reports for the census of manufacture, Department of Commerce. Production in the state for 1923 was valued at \$2,693,039, as compared with \$1,603,924 for 1922. Illinois led with a production amounting to \$4,825,234, and New Jersey was second with a production valued at \$4,291,316. California's tonnage for 1923 was 19,997 as compared with 16,526 for 1922. Illinois' tonnage for 1923 was 36,046, while that of New Jersey was 37,053. The average value per ton of terra cotta produced in California in 1923 was \$134.72, as compared with \$152.38 for 1922.

During 1923 all the establishments in the U. S. engaged primarily in the manufacture of architectural terra cotta produced 134,810 tons of this product, valued at \$16,827,776, or an average of \$124.27 per ton. Twenty-seven of these establishments also reported other products, such as brick and tile, of a total value of \$15,517,233, the value of their terra cotta production being 90 per cent of the total. In 1922 the total value of all products reported by the establishments which manufactured architectural terra cotta was \$14,981,916, the value of their terra cotta production being 82 per cent of the total.

COURT DECISION PROTECTS THE HOME OWNER

A city ordinance providing that no permit shall be granted for the erection of a business house, if there are more residences than business houses within a radius of 300 feet of the proposed location of such structure, without the consent of three-fourths of the resident property owners owning property within the prescribed area, is unconstitutional and void as an unreasonable and discriminatory exercise of the police power. In reaching this conclusion in the case of State vs Thomas, 123 Southeastern Reporter, 590, the West Virginia Supreme Court of Appeals said: "A legal exercise of the police power should operate uniformly upon all persons similarly situated who may be affected thereby. Testing the ordinance by these principles, has it a valid basis? It does not place an absolute restriction on the use of property within residential districts for business structures, but undertakes merely to confer upon three-fourths of the property owners authority to say who shall be granted the privilege. The ordinance would clothe these individuals with the powers of government to refuse the right to one and bestow it upon another; thus denying to the former a legitimate use of his property, not in return for any general benefits resulting to the neighborhood from a strict maintenance of its residential character (this will not be accomplished), but in order simply that the latter may be favored."

COSTLY COMPETITION

The most costly form of competition with which every industry has to contend, the Department of Manufacture of the Chamber of Commerce of the United States has found, is ignorance. This is disclosed, for example, in quotations to the government for supplies of every description. These force the manufacturer in nearly every line of industry to the pessimistic conclusion that some of his competitors have little or no idea of costs, for at one time or another offers are made at prices lower even than the cost of materials.

In its study of cost accounting the Department of Manufacture of the National Chamber has, in the course of five years during which it has come in contact with representative executives of various industries, discovered that this is a general condition. Legitimate competition is a spur to greater effort, but ignorance is an unknown quantity against which there is no defense.

FIVE BILLION DOLLAR HYDRO- ELECTRIC PLANT ANNOUNCED

Immediate construction of a new power house, to be known as the Balch plant, on the Kings River, to have the highest "head" of any hydro-electric plant in the work, and to cost \$4,850,000, is announced by A. Emory Wishon, vice-president and general manager of the San Joaquin Light and Power Corporation, with headquarters in Fresno. It is proposed to have the plant ready for operation January 1, 1927.

BUILDING IN WINTER

Careful scrutiny discloses no adequate reason why building construction should be carried on, for the most part, during the summer. The Western Division of the Chamber of Commerce of the United States, at its Los Angeles meeting, declared that it was "impressed by the serious waste involved in the needless seasonal fluctuation of construction," pointing out that continuity in construction is equally important to both business and labor and to the numberless manufacturing industries which are dependent upon it.

Chambers of commerce and trade associations are beginning to ask their members why they do not build in the winter. One of them, after investigation, concluded that it is cheaper to build in the winter than in the summer, because the labor supply is steadier and wages are usually somewhat lower, prices of building materials run lower, and there is more competition between contractors who wish to keep their organizations together. Besides, workmen, who would otherwise probably be idle, are given a steady income.

"It has been demonstrated," says the Western Division of the National Chamber, "that both engineering and building construction can be successfully and economically carried on in winter, thus leveling the disastrous peaks and valleys of business and employment."

STATE DEPARTMENT OF MINES BILL FAVORABLY CONSIDERED

Assembly Bill No. 407, by Assemblyman H. E. Dillinger of Placerville, has been reported favorably by the assembly mines and mining committee.

The bill would create a state department of mines and mining resources to take over the duties at present cared for by the state mineralogist, together with additional duties provided for in the measure, as a means of placing mining on the plane of a recognized industry. Under the terms of the bill, which has the approval of the mining interests of the state, the director of the proposed new department would be required to keep accurate statistics of the mining industry, to make surveys and reports covering the mineral resources of the state and to assist in the progress of the mining industry generally.

The duties of the surveyor general in so far as they apply to surveys of mineral lands, and that of the state corporation commissioner, affecting mining corporations would be assumed by the proposed department.

\$500,000 FLOTATION PLANT

The United States Smelting, Mining and Refining Company announces construction will be started immediately on a new \$500,000 flotation plant at Midvale, Utah, to treat refractory lead zinc ores. The new plant will handle 5000 tons of ore daily and will be the first of its kind in Utah.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

An analysis of the lumber industry in the Philippines made recently by prominent lumbermen of Manila discloses the Filipino lumber companies are greatly outnumbered by companies owned or operated by foreigners. Only three native lumber companies of note, it is said, are engaged in the industry while there are three Chinese, four Spanish, two English, and four American firms. One of the reasons for this, it was stated, is the distaste on the part of the Filipino for manual labor and a fondness for the professions of law and medicine. This is partly fostered by the educational system which carries a student at the primary school step by step to the University. Lack of Filipino capital and an ignorance of business due to inexperience were other reasons advanced.

The loss in forest fires to the company's timber in California last year exceeded its total year's cut in that state, W. A. Fairburn, president of the Diamond Match Company, reported to the stockholders in annual session. He said the company's 1924 fire loss was equivalent to 55 per cent of its year's total timber cut, and blamed campers and smokers largely for the losses in spite of the company's scientific work in forest preservation.

Chas. H. Woods, Berkeley building contractor, has pleaded not guilty to a charge of violating the State Employment Act. State Inspector Wm. A. Army charges Woods with failure to pay his carpenters semi-monthly as required by the State law. Woods demands a jury trial and the case has been set for April 16.

Fifty men are employed at the alley concrete Tile Company's new plant which has just been established at Tehama, and at least as many more will be employed during the next six weeks, while 100,000 feet of concrete irrigation pipe is being made for the Tehama Ranch, the Pacific Land Corporation and for private ranchers.

Foundation Company of New York and San Francisco has been awarded a contract by the Great Western Power Company of San Francisco to construct a hydraulic fill dam at Big Meadows, Plumas County. The contract price is in the neighborhood of \$2,000,000.

Oregon, California and Eastern Railway has applied to Interstate Commerce Commission for authorization to construct 143 miles of new railroad in Central and Southern Oregon. The estimated cost of construction is \$1,500,000.

Carl F. Uhden, formerly chief engineer of the Gorge Creek development of the city of Seattle's hydro-electric project on the Skagit River, has entered private practice as consulting and contracting engineer with offices at 1409 Alaska Bldg., Seattle.

Petaluma city council has set May 5 as the date to vote bonds of \$200,000 to finance sewer construction.

Lawton & Vreay, general contractors, announce the removal of their offices to the New Builders' Exchange Bldg., Hobart and Webster streets, Oakland.

East Bay Sand & Gravel Yards, at the foot of Derby street, East Oakland are running to capacity, it is announced by H. Levy, owner and manager, marking the entry of the enterprise into the retail field. Levy, who heretofore has been engaged in the wholesale delivery of sand, gravel and mix to Eastbay dealers, operates a fleet of sand and gravel barges, barging from river points to the Derby street yards, located on the tidal canal between the park and Fruitvale bridges. A forty-five-ton derrick for unloading barges, formerly located at Bay Point, has been moved to the yards at Derby street. This equipment will permit the company to make prompt deliveries.

The Weyerhaeuser Timber Company will build several large lumber manufacturing plants in Washington state, according to announcement of George Long, general manager of the company. The plants will be located on the west side of Oregon way, with frontage on the Columbia river. The Weyerhaeuser Timber Company has about 34,000,000,000 feet of timber in the Cowlitz river watershed and their holdings in this section are largely on the east side of the Cowlitz.

Eugene T. Thurston who recently resigned as secretary and manager of the General Contractors of San Francisco, Inc., announces the resumption of private practice as a consulting construction engineer with offices at 714 Mechanics Institute Building, 57 Post street, San Francisco. Mr. Thurston will handle all type of building and engineering construction, preparing plans and specifications, supervision, management, estimates, valuations and arbitrations.

J. Webster Hoover, civil engineer, Everett, Wash., has been appointed state highway engineer, succeeding James Allen, who has been highway commissioner and supervisor of highways for the last nine years but recently resigned to accept a position in California. Mr. Hoover was city engineer of Everett for seven years.

A San Francisco manganese company in an inquiry to the Reno chamber of commerce, seeks to learn the location of manganese deposits in Nevada. While no large deposits of manganese are known to exist in the state, E. H. Walker, managing director of the civic body, is making inquiries with the hope of locating a suitable minor deposit.

Aene Gravel Company has let contracts for the construction of timber gravel bunkers, scale house and office quarters at Jefferson and Leavenworth streets, San Francisco. Approximately \$15,000 will be expended in construction, exclusive of equipment.

Francis Thomas and Joseph R. Monson have formed a partnership and will operate under the trade name of Independent Roofing Company with shop and offices at 1151 Middlefield Road, Palo Alto. The company will specialize in composition and tile roofing.

Chas. W. Irwin will operate from 1271 Market St., San Francisco, under the trade name of Newell Paint Co.

TRADE NOTES

The Standard Gypsum Company of San Francisco plans to inaugurate a new service between Santa Rosalia, Los Angeles, San Francisco and Puget Sound ports. San Marcos island, off the west coast of Mexico, is a solid mass of gypsum, and it will be dug up and shipped to coast points for manufacture into plaster of paris. The company is planning to construct a dock 600 feet long near the island for loading operations, and the Palmyra has on board 650,000 feet of lumber and a number of piles for use in construction of the wharf. The Standard Company has purchased equipment for the plant costing approximately \$750,000. A representative of the gypsum company will leave shortly for Europe to open negotiations with foreign owners for the purchase of several fair-sized ships to use in this trade.

The George H. Tay Company, wholesale plumbing supply firm, of San Francisco, has purchased the greater portion of the block bounded by 22nd and 23rd, R and S Streets, Sacramento and plans immediate construction of a \$100,000 display room, distributing plant and jobbing warehouse. Plans for the structure are in course of preparation by R. A. Herrold, Sacramento architect. George E. Stack, for many years connected with the plumbing business in Sacramento, is branch manager for the company in the capital city.

Merritt Concrete Products Company with main plant and offices at 1700 First St., San Jose, has opened San Francisco offices in the Monadnock Bldg. The announcement is made by M. E. H. Miller, sales manager for the company. The efforts of the company in the industrial field are confined to the manufacture of concrete pipe used in connection with sanitary sewers, irrigation projects, installation of drainage lines and culvert work in addition to septic tanks and concrete laundry tanks. James C. Merritt is president and general manager of the concern.

Coos Bay Lumber Co. of California with the principal place of business at San Francisco, has been incorporated with a capital stock of \$1,000,000. Directors are W. E. Acton, J. F. Reshure, W. Denman, Myrtle Chili and Aldea Kurru.

Announcement is made that James A. Keller, traffic manager of the Pacific Portland Cement Company and subsidiaries, has been elected vice president of the company. N. W. Keller has been appointed traffic manager.

The Bell Marble Company is reported planning immediate operation of its quarry at Columbia, Tuolumne county. The quarry, it is said, produces some of the finest marble available in California.

Pacific Electric Clock Company of San Francisco has awarded contracts for a new plant to be erected in Parker street, Berkeley. Approximately \$50,000 will be expended in construction and equipment.

B. F. Martin will operate from 148 Hooper street, San Francisco, under the firm name of Key-Hold Plaster Lath Company.

General Sheet Metal Works formerly located at 1441 Pine street, announces removal to larger quarters at 1529 Pine street, San Francisco.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

NATIONAL LIME ASSOCIATION TO MEET MAY 26-29

The seventh annual convention of the National Lime Association and the twenty-third annual meeting of lime manufacturers will take place on May 26 to 29 inclusive at Briarcliff Lodge, Briarcliff Manor, New York. The meeting will follow the lines of the annual meeting last year at White Sulphur Springs, West Virginia, with the mornings and some of the evenings devoted to reports of work accomplished during the past year, results of fellowships, as well as talks on manufacturing problems. It is proposed to hold another round-table research conference on one evening.

OAKLAND SCHOOLS ARE TRAINING PLUMBERS' APPRENTICES

Indicative of the character of the course of study at the Oakland Technical High School, two nights a week, under the direction of the Master Plumbers' Association of Oakland, Berkeley and Alameda, the attendance record averages 92 per cent. There are sixty-four registered students in the class, being taught sanitation as it is applied by the master craftsmen.

ALAMEDA COUNTY PLASTERERS ELECT OFFICERS

Arthur Sayers, of Berkeley, has been elected president of the Master Plasterers' Association of Alameda County. Other officers elected were: R. H. Buck, first vice-president; R. J. Kennedy, second vice-president; A. Cardoni, treasurer; Harry Matheson, sergeant-at-arms; William G. Newman was reappointed secretary-manager.

SANITATION LEAGUE TO MEET IN OAKLAND APRIL 19

The California Sanitation League will hold a special meeting at the Hotel Oakland, Oakland, Calif., April 19, according to an announcement of V. A. Edgeworth, secretary-manager of the Master Plumbers' Association of Oakland, Berkeley and Alameda, which organization will act as hosts on the occasion.

L. J. Cruise, vice-president of the California Sanitation League and president of the Master Plumbers' Association of Oakland, Berkeley and Alameda, will preside at the meeting.

NAPA BUILDERS ELECT

Fred W. Jaekle, millman, has been elected president of the Napa Builders' Exchange. Other officers and directors elected are: S. J. Cinnamond, vice president; William Noble, treasurer; C. C. Money Jr., secretary; Frank A. Pond, Wade Shifflett, A. McNair, W. C. Kinder, E. W. Doughty, E. W. Arnitz, Earl G. Wilson and Albert Ballmer, directors. The next meeting of the exchange will be held in St. Helena, April 23.

EXCHANGE TO MEET

A special meeting of the San Francisco Builders' Exchange will be held Tuesday, April 7, at one o'clock to consider propositions for a new Builders' Exchange home.

SECRETARIES, ATTENTION!

Practically all organizations of the construction industry in California issue a monthly magazine or bulletin covering organization activities.

As a rule, such publications contain many news items that would prove of considerable interest to those in other sections throughout the country—and probably in your immediate vicinity—but due to lack of circulation, valuable items are not uncovered.

Building and Engineering News, with a desire to boost your organization through publication of your activities and yet advance the worth of its "Organization News" section, requests that you send such magazines or bulletins, when issued, that they might be reviewed and interesting news matter republished in this department.

This appeal is directed to secretaries who have overlooked us in the past. To those who have placed our name on the mail list, we extend our thanks.—EDITOR.

LUMBERMEN ADOPT PROPOSAL TO BRAND ALL PINE PRODUCTS

The Southern Pine Association, on March 25, concluded its tenth annual convention, at New Orleans, after having adopted a number of plans for what it termed the improvement of the lumber industry. At its final session the plan to grade-mark all lumber manufactured by associate mills was passed, and with it was carried a program to advertise the branded product.

At previous sessions the lumbermen renewed their efforts toward pushing reforestation, reducing forest fire hazards, conserving the present timber supply and urging a readjustment of the system of taxation on timber lands.

George W. Cartwright, of Los Angeles, Cal., told the delegates that the country today faces a serious situation as a result of too much legislative interference, not only with business, but with the lives and affairs of the people generally.

CALIFORNIA POTTERY COMPANY HOLDS DINNER MEETING

At a dinner meeting held recently in Merced where the plant is located, the stockholders of the California Pottery Company were advised by Auditor Edmond Becsey that \$41,761 had been spent in labor in Merced during the past year. The plant represents an investment of \$260,500, Becsey reported, including improvements of the year totaling \$11,067. President Frank Costello predicted the year 1925 will see an era of great prosperity for the construction business.

SAN JOAQUIN VALLEY LUMBERMEN ELECT OFFICERS

All officers of the San Joaquin Valley Lumbermen's Association were re-elected at the annual business session of the organization which followed a luncheon at the California Hotel in Fresno, March 28. The president is J. C. Ferger, Fresno; vice president, Elmore King, Eakersfield; treasurer, J. G. Mattie, Fresno; and secretary, F. E. Minard, Fresno.

OVERLAPPING OF ROUTES COMMON. HIGHWAY COMMITTEE FINDS

Information furnished to the committee of Federal and State highway officials, appointed recently by the Secretary of Agriculture to develop a uniform method of numbering and marking highways, indicates that there are at least 256 named routes and 97 different associations each promoting one or more named highways in the United States.

Overlapping of routes is common, in fact there are few of them that are not coincident with some other route at some portion of their length. One well known route 1500 miles long overlaps other routes for 79 per cent of its length. Ten different routes are involved in this overlapping and in places two or three of them coincide for several miles.

On another route eight different sets of markers, indicating as many named routes, are found on the same stretch of road and this overlapping occurs in so many places that in a map showing all the routes it is difficult to follow the location of one route because so many other routes must be shown on the same road.

Not only is overlapping common, but some of the well known routes have branches and alternate routes between different points, all of which bear the same name.

The great use made of the highways today demands that each main traffic artery shall have only one designation throughout its entire length, without changes at State lines and that the mileage comprising the route be collected with reference only to the flow of travel.

The work of the committee will be to decide on the best system of designating our highways and recommend a remedy for the present confusion in designation and lack of designation. Every section of the country is represented on the committee and the plan decided upon should be suitable for both State and National needs.

WOMAN HEADS ENGINEERS

For the first time since its formation in 1854, the British Society of Engineers has elected a woman, Miss Annette Ashbury of Fulham, associate member of the organization.

Miss Ashbury was a munition worker during the war, and within two years became head of a department where large shells were made for the big guns at the front. After the war she established a company which specializes in the manufacture of machinery parts and wireless apparatus.

BOND ISSUE FOR STATE BUILDING CONSTRUCTION CONTEMPLATED

A bond issue for \$3,500,000 to finance construction of California State buildings is proposed. The issue under present plans would be apportioned as follows:

University of California, Southern Branch, \$3,000,000 for new buildings at Beverly Hills.

University of California at Berkeley, \$3,000,000 for new buildings.

Construction of a state building at Los Angeles, \$1,250,000.

Completion of the capitol annex building, \$1,250,000.

MARCH BUILDING SUMMARY

Approximately \$5,130,965 was expended in building construction during the month of March, 1925, according to John P. Horgan, chief inspector of buildings of the Department of Public Works. During the month 1125 permits were issued. In February, 1925, records of the board of public works show 846 permits issued with an estimated valuation of \$3,871,487. In March 1924, 994 permits were issued, improvements totaling \$4,652,933.

Following is a segregated list of March, 1925, activities as reported by the Department of Public Works:

Class	No. of Permits	Est. Cost
A	2	\$ 205,000
B	2	525,000
C	34	909,585
Frames	538	2,691,015
Alterations	545	410,275
Public Bldgs.	2	96,890
Harbor Bldgs.	1	293,200
TOTAL	1125	\$5,130,965

CEMENT TESTS ON JOB REQUIRED AT SEATTLE

A ruling which will change the present provision of the Seattle building code with respect to the testing of cement used in local building construction and the distribution of the tested cement from bonded warehouses is being drafted by Robert Proctor, city superintendent of buildings.

All cement used locally now undergoes a rigid test in Seattle laboratories but it is pointed out by officials of the building department that there is nothing to prevent the use of a lower grade of cement than that passing the test reaching the job. It is proposed by Proctor that all cement delivered on the job after the new ruling goes into effect, be accompanied by a certificate from an accredited laboratory certifying that the particular cement delivered is the cement actually tested.

The ruling being drafted is expected to provide that the dealers and the laboratories arrange for the warehousing of the cement which has passed the city's requirements so that only certified material can go into the construction of Seattle structures.

Several days will be required to complete the draft of the ruling and the putting of the same into effect.

ELECTRICAL ACHIEVEMENTS IN 1924 UNPARALLELED

"From stage-lighting systems to railroad electrification the year 1924 was one of unparalleled electrical engineering achievement," says H. W. Cope, assistant director of engineering, Westinghouse Electric and Manufacturing Company.

Among the year's accomplishments he lists the building of the world's greatest electric locomotive; application of electric drive to harbor tugs and other marine installations; invention of the Klydonograph and kilovolt-ampere meter; building of two 62,500 kva generators, the largest ever attempted; building of the largest synchronous condenser, a 40,000 kva machine for the Pacific Gas and Electric Company's sub-station near Vacaville; development of glant water-cooled radio tubes which will operate on frequencies up to 6000 kilocycles; a new type of electric iron with automatic temperature control; the Bi-Lux street-lighting refractor, and the multi-preset system of stage lighting, by which as many as ninety-five lighting circuits can be set to operate in as many as twenty different combinations by combination control switches which may be set before the performance begins.

California Patents

(Special Correspondence)

The following information is compiled by Munn & Co., New York, patent and trade mark attorneys.

Henry A. Nordwick, Stockton, INTERNAL-COMBUSTION ENGINE. This relates to improvements in internal combustion or gas engines and particularly to a type in which the cylinders are arranged in a common plane radially of the crank shaft, the latter having cam-track means operatively connected to be turned with the reciprocation of the pistons. Mr. Nordwick assigns his patent to Paul J. Marchetti.

Mads M. Larsen, Colton, SASH PULLEY. This relates to builders' hardware, especially to sash pulleys. It is so constructed that the liability of the sash cord from jumping is practically eliminated.

George B. M. Smith, Torrance, EXPANSION PISTON FOR PUMPS. This provides an expansible pump which may be readily expanded to take up wear so as to temporarily fit the pump cylinder.

Isaac Naylor, San Francisco, METHOD OF TREATING WASTE FIBROUS MATERIAL. This invention relates to a method of treating fibrous material to produce an impervious solidified and fire resisting body as a substitute for wood.

Alonzo Irven Thomas, Eureka, SAW-DUST AND LIKE PINE FUEL FURNACE. This relates to a furnace primarily intended for burning saw dust and other comminuted wood but also adapted to burn fine and low grade fuels of various kinds.

James M. Leaver and Elie S. Humboldt, Oakland, PROCESS OF MANUFACTURING PURE CELLULOSE FROM WOOD. This relates to a process for making pure cellulose through reduction with dilute nitric acid of the various lignocelluloses, and particularly of the by-products of the redwood lumber industries, such as shavings, saw dust and all kinds of mill waste. The inventors assign their patent to the Pacific Lumber Company.

Frederic C. Zeh, San Francisco, WINDOW. This relates to improvements in windows in which a substantially invisible screen is projected into the space between a pivotally mounted window and the casement when the window is partially opened.

Mr. Zeh has also obtained a patent on a WEATHER-PROOF HINGE, the object being to provide an improved hinge adapted to form a weather-proof mounting for doors, windows, etc.

Charles I. Walker, Los Angeles, TIGHT-DRIFT DOOR. This provides a top hung type of door of rigid, durable and relatively light construction, especially adapted for use as a side door of a box car.

Elmer E. Schellenger, Riverside, SIX-WHEEL TRUCK WITH DUPLEX DRIVE. This relates to motor driven vehicles and more particularly to the transmission gearing utilized for transmitting power from an engine or motor to the wheels of the vehicle.

Here, There and Everywhere

(Special Correspondence)

What is said to be the first jurisdictional strike in Chicago in nearly four years was called February 28th on the Hotel Sherman Annex because the general contractor doing the work employed carpenters in place of sheet metal men to install metal door bucks.

Officers of the Building Trades Employers' Association of Boston have announced that they are willing to renew the majority of the present agreements, which expire April 1st, for a period of three years. At a recent meeting of the United Building Trades' Council, a number of delegates reported that they had been instructed to favor the continuation of craft agreements and also the adoption of a general agreement for the arbitration of jurisdictional disputes between the different trades.

The 40-hour week in the building trades endorsed by the Baltimore Federation of Labor, has been presented to the contractors of that city. The reason given by the officers of the Federation for attempting to put the five-day week into operation is to get more men on the jobs and thus relieve unemployment. Among the recent wage awards granted in Baltimore are the following: Steamfitters, from \$1.12 1/2 to \$1.25; painters, from 90 cents to \$1.00; and sheet metal workers, from \$1.10 to \$1.20.

The Building Trades Employers' Association of Pittsburgh reports that the following agreements have been signed: Structural Iron Workers, \$1.37 1/2; Sheet Metal Workers, \$1.43 1/2; both agreements expiring February 28, 1925. Electricians, \$1.43 1/2; agreement expires February 28, 1925. Plasterers, \$1.50 1/2, from April 1 to June 1, 1925; \$1.50 from June 1, 1925, to March 31, 1926, with a five-day week beginning June 1, 1925. An agreement with the plumbers was made early in January, which calls for a rate of \$1.43 1/2 until its expiration on May 31, 1927.

Refusal of the Master Painters' Association of Pittsburgh to grant the Journeymen an increase from \$11 to \$12 a day may precipitate a strike on April 1st, according to a recent announcement made by the organization. The Master State Roofers' Association reports that an agreement has been made with the union under which the wage rate was raised from \$11.50 a day to \$12.00. Composition roofers are on strike having been refused an increase of 17 1/2 cents an hour over their old rate of \$1.10.

The strike of metallic lathing foremen in New York ended early in February when the men returned to work at their old scale of \$63.25 per week. The strike started in January with a demand for \$75.00 a week.

LUMBERMAN DROWNED

Orrin L. McAbee, for 42 years a resident of Boulder Creek, Santa Cruz County, and a retired lumberman, was found drowned in the San Lorenzo river at Boulder Creek, March 26. McAbee had been ill some time. He was 62 years of age and a native of New York.

Building News Section

APARTMENTS

Contract Awarded.
APT. BUILDING. Cost, \$15,000
OAKLAND, 880-88 45th St.
Two-story 15-room store and apartment bldg.
Owner—Geo. L. Geck, 872 45th St., Oakland.
Architect—None.
Contractor—A. W. Almqvist, 2701 13th Ave., Oakland.

Owners Taking Segregated Bids.
HOTEL, APTS. Cost, \$—
SAN FRANCISCO, East side Leavenworth St., north of O'Farrell St.
Twelve-story steel frame and concrete hotel, 63 apts., 125 rooms, bldg.
Owner—J. Greenbach and E. V. Lacey, 180 Jessie St.
Architect—C. O. Clausen, Hearst Bldg., San Francisco.

Plumbing and Heating Contracts Awarded.
APT. BUILDING. Cost, \$75,000
SAN FRANCISCO, Bush and Hyde Sts.
Seven-story and basement reinforced concrete apartment house containing 42 two-room apts. Garage in basement to accommodate 15 cars.
Owner—J. Greenbach, 180 Jessie St., San Francisco.
Architect—None.
Plumbing—E. V. Lacey, 180 Jessie St., 180 Jessie St., S. F.
Heating and sheet metal—Atlas Heating and Ventilating Co., 557 4th St., S. F.

As previously reported concrete contract was awarded to the Mission Concrete Co., 125 Kissling St.

To Be Done By Day's Work.
APT. BLDGS. Cost, \$30,000 each
SAN FRANCISCO, N Francisco St. 125 & 177 E. Polk St.
Two 3-story and basement frame apt. bldgs. (12 apts. in each bldg.)
Owner—Axel A. Johnson, 632 Belvedere St., San Francisco.
Architect—Baumann & Jose, 251 Kearny St., San Francisco.

Construction To Start.
APARTMENTS. Cost, \$20,000
OAKLAND, Alameda Co., Cal. Twentieth and Brush Sts.
Two-story reinforced concrete apartment house and garage, 100x100.
Owner—J. Iversen, 1915 Brush St., Oakland.

Architect—Hutchison & Mills, 1214 Webster St., Oakland.
Construction will start very shortly by day's labor under the supervision of the owner.

Plans Being Prepared.
APT. BLDG. Cost, \$25,000
SAN FRANCISCO, 17th St. near Castro.
Three-story frame, brick veneer and plaster apartment building.
Owner—Withheld.
Architect—Kuhn & Edwards, Commercial Bldg., San Francisco.
Store will occupy ground floor.

Contract Awarded.
APARTMENTS. Cost, \$38,572
SAN FRANCISCO, NE Cor. Parnassus and Shrader Streets.
Three-story and basement frame (18) apartments.
Owner—Erick W. Hunius, 217 Hugo St., San Francisco.
Architect—E. A. Neumarkel, 544 Market St., San Francisco.
Contractor—Joel Johnson & Son, 180 Jessie St., San Francisco.

To Be Done By Day's Work.
APT. BLDGS. Cost, \$22,500 each
SAN FRANCISCO, N Fell 103 & 154 W. Cole.

Two 3-story and basement frame apt. bldg. (12 apts. in each bldg.)
Owner—L. Epp & Son, 4747 Geary St., San Francisco.
Architect—Baumann & Jose, 251 Kearny St., San Francisco.

To Be Done By Day's Work.
APARTMENTS. Cost, \$20,000
SAN FRANCISCO, W Van Ness Ave. 57 N Chestnut St.
Three-story and basement frame (12) apartments.
Owner—Axel A. Johnson, 632 Belvedere St., San Francisco.
Architect—Baumann & Jose, 251 Kearny St., San Francisco.

Contracts Awarded.
APT. HOUSE. Cost, \$10,000
SAN FRANCISCO, N. Side California St., W. of Hyde.
Three-story and basement frame apartment house.
Owner—Messrs. Fazio and Molinari, Call Bldg., San Francisco.
Architect—August G. Headman, Call Bldg., S. F.
General Work—V. Fillipis, 269 24th Ave. S. F.
Plumbing—Adrian Ramazzotti, 1473 Vallejo, S. F.
Heating—C. Peterson Company, 390 8th St., S. F.
Painting—C. E. Gordon, 180 Jessie St., S. F.
Total contracts amount to \$40,000.

Contract Awarded.
APARTMENTS. Cost, \$16,000
SAN FRANCISCO, S. Francisco, 137 W. Octavia St.
Two-story and basement frame (8) apartments.
Owner—A. E. & H. F. Hind, 711 Hearst Bldg., S. F.
Architect—W. G. Hind, 711 Hearst Bldg., S. F.
Contractor—Hind Building Co., 711 Hearst Bldg., S. F.

To Be Done By Day's Work.
APARTMENTS. Cost, \$30,000
SAN FRANCISCO, E. Van Ness Ave. 36 S. Greenwich St.
Three-story and basement frame (18) apartments.
Owner—Victor Bjors, 2668 Bryant St., S. F.
Architect—Baumann & Jose, 251 Kearny St., S. F.

Contract Awarded.
APT. BLDG. Cost, \$24,000
BERKELEY, 1537 Arch St.
Eight-family apartment bldg.
Owner—María A. Johnson, 1727 Stuart St., Berkeley.
Architect—None.
Contractor—Albert N. Johnson, 1727 Stuart St., Berkeley.

To Be Done By Day's Work.
APARTMENTS. Cost, \$24,000
SAN FRANCISCO, S. Pine 148 E. Gough.
Three-story and basement frame (12) apartments.
Owner—Hind Building Co., 711 Hearst Bldg., S. F.
Architect—W. G. Hind, 711 Hearst Bldg., S. F.

Contract Awarded.
APARTMENTS. Cost, \$48,000
SAN FRANCISCO, SE O'Farrell and Steiner Sts.
Three-story and basement frame apts.

SAN FRANCISCO, Eighteenth and Diamond Sts. (Holy Redeemer School).
Two-story reinforced concrete school buildings.
Owner—Roman Catholic Archbishop. Architect—Shea & Shea, 454 Montgomery St., San Francisco.
Figures are being taken for a general contract.

NOTE:—Sandy Pratt, writer of this near Comedy in the Sacramento Bee each Saturday and the Daily Pacific Builder of San Francisco each Tuesday and Thursday, published the following K.C.B.-like story last summer and several (one) people liked it, so Sandy prints it again for your approval. A letter either K.C.B. style or otherwise, expressing your views on the subject will be greatly appreciated by Sandy and your "writings" may make these columns. Surely you can write as good stuff as some of Sandy's.

ACROSS THE American River.
FROM THE sand-producing plant.
OF THE Pratt Building Material Co.
DOUGLAS 300—"easy to remember."
AT THE 12th Street Bridge.
NEAR SACRAMENTO.
ARE MANY campers.
AND SANDY Pratt, President.
OF THIS sand and rock company.
WAS UNDER the belief.
THAT THE old Indian style.
OF HAVING the squaw.
DO ALL the work.
WAS NOW ancient history.
ESPECIALLY AS applied.
TO THE white.
OR CAUCASIAN race.
SANDY WAS led to believe.
THAT NO man now live.
WHO WOULD dare.
ASK OR force his wife.
TO WASH clothes.
WITH AN old fashioned tub.
AND AN ordinary wash board.
BUT A short time ago.
SANDY WAS standing.
ON THE above mentioned river bank.
AND ON the opposite side.
OF THIS patriotic (American) stream.
WAS A woman washing.
WITH A galvanized tub.
WHILE HER brave husband.
SAT ON a log.
SMOKING A pipe.
AND WHITTling a stick.
SANDY PRATT, producer.
OF CLEAN, sharp sand.

AT MARYSVILLE, Sacramento.
AND PRATT Co, Monterey County.
ALSO CRUSHED rock.
AT PRATT Co (near Folsom).
WAS OF the opinion.
THAT NO woman.
WOULD WASH for her husband.
UNLESS SHE had an electric machine.
COSTING SEVERAL hundred dollars.
BUT HISTORY repeats itself.
AND IF "May C. E."
WHO WROTE Sandy Pratt.
SEVERAL CLEVER letters.
ABOUT A jelly fish husband.
COULD HAVE seen "Big Chief."
GUARDING his wife.
WHILE SHE washed his shirt.
SHE WOULD have to admit.
THAT THERE is still.
ONE BRAVE husband left.
IN THIS good old world.
"I THANK you."

Nowadays the wife "Cleans your clothes" by starting at the pockets. When Sandy Pratt, sand producer, who has a modern rock crushing plant at Taft-Patterson, near Folsom, on the Tahoe-Truckee Highway, saw an old "Big Chief" (friend husband) telling his "slave" to "wash them clean," then Sandy was convinced that any husband who bought his wife a million dollars worth of electric washers, patent driers and revolving ironers was crazy.

SAN FRANCISCO.—Anderson & Ringrose, 320 Market St., San Francisco, submitted low bid to Ed. Pubk. Voks. to erect Le Conte School. Low bids for other portions of the work were submitted by: mechanical equipment, W. J. Lays, \$16,034; plumbing, A. Lettich, \$18,943; electric work, Standard Electric Const. Co., \$8,786. Official Proposals

NOTICE TO CONTRACTORS

Crocker Highlands School, Oakland, Cal.

Office of the Secretary of the Board of Education of the City of Oakland, California, hereby gives notice that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals for the delivery to the Secretary of said Board, Room 211, City Hall, Oakland, Calif., until Tuesday, the 14th day of April, 1925, at 9:45 o'clock A. M., at which time said bids will be opened for the erection and completion of the Crocker Highlands School Building, of the Oakland School District, located on the northwest corner of Hubert and Sunnyside Road. These bids will be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, Room 415, 532 16th St., Oakland, California.

On a deposit of Twenty-five (\$25) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office herebefore mentioned and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check for the sum of \$50,000.00. Dollars, said check shall be payable to the Oakland School District, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000) Dollars, but for all bids of less than Fifty Thousand (\$50,000) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 14th day of April, 1925, at 9:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,
Secretary of the Board of Education
of Oakland, California.

NOTICE TO CONTRACTORS

Salmon River Bridge, near Oak Flat, Klamath National Forest

Sealed proposals for constructing the above-named bridge on the Salmon River National Forest road, located within the Klamath National Forest, Siskiyou County, California, will be received by the District Engineer, Bureau of Public Roads, U. S. Department of Agriculture, at 400 Bay Bldg., 9 Main St., San Francisco, California, until 10 A. M., on the 14th day of April, 1925, at which time and place they will be publicly opened and read. The right is reserved to reject any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

The bridge is located on the Salmon River about 3 miles above Somes Bar.

The distance from Hornbrook is about 135 miles. The road now under construction between Somes Bar and the bridge will be opened by May 1, 1925.

The project consists of the erection of a 155 ft deck steel truss on concrete piers together with 125 ft of timber trestle approaches. The principal items of work are approximately as follows:
Structural Steel, 54 tons.
Class B Concrete, 60 cu. yds.
Lumber, 50 M. M.

Construction shall be started within fifteen days after notice of award of contract has been given to the Contractor by the District Engineer. The work shall be completed within one hundred twenty-five (125) weather working days after said notice of award of contract is given.

The contract form, maps, plans and specifications may be examined by responsible contractors at the following addresses:

400 Bay Bldg., 9 Main St., San Francisco, Cal.
Forest Supervisor, Yreka, Cal.
Rudolph Thirion, Res. Engr. Bu. Pub. Rds., Somes Bar, Cal.

The Bureau has available for loan to contractors on a rental basis, equipment at Government Island, Oakland, California, as listed in the specifications. Bidders will state in his bid the Government equipment that he will use during construction and minimum time required. The estimated rentals will be taken into consideration and award will be made on the bid to the best advantage of the Government.

Plans and specifications will be furnished to contractors who contemplate bidding, on a showing of financial ability and experience and upon deposit of a check for \$10.00 payable to the Secretary of Agriculture of the United States, which will be held pending the return of plans and specifications.

All proposals must be made on forms furnished by the District Engineer, Bureau of Public Roads, and in accordance with the instructions forming a part of the specifications above referred to.

C. H. SWEETSER, District Engineer
March 25, 1925

NOTICE TO CONTRACTORS

(Elevator—Pearl Harbor)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals, in the near future, on Specification No. 5099, Freight Elevator, Naval Operating Base (Air Station), Pearl Harbor, T. H. The elevator shall have a lifting capacity of 4000 pounds at a speed of 50 feet per minute. It shall be complete with heavy beams, machinery supports, hoisting mechanism, car of steel framework with platform, wires, cables, sheaves, counterweights, guides, motor, and controlling operating and safety devices. The travel of the car shall be from the first to the second floor, a distance of 15 feet 2 inches. The hatchway is 9 feet 3 inches by 16 feet 2 inches and the car platform shall be as large as these dimensions permit. The clear height of the car shall be not less than 8 feet.

In the event that this work is of interest to you, you should forward to

the Bureau of Yards and Docks, Navy Department, Washington, D. C., to the Commandant, Naval Operating Base, Pearl Harbor, T. H., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$10 payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawings and specifications.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded while the specifications are received from the printer.

Prospective bidders on the West Coast should make application at the Naval Yard, Mare Island, Calif., for the bidding data.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on April 27, 1925, at which time they will be publicly opened and read for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Mendocino County, between Leggett Valley and two miles north of Rock Creek (L-Men-I-J) about six and three-tenths (6.3) miles in length, to be graded and surfaced with crushed gravel or stone.

San Mateo County, between Cypress Lawn Cemetery and San Bruno (IV-S M-2-A) about four and four-tenths (4.4) miles in length to be widened with cement concrete and portions surfaced with asphalt concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work to be completed, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARRY N. M. TOY,
LOUIS EVERING,
T. N. EDWARDS,
California Highway Commission.
R. J. MOORE,
State Highway Engineer.
W. F. MINON, Secretary.
Date, March 30, 1925.

COSTLY CONSTRUCTION

An experimental dam, to be built at
a cost of \$60,000, only to be destroyed
to test the latest engineering theories
in relation to the constant angle arch
type, will be constructed soon on Stev-
enson Creek, a tributary of the San
Joaquin river, north of Los Angeles.
Funds for the work have been provid-
ed jointly by Los Angeles county and
private interests. The object of the ex-
periment is to obtain data expected to
prove of great value in the construc-
tion of dams in the Los Angeles county
flood control program, in which ap-
proximately \$35,000,000 will be spent.
On several of these projects the use
of the constant angle arch type is
anticipated.

DO CONVENTIONS PAY

Whether or not conventions, from the community viewpoint, pay is a question for which the organization Service Bureau of the Chamber of Commerce of the United States hopes to provide a definite answer as a result of an investigation now in progress.

The question was submitted by the manager and committee in charge of the convention bureau of a chamber of commerce in a large eastern city who were startled by the statement of a group of retail merchants that, so far as they were concerned, conventions did not pay. This conclusion disclosed that their business during the week a fraternal convention was held in the city was less than the business for the weeks immediately preceding and following it. The committee did not accept the conclusion but it had not the facts upon which it could base a reply.

Several years ago a convention bureau manager in Louisville made a survey of the expenditure made by a convention held in that city by the National Cannery Association estimating that they had left in the city more than a million dollars. The bank clearings for the week appeared to corroborate this estimate. The manager of a large department store in New York

City said that the greatest volume of business in the store's history was done during the week of a convention held by a large educational association. During a convention in Toronto an Irish linen store sold out its entire supply.

There are many examples of spending of this kind but they did not satisfy the conventions committee of this local chamber of commerce. They wanted a more authoritative and convincing reply to the statement of the retail merchants and, therefore, asked the Organization Service Bureau of the National Chamber to make an impartial inquiry.

CUTTING DOWN INDUSTRIAL WASTE

Efforts to reduce some of the avoidable wastes prevalent in industry are rapidly expanding, it is reported by the Department of Manufacture of the Chamber of Commerce of the United States, through simplification.—the elimination of excess variations, duplications and over-diversity from common commodity lines. Experience has shown, the Department finds, that this process of cleaning out items of low or special demand has the effect of stimulating, rather than stifling, inventive genius and individuality.

Two of the most recent simplification programs developed were for steel reinforcing bars and cotton duck. In the first line 11 sizes of bars to be available in 3 grades of steel were established as the recognized schedule. In the opinion of the producers, distributors and consumers these 33 possible varieties are sufficient for all ordinary purposes and were adopted in place of 51 sizes previously made.

The range of diversity was even greater in the case of cotton duck. Here there were some 432 varieties of a special character were listed and will be obtainable upon quantity orders but will not be carried as regular stock goods.

These simplified schedules become effective January 1, 1925, and November 1, 1924, respectively, and remain operative for a period of one year, at which time they are subject to revision.

Both of these programs were carried out under the procedure developed by the Division of Simplified Practice of the Department of Commerce and the Department of Manufacture of the United States Chamber of Commerce. These two bodies have directed their efforts in the co-ordination and centralization of this work for a period of several years and already a large number of industries have availed themselves of this service.

PLUMBING, HEATING, LIGHTING AND PAINTING COSTS COMPARED

Four of the most important building cost items, plumbing, heating, lighting and painting, have been separated from the total money value of Industrial and Commercial building contracts and compared for the years 1923 and 1924. Industrial construction for the United States during these two years totaled \$281,621,000 and \$204,969,000 respectively. The minimum contract included in these totals is \$40,000.

Of the four items under industrial building, the installation of the heating equipment reaches the largest total, while painting operations come second. Commercial Building awards with minimum contract of \$150,000 amounted to \$934,905,000 in 1924 compared with \$814,936,000 for 1923.

As in industrial construction, heating involves the greatest expenditure of money of the four items under consideration.

The second operation as to the expensiveness of outlay in commercial building is that of lighting. This is due to elaborateness of this type of structure. The cost of the four operations is greater in commercial than in industrial contracts.

GRADE MARKING OF LUMBER INAUGURATED

The Department of Commerce is notified that grade-marking of lumber became effective April 1 in subscriber mills of the Southern Pine Association. Hereafter these mills, whose output is about 40 per cent of the total output of all the mills affiliated with the National Lumber Manufacturers Association, will brand-stamp every piece of lumber and every stick of timber that they send forth into trade channels.

The stamp will state the standard grade quality of the product and will carry the initials of the Southern Pine Association and an identifying number for the particular mill. Thus the Association and the individual producer put their names and reputations behind the product of the Southern Pine mills. Responsibility for grades is thereby fixed and recourse in the event of error direct and certain. There is no longer the possibility of juggling with grades between the mill and the consumer.

"The Southern Pine Association is to be congratulated on this decisive forward step in the interest of fair dealing in the lumber trade," was the comment of Wilson Compton, manager of the National Lumber Manufacturers Association. "Grade-marking is essential to the enforcement of the American Lumber Standards, on which we have been working in conjunction with the Department of Commerce and the United States Forest Service for three years. The final touches are to be applied to these standards for softwood lumber at the conference of the lumber producing, distributing and using industries to be held in Washington on May 1. I have no doubt that the leadership taken by the Southern Pine Association will impress itself deeply upon the whole lumber trade. The objective of the lumber standards, of which grade-marking is an outward and visible expression, is the protection of the honest and careful manufacturer in his reputation for good and reliable products and protection of the ordinary buyer in his right and opportunity to get a standard size and grade of lumber suited for his use by demanding American Standard lumber manufactured in accordance with specifications devised by qualified representatives of the lumber producers and consumers and recommended by the Secretary of Commerce for the universal use of lumber consumers."

IMMIGRATION LAW REDUCES NUMBER OF EUROPEAN WORKERS

During the last six months of 1924, which were the first six months of the immigration year as well as of the operation of the new law, only 147,737 immigrants were admitted to the country as against 499,856, which came in during the corresponding period in 1923. When it is remembered that a large percentage of the aliens now coming are dependents of those already in the country and, therefore, not wage earners themselves, it becomes evident that American industry must adjust itself to a new condition under which skilled workers will have to be recruited from people already living in this country.

\$60,000,000 S. F.-OAKLAND TUBE PROPOSED

Plans have been prepared and financial backing of leading capitalists of Wall street and the west has been obtained to the extent of \$60,000,000 for a confined tube and caseway connecting the business districts of Oakland and San Francisco.

This is the announcement of James M. Oliver, attorney representing James Marwick of Santa Barbara.

Financial interests are ready to provide the funds and it will be possible to begin construction just as soon as the plan made by J. Vinson Davies, engineer, is accepted by Oakland and San Francisco, according to Oliver.

Approval of the largest commercial and civic organizations on both sides of the bay already has been obtained, Oliver said.

The plans call for a tube with a transbay entrance at the San Francisco bulkhead a short distance south of Market street, extending at a depth of 40 feet for 3000 feet toward the Oakland estuary. There it will rise gradually to the surface and continue as a caseway to the East Bay shore.

The project, according to Oliver, would accommodate electric trains, automobiles and pedestrians.

Engineer Davies estimates maximum cost at \$50,000,000, but backing of an additional \$10,000,000 is assured, said Oliver.

The attorney pointed out as merits of this plan that it would follow a direct route between Oakland and San Francisco business centers, be built to accommodate increased traffic of the future, and the tube would be laid deep enough that navigation would not be obstructed, and hence there would be no objection from the war department.

COST OF RAILWAY EQUIPMENT

The present cost of railroad equipment is seen in the authority just granted by the Interstate Commerce Commission to the Missouri Pacific R. R. to issue equipment trust certificates totaling \$8,820,000 for the purchase of \$11,800,000 of new equipment. The Missouri Pacific's order calls for almost all kinds of new rolling stock.

Fifteen Mikado locomotives will cost \$63,872 each. Another 20 Mikado locomotives will cost \$55,686 each, and 10 Pacific type locomotives will cost \$54,877 each. Five switching locomotives will cost \$41,611 each.

Steel under-frame automobile box cars, of which 800 of 40-ton capacity are being ordered will cost \$2051 each while 200 of 50-ton capacity will cost \$2627.

A total of 2000 steel under-frame box cars of 50-ton capacity will cost approximately \$1960 each, while 750 steel under-frame gondolas of 50-ton capacity will cost about \$1935 each. Two hundred and fifty steel hopper cars of 55-ton capacity will cost about \$1850 each.

Ten mail storage cars will cost \$18,083 each, and 1 combination mail car and coach will cost \$29,416; 10 all steel baggage cars will cost about \$18,175 each, and 9 combination mail and baggage cars will cost \$22,869 each. Six new day coaches will cost \$26,792 each.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Dismissal of complaints against six manufacturers of steel and iron products and a supply company organized by them to purchase scrap steel and iron, is announced by the federal trade commission. The companies which were charged with combining to suppress competition in the purchase of raw materials used in their industry are: Pacific Coast Steel Company, San Francisco, Portland and Seattle; Columbia Steel Corporation, Pittsburgh, Cal., and Portland, Ore.; Llewellyn Iron Works, Los Angeles; Judson Manufacturing Co., San Francisco; Southern California Iron & Steel Co., Los Angeles and Steel Mill & Foundry Supply Company.

No special election need be held in Contra Costa County, as requested by the Northern California Development Company, to determine whether a franchise for bridging Carquinez straits shall be granted, according to the ruling of the state supreme court. The supreme court, upholding the county supervisors in their refusal to call the election, denied a writ of mandate asked by officers of the company. The supervisors based their refusal on the contention that to permit another Carquinez bridge would injure stockholders in the American Toll Bridge Company, now constructing a \$4,000,000 span.

A \$9000 judgment awarded by the Superior Court in favor of Dyer Brothers and six San Francisco iron works against the Central Iron Works and three other iron companies for alleged breach of a contract relating to labor relations, was reversed by the District Court of Appeal. It was alleged the defendant companies broke the agreement by dealing individually with employees rather than through the employees' organization.

The Bell Marble property above Columbia, Sonora County, has been transferred to the newly incorporated Bell-Columbia Marble Company. Six parcels of land are described in the deed, which is signed by Ed L. Park as president and May F. Warner as secretary of the selling concern. The stamps affixed to the deed indicate the price paid for the property is \$200,000.

Portland, Ore., building permits for March, 1925, total 11626 permits for improvements valued at \$4,641,125 as compared with 1528 permits in March, 1924, the work totaling \$2,247,290. The March, 1925, total was 1316 permits, improvements being valued at \$2,761,220.

Robert H. Winn, representing the Robt. H. Winn Co., of San Diego, building material dealers of San Diego, was a recent visitor to the San Francisco Builders' Exchange. Mr. Winn reports construction very active in the southern section and expects a general increase in activities all along the coast.

The Danish motorship Chile arrived at Seattle, Wash., April 1, with a general cargo including 2000 tons of foreign cement.

Output of steel in the United States in 1924 totaled 2,433,332 gross tons, a decrease of 471,184 tons or 16.22 per cent from 1923.

The Industrial Accident Commission reports that 294 decisions were rendered during the month of March, making a total of 1741 for the previous six months, or an average of 290 cases per month. These figures do not include supplemental orders issued in connection with prior decisions, but represent original decisions on cases adjudicated within the period mentioned. This is a large increase over the average and number of decisions rendered for like periods in the past, and its accomplishments has been made possible through the adoption of simplified methods of procedure coupled with increased efficiency on the part of its staff.

The State Supreme Court has upheld a \$360,897 contract entered into between Howard S. Williams of San Francisco and certain officials of the city of Stockton for construction work on the proposed \$600,000 city hall, after succeeding officials had repudiated all of the contracts on the ground that they exceeded the available money by some \$90,000. Simultaneously a contract for \$10,000 for plumbing work on the building, which had received the same treatment, was also upheld by the court.

Bricklayers and carpenters in Boston have voted to continue existing agreements for a period of three years. As a result of this action on the part of two important trades, contractors believe that the other trades will agree to accept the three-year agreement at present rates offered by the Building Trades Employers Association. The majority of the trades in Boston are now getting \$1.10 per hour. The bricklayers and plasterers are getting \$1.25. The plasterers are demanding \$1.50.

About 24,000 miles of highway, nearly enough to circle the earth, are scheduled for construction during the year 1925 by the various state highway departments. Reports to the bureau of public roads show maintenance of 217,794 miles of road also is planned. Approximately \$405,000,000 was reported available for construction and \$135,000,000 for maintenance by state departments, while it was estimated that counties would spend approximately \$163,000,000 for road work.

Water problems of California are reviewed in a supplemental report on state water resources prepared by Paul Bailey and submitted informally to the legislature. The report stresses the importance of completing the survey commenced in 1921 for the purpose of working out a plan whereby the state can better conserve its water resources. The report recommends storage reservoirs in the watershed of the Sacramento river and its tributaries.

Carl Miller has resigned his position as maintenance superintendent for the California State Highway Commission in Humboldt and Del Norte counties, to accept a position as construction superintendent with the Englehart Packing Company of Eureka. W. W. Compton succeeds Miller on the highway staff.

William Quinton, retired building contractor of Sacramento, died in that city April 5. Quinton was a native of Ireland and was 86 years of age.

ALONG THE LINE

According to a report by Henry D. Dewell, consulting engineer of San Francisco, the city of Sacramento is faced with the expenditure of \$430,000 to rehabilitate its filtration plant, put into operation a year ago. Dewell's report was filed with the city council recently. The plant originally cost \$2,650,000.

Declaring that the gravel association in the East Bay District had helped to finance the recall against him, City Commissioner Bacus of Oakland, announces he will recommend to the Oakland city council that crushed rock instead of gravel be exclusively used in all street paving.

Main Municipal Water District will hold election April 18 to vote bonds of \$1,500,000 to finance extensions and improvements to water distributing system.

Jack Rapier has been appointed city engineer of Hermosa Beach to succeed H. R. Taylor, resigned.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, OF BUILDING AND ENGINEERING NEWS, published weekly at San Francisco, Cal., for April 1, 1925.

State of California, City and County of San Francisco, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared E. J. Cardinal and J. I. Stark, who, having been duly sworn according to law, depose and says that they are the Publishers and Owners of the Building and Engineering News, and that the following is, to the best of their knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher, E. J. Cardinal, 665 19th Ave., San Francisco, and J. I. Stark, 1250 Francisco St., San Francisco.

Editor, E. J. Cardinal, 665 19th Ave., San Francisco.

Managing Editor, J. P. Farrell, 350 Brannan St., San Francisco.

Business Managers, E. J. Cardinal and J. I. Stark.

2. That the owners are:

E. J. Cardinal, 665 19th Ave., San Francisco.

J. I. Stark, 1250 Francisco St., San Francisco.

3. That the known bondholders, mortgages, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

E. J. CARDINAL AND J. I. STARK.

Sworn to and subscribed before me this 1st day of April, 1925.

(SEAL) CHALMER MUNDAY.
(My commission expires Oct. 17, 1925).

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

STEEL AND IRON INDUSTRIES HARMONIZED

California's allied steel and iron industries have been more thoroughly harmonized, and the work of their various groups more intelligently coordinated than ever before as the result of the organization at Del Monte less than two months ago of the California Steel Conference. This was the message to the chairmen of various groups of the northern division, at a meeting in the offices of the California Development Association and attended by representatives of San Francisco and East Bay Chambers of Commerce.

"The California Steel Conference has demonstrated, even beyond our hopes, that it is possible for firms in the same line of business to perform a better service, at more profit to themselves and less expense to their clients, by working harmoniously together, along the lines of business methods laid down by a code of business ethics than by operating individually, each suspicious of the other." This was the statement of John Clymer, manager of the Structural Steel Institute and chairman of the structural group of the Conference.

"Men, who, before this Del Monte meeting, refused even to speak to one another, have been gotten together at small meetings and at dinners and have come to a better understanding, with results that will be beneficial not only to themselves, but to architects, builders and building owners with whom they deal."

Standardization of specifications, whereby large buildings may be erected at a saving of steel of from eight to twelve per cent in conformity with regulations laid down by the American Institute of Structural Steel, and a consequent saving to the owner, is an important step planned by the new Conference. This and other improvements over the old order are on the program, and in the foreground of these is a code of ethics surrounding the submitting of bids by members. A bid, once submitted, must stand, and there can be no revision to meet the lower figures of a competitor.

The use of California steel is to be urged by contractors and owners when price, quality and service are equal to Eastern or foreign product. There will be no plea to force the use of local goods when they fail honestly to compete with other markets."

The meeting was presided over by Charles M. Gunn, of Gunn-Carle & Co., chairman of the Northern Executive Committee of the state body. Others in attendance were Charles Knight, Industrial Director of the California Development Association and publicity-directors of civic organizations throughout the Bay district.

A meeting of the full executive committee, to be attended by representatives from all parts of the State, will be held on Friday, May 8, in the offices of the San Francisco Chamber of Commerce, to be followed by a luncheon at the Commercial Club.

ENGINEERS ELECT

San Bernardino Chapter, American Association of Engineers, has elected the following officers: Howard L. Way, San Bernardino, president; Frank P. Mooney, Redlands and G. H. Speyer, San Bernardino, vice-presidents; W. L. Pourrier, San Bernardino, secretary.

Guerin Succeeds "Billie" Feary as President of S. F. Material Dealers

At the regular weekly meeting of the Building Material Dealers' Association of San Francisco held March 31, and as a climax to several years of faithful guidance, William J. Feary of the Western Lime & Cement Company, surrendered his office as president of the association, and Stephen I. Guerin of J. S. Guerin Company was elected to succeed him.

Feary's administration has been marked with success. At the time he was elected to office in December, 1921, the Building Material Dealers of San Francisco were unorganized and harmony and co-operation among them was unknown and unheard of. Through his administration and guidance, the association has accomplished much for its members—obstacles occasioned by jealousy and lack of confidence in each other have been surmounted and overcome—methods of placing the business on a higher plane have been inaugurated and are well underway—relations between the manufacturer and the dealer have been vastly improved and the members of the association have adopted credit terms which will prove advantageous to their customers who are endeavoring to conduct their business honestly and on good business principles.

Much of the good work accomplished by the association is due to the untiring

and faithful efforts of the outgoing president.

Feary's resignation was accepted with profound regret as evidenced by the remarks of esteem and appreciation from his fellow dealers.

The new president, "Steve" Guerin, in accepting office paid Feary and his administration a glowing tribute, and assured the meeting of his desire and efforts to continue on with the precedent established by his predecessor.

"Steve" has all of the qualities of a good executive, is well known and well liked, and it goes without saying he will fill "the job" to the satisfaction of all.

At the same meeting, Charles M. Cadman, of the Atlas Mortar Company, was elected vice-president. "Charley" is well known for his "fair minded" stand on all questions and with his aid and assistance the new administration holds forth bright prospects to the membership for the ensuing year.

Frank L. Hatch remains as Secretary.

The membership consists of the following dealers: Atlas Mortar Company, Eclipse Lime & Cement Company, Golden Gate Building Materials Company, Henry Cowell Lime & Cement Company, Holmes Lime & Cement Company, Howes Lumber Company, J. S. Guerin Company, Jas. E. Guerin & Cement Company, R. O'Connell & Son, San Mateo Feed & Fuel Company, and Western Lime & Cement Company.

SEATTLE SELECTED FOR 1926 MEET OF A. S. C. E.

Listing in its ranks many of the leading engineers of the country the American Society of Civil Engineers will hold a national convention in Seattle in July, 1926, it is announced by the Western Washington section of the society with headquarters in the Arctic Bldg., Seattle.

The national convention in 1926 will be preceded by meetings in Seattle of the board of directors of the national society, according to E. M. Chandler, of Olympia, president of the Western Washington section.

SACRAMENTO EXCHANGE ELECTIONS

The Board of Directors of the Sacramento Builders' Exchange has elected the following officers to serve for the ensuing year: President, Howard K. Johnson; vice president, W. J. Clifford; treasurer, L. H. Chapman; secretary, Andrew W. Palm.

TEMPORARY INJUNCTION GRANTED IN NEW YORK STRIKE

A temporary injunction order signed by Judge John C. Knox of the U. S. District Court was issued in New York on March 13th, restraining ornamental iron workers, derrick men, riggers and machinery movers from carrying out a strike threat. The injunction, if maintained as at present written will be the most drastic and positive hand-

ed down by courts in recent labor history, was granted on the application of four contracting concerns, members of the Iron League of New York. Final hearings on the injunction will be held late this month and the temporary restraining order will either be made permanent or dissolved.

In terms the order restrains the unions and their officers:

"Combining or conspiring to compel the said plaintiffs in the prosecution of their work of fabricating and erecting structural steel to employ in the performance of such work only members of a labor union and to refrain from employing any person or persons not members of a labor union.

"From intimidating, coercing, inducing or advising any person or persons whomsoever to refrain from engaging plaintiffs to perform work.

"From conducting a boycott of plaintiffs and from inducing and advising a boycott of plaintiffs.

"From calling, inducing or advising sympathetic strikes as a means of carrying on a boycott against the plaintiffs or any of them.

"From interfering with, hindering or obstructing plaintiffs' businesses and the operation of plaintiffs' businesses in any manner whatsoever.

"From doing any act or thing whatever to restrict plaintiffs from the free and unhindered control and conduct of plaintiffs' businesses.

"From ordering, commanding, directing, assisting, aiding or abetting in any manner whatever, any person or persons from committing or attempting to commit any of the aforesaid acts."

L. A. Chamber of Commerce Urges Use of California-Made Cement

The following letter addressed to Mr. L. P. E. Giffroy, Los Angeles representative of a Belgian cement company, by Arthur G. Arnoll, secretary of the Los Angeles Chamber of Commerce is self-explanatory.

The letter followed a communication of the Los Angeles Commerce body to the State Highway Commission urging that preference be given to California-made cement in the construction of public works by that body.

While approved in most quarters, the Chamber received a vigorous letter from Mr. Giffroy attacking the Chamber's position and stating that he considered such action "unfair competition."

March 30, 1925

Mr. L. P. E. Giffroy, Mgr.,
Los Angeles Branch,
Cimenteries & Briqueteries Reunies,
226 Higgins Bldg.,
Los Angeles.

My Dear Mr. Giffroy:

This will acknowledge receipt of your letter of March 23rd, in which you take exceptions to our letter urging the State to give preference to California made cement in construction of its highways.

We appreciate the fact that you are a member of this Chamber. We have many other members primarily interested in foreign trade, and there are also a large number of members directly connected with the manufacture and sale of local Portland cement. However in the present, as in other matters, we are seeking the welfare of the community as a whole, rather than that of any group of members.

As regards the harbor, it is the child of the Chamber of Commerce. In its conception, birth, and development we have felt the interest and responsibility of a parent. You surely do not need instances of times in which the Chamber has assisted importers who have had some difficulty with their shipments nor of the constructive work being done by our Trade Extension Department. As you recognize, however, it is "an uncontested duty of every community" to patronize home products, and when the foreign product comes into competition with the home product, we feel that the interests of the home producer should naturally be closest to our hearts.

This brings up the question of the capacity of the local cement mills which you say cannot satisfy the enormous demands. The fact is that with the exception of a very few months in 1923, when the expansion of building in Southern California surpassed any previous records or estimates that might have been made, the cement mills have been fully adequate to the entire needs. As a matter of fact, nearly 10,000 barrels per day have been added to our mill capacity since 1923, and at the present time the mills are operating below capacity, with an enormous amount of cement in storage.

You state that we have "taken a decided stand against importations," whereas, as a matter of fact, the maximum of our request was only that a preference be given to the California product.

When you state that our policy would expect vessels to come empty to this port to take away our export products, you must be overlooking the facts as regards our trade with your country. During the last year for which figures are available, the exports from Los Angeles to Belgium were \$194,500, of which \$70,000 was returned cement sacks, indicating that other commodities exported amounted to \$124,500. As the cement sacks were valued at 10c each, this would indicate the importation of 700,000 sacks of cement, or a value of \$350,000, or nearly three times the total amount of the exports to Belgium. Isn't it closer to the fact to say that much of the time the vessels from

Belgium would be coming to Los Angeles empty, were it not for the ballast which is supplied by the cement which is thus being transported at what would otherwise be below cost?

On the other hand, where the commodity imported does not compete with local industry, but supplies it, we have fought the importer's battle. You will recall our successful opposition to the proposed duty of \$1 per ton on Belgian silver sand which is used by our glass factories, and now is being imported in enormous tonnage.

Again, on the matter of foreign commerce, the average importation of cement into the Hawaiian Islands amounts to about 250,000 barrels per year. This had been exclusively shipped from San Francisco and St. Louis, mostly from San Francisco and Los Angeles until the recent entrance of the Belgian cement into the field. At the present time the figures show that this trade has been entirely taken away from California companies and not only the payrolls and domestic purchases of these companies reduced accordingly, but the ports of San Francisco and Los Angeles have suffered to that extent in the diminution of their export cargoes.

We are somewhat at a loss to understand your expression as to "unfair competition." You inaccurately quote us as saying that "California product is 25% better than Belgian cement." We did say that the official tests of the City of Los Angeles for 1924 showed that the local cements were approximately 25% stronger than foreign cements on the average. We have since obtained the records of 198 tests for January, 1925, which show the local cement with an average compression test of 2500 pounds, and the foreign cement with an average compression test of 1900 pounds, so that we somewhat understated the comparison.

It is true that some cements test out stronger than others, but the difference between the local and foreign seems to run fairly steady. Probably there is more than humor in your suggestion that the climate has something to do with this. As a matter of fact, tests by recognized experts show that the storage of cement in sacks, particularly when exposed to humid conditions of an ocean voyage, reduces its strength very appreciably. Thus, even if foreign cements are at the time of shipment in every way up to the local cements, they would not be their equal when delivered in California after a number of weeks' voyage, and particularly after an extended storage in a warehouse at the harbor. Bearing this out is the installation of a reconditioning plant at the harbor which, for the purpose of breaking up and drying out the lumps which appear in importations of foreign cement.

The California cement producers, when they export cement, find it necessary in order to protect their product, to pack it in sacks with waterproof paper linings. When they do so, they charge 25c a barrel more for this cement, but are enabled to deliver their goods in the best condition.

We referred to the fact that foreign cement frequently ran below weight,

and showed a lack of uniformity in the net contents per sack. The reports of the City Inspector of Public Works, condemning on this account various lots which had been delivered, are ample proof of this statement; nor are the offenders exclusively foreign brands produced by some other method than your own.

We are not attempting in this letter to state the case for the local cement as against the foreign cement with any completeness. The possibility of obtaining cement from Belgium, Germany, or Scandinavia is no doubt salutary as a protection against periods of such increased demand as tax the capacity of local mills, and a certain amount of such competition may perhaps be stimulating to local manufacturers.

Foreign commerce, through the centuries, has been built up between nations in proportion as it enables countries to obtain in exchange for their own products, other goods which they need, but do not produce. This is the commerce which we believe is particularly to be encouraged. Where, however, commerce brings to us commodities which we, ourselves, produce, and where importation reduces the payrolls and prosperity of local industry, we cannot do otherwise than adopt what you describe and justify in your own words as "the patronizing policy" for home products, for this is an uncontested duty of every community.

Yours very truly,

LOS ANGELES CHAMBER
OF COMMERCE
A. G. Arnoll, Secretary

CS:CL

PITTSBURGH STEAM FITTERS AND LABORERS STRIKE

Journeyman steam fitters went on strike in Pittsburgh on March 11th following refusal of contractors to grant them a new wage scale of \$1.50 per hour. The employers have offered the men a rate of \$1.433, which is the same as the plumbers, electricians and sheet metal workers are now getting. No agreement has yet been reached with the Hod Carriers, Building and Common Laborers' Union. The common laborers are demanding 90 cents an hour while the hod carriers are asking \$1.25. The present rates are 70 cents for laborers and \$1.00 for hod carriers. Members of this union have been on strike since March 16th. An agreement has been reached with the bricklayers which carries a wage rate of \$1.62 1/2 per hour or \$13 a day, beginning June 1, 1925. This is an increase of 7 1/2 cents an hour over the present rate. A new agreement has also been reached with the composition rosters which calls for a wage of \$1.16 1/2 an hour as against \$1.10, which was the old rate. The wages for foremen were increased from \$1.16 1/2 to \$1.26 1/2.

TRADE NOTES

What is said to be the only manufacturing plant on the Pacific Coast turning out the complete product of steel rolling doors and shutters is now operating in San Francisco with the establishment at 447 Hampshire street of the Kennerson Manufacturing Company, makers of steel and wooden rolling doors and shutters and steel and wooden folding doors for warehouses, piers, partitions and elevator openings.

The concern, which started in business here last December, is now in full operation in a concrete building affording 6,000 square feet of floor space. The company also does repair work on all forms of doors.

The officers are Walter Kennerson, president; H. W. Cookson, vice-president and general manager, and Fred Delger, secretary. Kennerson has been in that line of business for the past 25 years in San Francisco and Cookson has had 10 years of experience here in the building material business.

A San Francisco branch has been established by the Arctraft Metal Specialties Company, manufacturers of lighting fixtures, lanterns and metal specialties, and will form the wholesale and retail distributing agency in San Francisco for the Pacific Aluminum & Fixture Company of Fresno, which is the factory branch of the Arctraft Metal Specialties Company owned and operated by James H. Pedgrift in Oakland.

Geo. H. Tay Co., of San Francisco, has filed articles of incorporation at Sacramento. The company is capitalized at \$250,000 and will carry on a business of manufacturing, constructing, buying, selling and dealing in all lines of tinware, copperware, brassware, ironware, hardware, stove, castings, pipe, team fittings and kindred goods. The company plans immediate erection of an office, distributing warehouse and display room structure in Sacramento.

Albert W. Anderson, operating Anderson's Planing Mill at Mono and P streets, Fresno, announces he will retire from business within the next few weeks. Negotiations are now under way for the sale of the stock and equipment. Anderson has been in the mill business in Fresno for the past thirty years.

Built-In Fixture Co., 2608 San Pablo Ave., Berkeley, has started on a program of plant enlargement. An office and warehouse addition, an independent warehouse and semi-enclosed building are now under construction.

Willis E. Clark, with headquarters at Seattle, Northern Pacific Coast representative for the Gladding, McBean Company of San Francisco, was a recent visitor to the San Francisco Builders' Exchange.

Cunningham Tank Corporation of California, capitalized at \$700,000, has been incorporated with the principal place of business at San Francisco. Directors are: T. A. Quinlan Jr., D. Hadden and C. W. Morris.

San Mateo Planing Mill Company has started construction on a garage and lumber shed at San Mateo. The plant will cost in the neighborhood of \$10,000.

E. Roy Nash Co., Inc., has opened quarters for the sale of electrical appliances at 15 West Gabilan street, Salinas.

Building Boom to Continue Until 1932—Says Lumber Chief

It will take until 1932 for the United States to catch up with building shortage and the normal building requirements.

This statement is made by Charles S. Keith of Kansas City, one of the most prominent lumber manufacturers of the country.

"Conditions so far indicate that 1925 will surpass last year in volume of construction," Keith added. This is supported by well advised authorities. This means that in the neighborhood of \$5,000,000,000 will be spent in building this year; that employment of men in the building trades at high wages will be continuous and that consumption of steel, lumber, cement and other commodities affecting every section of the country to some degree will be heavy.

Farmers Behind

"The farmers are five years behind with their building programs right now," Keith continued. "They are just commencing to buy lumber and the demand from this source will be heavy. At present they are buying implements in great quantities. One implement dealer told me just before I left Kansas City that his volume of sales from last November to date had increased 110 per cent compared with a year ago and that his entire 1925 quota of tractors had already been disposed of. The sales of lumber to farmers will be the largest in four years.

"I anticipate no fall in the price of lumber. Industrial demands are increasing steadily. What this means can be realized when it is understood that the manufacture of boxes alone accounts for 12½ per cent of all the lumber produced in the United States. The automobile industry requires 5 per cent of the output and the railways absorb 25 per cent. In the cases of all these industries, activity is rampant.

Exports to Be Heavy

"Exports of lumber may be expected to be heavy. Continental Europe is

taking more American lumber than at any time since 1913. The first German buyer to enter our offices since 1912 has just placed an order with us. The flush demand from Japan has quieted since the temporary building to replace the earthquake damage has been completed, but the requirements this year in that country will be good. Chinese buying may be delayed by civil war, but can be expected to come up to that of 1924. The Australian sales, I do not anticipate, will be very good.

"There is no reason why we should not have an excellent year in the lumber business, and lumber and steel are the most sensitive indicators of business and prosperity which we have. Fourteen billion feet of lumber has gone from transit and retail stocks in the last year. Production will not be increased and demand will be steady, according to my opinion.

Northwest Conditions

"The northwestern mills, it is true, are on a four-day and five-day basis, but this is due to the fact that they expect consumers to take production as it is turned out. Many of them have no yardage in which they can store reserve stocks.

"The increased efficiency of the railroads has led to a lot of what is commonly termed hand-to-mouth buying. It has resulted in the movement of fourteen billion feet into building and other uses, and buyers are not anticipating their needs far in advance. Instead of buying five and six months ahead, consumers and distributors are anticipating their needs only by thirty to sixty days, for they can get shipments so much quicker.

As a result they buy more freely, but in smaller quantities. The western mills will have to adjust themselves to that trend of affairs. But they also can be expected to have a fine year, as is indicated by the fact that they sold 10 per cent more than normal capacity production last year."

R. C. Storrie of San Francisco Wins Nine Million Dollar Power Project

That construction work will start within the next few weeks upon an \$8,500,000 power plant to be constructed on Bucks creek, a tributary of the north fork of the Feather river, is the official announcement made by the Feather River Power Company.

The announcement followed the signing of a contract by which the power developed by the new plant will be sold to the Great Western Power Company and distributed by that company.

Formal application for permission to proceed with the work will be made to the State Railroad Commission at once. As all the details have been arranged, including financing, it is expected that the permit will be granted without delay.

The plans of the company call for the construction of a dam that will convert Bucks ranch into a reservoir.

The power plant, which will be located on Bucks creek, will develop 50,000 horsepower. It will feed into the power line connecting the Caribou plant of the Great Western Power Company with the Las Plumas plant.

The contract for the plant has been

awarded to R. C. Storrie & Co. of San Francisco, one of the largest contracting companies on the Pacific Coast. Equipment is now being assembled to proceed with the work.

The power was awarded to the Great Western Power Company after spirited bidding between the Byllesby interests and the Pacific Gas & Electric Company. President H. P. Wilson of the Great Western Power Company conducted the negotiations personally on behalf of his company.

After completing its Bucks ranch reservoir, the company will proceed with the development of the plants on the middle fork of the Feather river. The original plan had been to build these plants first, and it had been expected that a start would be made this year on the Bear creek plant, about twenty miles above Oroville. The contracts with the Great Western Power Company, however, made it advisable to build the Bucks creek plant first.

The development on the middle fork of the Feather river calls for five plants, costing approximately \$50,000,000 and developing over 200,000 horsepower.

SUNDAY, APRIL 12th is Easter.

AND MANY California cities.

LIKE SAN Francisco.

WILL HAVE sunrise services.

AT 5:39 A. M. (sunrise).

ON MT. Davidson, San Francisco.

SANDY PRATT, President.

OF THE Pratt Building Material Co.

PRODUCER OF crushed rock.

CLEAN SAND and washed gravel.

WILL SERVE.

AS A committeeman.

TO HELP the 30,000 worshippers.

WITH THEIR sunrise devotion.

WHILE SANDY Pratt, "Mayor."

OF BEAUTIFUL Westwood Park.

IS ON Mt. Davidson.

THE GOOD people of Placerville.

WILL WORSHIP.

ON SACRAMENTO hill.

NEAR THEIR wonderful city.

DO YOU know.

THAT ARMOUR sold bacon.

AND STUDEBAKER made wheelbarrows.

AT PLACERVILLE.

IN THE pioneer days.

AUBURN WILL worship.

AT AEOLIA Heights.

ABOVE THEIR pretty city.

OVERLOOKING THE American River.

THAT PRODUCES sharp sand.

FOR SANDY Pratt's company.

THE FOLKS in Marysville.

HOME OF Sandy's Marysville sand.

OUT OF the Yuba River.

WILL GO TO Sutter County.

TO THE "Marysville Buttes."

AND AT sunrise.

ATTEND CHURCH services.

CHICO WILL also assemble.

ITS GOOD citizens.

ON EASTER morning.

SO WILL many other cities.

AND AT the sunrise services.

ON MT. Davidson last year.

25% OF the people.

THAT CLIMBED the mountain.

WERE NON-CHURCHGOING people.

SO THESE services.

SHOULD BE encouraged.

AND THIS is the reason.

SANDY TAKES an active part.

IN SAN Francisco's sunrise service.

"I THANK you."

This photo taken before sunrise at the 1924 Easter services on the top of Mt. Davidson, San Francisco, shows the cross that Sandy Pratt, producer of clean, sharp sand, hard, crushed rock and washed gravel, assisted in erecting. The cross is 79 feet high and the arms are 26 feet across.

Official Proposals

BIDS WANTED FOR HIGHWAY IMPROVEMENTS

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned on April 22, 1925, for constructing portions of the state highway system as follows:

(1) Alternate bids will be received until and opened at 1:30 P. M. for construction of three (3) bridges and approaches near Verdi, Washoe County, as follows:

Proposal No. 1, three steel bridges; Proposal No. 2, two reinforced concrete arch bridges and one plate girder bridge.

(2) Alternate bids will be received until and opened at 2:30 P. M. for grading, construction of culverts and placing of gravel surface between Dunphy and the east county line, Eureka County, as follows:

Proposal No. 1, Dunphy to 12 miles east, length 12.2 miles; Proposal No. 2, 12 miles east of Dunphy to east county line, length 10.25 miles; Proposal No. 3, Proposals Nos. 1 and 2 combined in one bid, total length 22.45 miles.

Sealed proposals will also be received by the undersigned on April 29, 1925, for constructing portions of the state highway system as follows:

(1) Alternate bids will be received until and opened at 1:30 P. M. for grading, construction of culverts and placing of gravel surface between Battle Mountain and east county line, Lander County, as follows:

Proposal No. 1, Battle Mountain to Argenta, length 12.18 miles; Proposal No. 2, Argenta to east county line, length 7.81 miles; Proposal No. 3, Proposals Nos. 1 and 2 combined in one bid, total length 19.99 miles.

(2) Bids will be received and opened until 3:30 P. M. for gravel surfacing a portion of the state highway system in Churchill County between 5 miles south of Fallon and Grimes Ranch, length 5.08 miles.

Each bid may be examined and form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerks' offices of the respective counties at Reno, Fallon, Eureka and Austin; in the division offices at Elko, Reno and Las Vegas; and the district office of the Bureau of Public Roads, Bay Building, San Francisco. For copy of each set of plans, undersigned requires a deposit of Fifteen Dollars (\$15.00), which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificates from a surety company, duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

(Hospital—Cannaco, P. I.)

Sealed Proposals, indorsed "Proposals for Hospital Construction, Cannaco, P. I. Specification No. 5051" will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C. Until 11 o'clock A. M. (date not set), 1925, and then there publicly opened, for the following work at the Naval Hospital, Cannaco, P. I.—Part I—New Building including plain and re-

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

infused concrete; structural steel; wood framing, sash, doors and finish; plaster and metal lath and furring; interior marble and tile work; asbestos shingle and built-up roofing; sheet metal work; steel sash; steel doors and steel covered doors and trim; miscellaneous steel and iron work; hardware; painting and glazing; hand operated dumbwaiters; sheet lead lining; cork board furring; cold storage rooms and cook's refrigerator and ice cream rooms. Part II—All water, sewer, and drainage lines from existing mains to the buildings; the removal and rearrangement of certain service lines, catch basins, etc.; all plumbing, hot water heaters, and steam distribution within the buildings; the installation of grease traps, drainage sumps, manholes, etc.; an outside steam distributing system; a sprinkler system; and refrigerant piping. Part III—Lighting system for each building; power systems and telephone conduits in certain buildings; nurses call systems in certain buildings; and outside electric distributing systems including transformers, panel boards, fixtures, conduits, ducts, and wiring. Specification No. 5051 and accompanying drawings may be obtained on application to the Bureau, to the Commandant, Navy Yards, Mare Island, California, or to the Commandant, Naval Station, Cavite, Philippine Islands. Deposit of a check or postal money order for \$40, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specification. L. E. GREGORY, Chief of Bureau, March 19, 1925.

NOTICE TO CONTRACTORS

(Bureau of Yards and Docks—Pearl Harbor, T. H.)

The Bureau of Yards and Docks invites your attention to the fact that it will open proposals, April 29th, 1925, on Specification No. 5076, Concrete Pavement and Runway for Seaplane Hangar, Ford Island, Naval Operating Base (Air Station) Pearl Harbor, T. H. The work consists of cutting and grading of the shore portion of the site, the

filling and riprapping of a portion at the water's edge, the performance of certain work in taking care of existing services, the placing of concrete paving to be cast in place, and the placing of precast concrete slabs under water.

In the event that this work is of interest to your firm you should forward immediately to the Bureau of Yards and Docks, Navy Department, Washington, D. C., to the Commandant, Naval Operating Base, Pearl Harbor, T. H., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$10 payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawings and specification, which will be forwarded as soon as available.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on May 4, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows: San Diego County between two miles south of San Onofre and Northerly Boundary (VII-S.D.-2-D) about three and six-tenths (3.6) miles in length, to be paved with Portland cement concrete.

Ventura County, a reinforced concrete girder bridge across Ventura River near Ventura. (VII-Ven.-2-D), consisting of one 30-foot and three 60-foot spans with approach fills.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for such inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS J. ENGLISH,
T. EDWARDS,
California Highway Commission.

R. M. MORTON,
State Highway Engineer,

BRIDGES

SAN JOSE, Santa Clara Co., Cal.—County Surveyor Robt. Chandler preparing spec. for rein. conc. culverts in Prospect Rd. and Kennedy Rd.

SAN JOSE, Santa Clara Co., Cal.—Wm. Radtke, chmry, Co. 31183 awarded cont. by supervisors for rein. conc. culvert in Middle Ave. Sup. Dist. 1. Surveyor's estimate \$1295. Other bids: Ryan & Walsh \$1698; J. D. Neall, \$1321; Chas. S. Collins, \$1335; Herschbach & Sciarrino, \$1326.

SAN JOSE, Santa Clara Co., Cal.—County Surveyor Robt. Chandler preparing spec. for bridge in Llagas Ave. over Llagas Creek in Sup. Dist. No. 1.

PETALUMA, Sonoma Co., Cal.—A. Schlunger, Petaluma, at \$3350 award, cont. by city trustees to const. conc. bridge over Thompson Creek at Fifth St. Other bids: R. Press Smith, \$5331; Proctor and Cleghorn, \$3945.

VENTURA COUNTY, Calif.—Until (1) May 4, 2 p. m., bids will be rec. by State Highway Commission, Forum Bldg., Sacramento, to const. rein. conc. bridge over Ventura county over Ventura river near Ventura, consisting of one 30-ft. and three 60-ft. spans with approach fills. R. M. Morton, state highway eng. See call for bids under official proposal section in this issue.

ALAMEDA, Alameda Co., Cal.—City Manager Clifton E. Hickok will recommend to county supervisors the placement of a 24-in. and high street bridges over the estuary.

WASHOE COUNTY, Nevada—Until April 22, 1:30 P. M., bids will be rec. by State Highway Commission, Geo. W. Borden, state highway engineer, to const. 3 bridges and approaches near Verdi. Alternate proposals will be received as follows:

Proposal No. 1—Three bridges complete with approaches as follows:
Bridge No. 1—100 ft. steel trusses, concrete abutments.
Bridge No. 2—70 ft. plate girders, cylinder piers.
Bridge No. 3—126 ft. steel trusses, concrete abutments.

Proposal No. 2—Three bridges complete with approaches as follows:
Bridge No. 1—91 ft. Reinforced Concrete Arch.
Bridge No. 2—70 ft. plate girders, cylinder piers.
Bridge No. 3—126 ft. Reinforced Concrete Arch.

Bids may be submitted on either one or both proposals.

Work is to be commenced within 15 days after approval of contract and to be completed within 150 days (Sundays and Holidays not included) from the date of approval.

Sand and gravel for concrete will be furnished by the State f. o. b. cars at Verdi. Cement will be furnished by the State f. o. b. cars at Verdi.

Project involves under Proposal 1, three steel bridges with approaches: 1,626 cu. yds. excavation unclassified (roadway); 1,998 cu. yds. excavation; 155.0 cu. yds. rip rap; 24,500 lbs. struct. steel in place (bridges Nos. 1 and 3); 78,000 lbs. struct. steel in place (bridge No. 2); 557 cu. yds. Class "A" and 50 cu. yds. Class "C" concrete; 4 6 ft. dia. steel cylinders complete in place; 2 4 ft. dia. steel cylinders complete in place. State will furnish 575 bbls. cement, 891 tons crushed rock and 4 1/2 tons sand, all f. o. b. cars at Verdi.

Project involves under Proposal 2, two conc. arch bridges and one steel plate girder bridge: 12,363 cu. yds. excavation unclassified (roadway); 706 cu. yds. structure excavation; 155 cu. yds. rip rap; 78,000 lbs. struct. steel in

place (bridge No. 2); 1106 cu. yds. Class "A" and 50 cu. yds. Class "C" conc.; 4 6 ft. dia. steel cylinders complete in place; 2 4 ft. dia. steel cylinders complete in place. State will furnish 1793 bbls. cement; 1619 tons crushed rock; 303 tons sand, all f. o. b. cars at Verdi. See call for bids under official proposal section in this issue.

SACRAMENTO CO., Calif.—Following bids rec. by State Highway Commission, April 6, to const. undergrade crossing, 30-ft. wide, under Western Pacific R. R. near North Sacramento, consisting of 62-ft. through plate girder, ballast deck bridge on triangular concrete abutments:

M. B. White, Stockton 21,886
Associated Const. Co., S. F..... 26,260

SAN JOSE, Santa Clara Co., Cal.—Until April 20, 5 p. m., bids will be rec. by C. B. Goodwin, city manager, to const. rein. conc. bridge (girder type) over Guadalupe river at Julian St. Cert.

check 10% payable to city req. Plans obtainable from Wm. Popo, city eng., on deposit of \$10, \$7.50 of which is returnable.

SAN FRANCISCO—Western Pacific R.R. Co., Mills Bldg., will expend several hundred thousand dollars in bridge replacements this spring. Plans for the work have been completed by Chief Engineer J. W. Williams and Col. H. M. Smither, bridge engineer. The latter will have charge of all work.

In California, a 375 ft. wooden trestle at Red Rock is to be replaced by steel. At its highest this trestle is 50 ft. above ground, and the structure is on curves.

Twenty-four miles east of Oakland at Halvern fill, a reinforced concrete bridge is to be installed.

Much of the replacement work is to be done in Nevada. Western Pacific tracks cross the Humboldt river 28 times. This year the program includes the following:

East of Elko, two structures, an 80-ft. girder bridge and a 60-ft. girder bridge.

At Pa'pade, one of the largest structures on the entire line, where a 275-ft. bridge is to be erected, with a 175-ft. deck truss and girders of 60 ft. and 40 ft. respectively. At the Eureka-Nevada railway crossing at Palisades a 120-ft. truss span is to be erected.

West of Tonka and just east of the Tonka tunnel, a 120-ft. riveted span is to be erected.

East of the Cluro tunnel there will be erected two 80-ft. girders and this structure will be on a curve.

DREDGING, HARBOR WORKS AND EXCAVATIONS

STOCKTON, San Joaquin Co., Cal.—Albert Tangermann, Stockton, at \$309 cu. yd. awarded const. contract, council to set back levees around Yosemite Lake, involve, approx. 40,000 cu. yds. cut.

SUTTER CITY, Sutter Co., Cal.—Until April 27, 11 a. m., bids will be rec. by State Reclamation Board, F. R. Pierce, assistant secy., 835 Forum Bldg., Sacramento, to const. timber weir, 98-ft. long by 12 1/2 ft. high in borrow pit of east levee of the Sutter By-Pass, 4 mi. south of Sutter City in Sutter county. Spec. obtainable from State Reclamation Board.

PEARL HARBOR, T. H.—Until April 29, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 506, for conc. pavement and runway f. o. b. Sealock Hangar at Ford Island, Naval Operating Base, (air station), Pearl Harbor. Work consists of cutting and grading of the shore portion of the site, the filling and rapping of the Sealock Hangar at Ford Island, the performance of certain work in taking care of existing services, placing of conc. paving to be cast in place and placing precast conc. slabs under water. See call for bids under official proposal section in this issue.

IRRIGATION PROJECTS

VISTA, Cal.—Until 1 p. m., April 22, bids will be rec. by Vista Irrig. Dist. Vista, for following work:

Excav. and backfill approx. 475,000 ft. trench for conc. and steel pipe ranging from 4-in. to 36-in. diam. for distrib. sys. Plans and spec. may be obtained fr. m. the secy. upon payment of \$20.

Blanking and lay approx. 30,000 ft. conc. pipe ranging from 8-in. to 36-in. diam. for the distrib. sys. Plans and

Carbide Flare Lights
OxyAcetylene Equipment
Goggles—Respirators
First Aid Supplies

Carried in stock

E. D. BULLARD

555 HOWARD STREET

San Francisco, Calif.

Douglas 6320

spec. may be obtained from the secy. upon payment of \$20.
 Constr. of approx. 167,000 ft. wrapped riv. steel pipe and fittings ranging from 4-in. to 18-in. diam. for distrib. system.

Ce. check or bond 10% in ea. case required. J. N. Hesley, secy. K. Q. Volk, chief engineer.

TRACY, San Joaquin Co., Cal.—Until April 23, 8 p. m., bids will be rec. by W. Schlossman, secy. Banta-Carbona Irrigation District, to const. conc. road crossings, railroad crossings and checks and turnouts in principal lateral system and Lift Canal system. Bids are wanted on the following items: (1) excavation for structures; (2) back filling; (3) reinforcing steel in place; (4) conc. in place; (5) 24-in. stand. conc. pipe; (6) 24-in. thick conc. pipe; (7) 30-in. stand. conc. pipe; (8) 30-in. 6-in. thick conc. pipe; (9) gates and lifting device. Cement will be furnished by district. Cert. check 10% payable to dist. reg. Plans obtainable from W. D. Harrington, dist. eng., for sum of \$5.

VISTA, Cal.—Kenneth S. Littlejohn Co., 626 S. Spring St., Los Angeles, sub. low bid to Vista Irrig. Dist., at \$26,602 for const. three tunnels for new irrig. and distrib. sys. The tunnels are: No. 1, 204 ft.; No. 2, 1340 ft. and No. 3, 530 ft. Johnson Contr. Co., bid \$29,067.80 and Cook & Henno, \$29,191.

David H. Ryan Co., San Diego, and Henry G. Fenton Co., San Diego apparently sub. low bids for const. of approx. 35,500 ft. Gunite bench flume, incl. approx. 43,000 yds. excav. for flume and siphons. No total could be reported at this time.

Western Pipe & Steel Co., 5717 Santa Fe Ave., low at \$101,608.26 for approx. 18,700 ft. 36-in. riv. steel pipe for siphons on main line. Lacy Mfg. Co. next low at \$104,747.63.

Western Pipe & Steel Co. low at \$75,045.63 on 28-in. riv. steel pipe (approx. 18,700 ft.) under same spec. Steel Tank & Pipe Co. next low at \$75,376.20.

Elliott & McKenna, care Santa Fe Ranch, sub. low bid at \$50,000 for const. and laying of 42-in. conc. pipe under schedule "A". Escondido Cem. Products Co. next low at \$59,854.49. Escondido Cem. Products Co. low at \$71,998.49 for schedule "B" under same spec.

LIGHTING SYSTEMS

LONG BEACH, Cal.—Until 9:30 a. m. April 14, bids will be rec. for ornam. lights in Anaheim St., bet. Daisy Ave. and e. high-of-way of L. A. county flood control channel; 1911 act. H. C. Waughon, city clerk.

SAN FRANCISCO—Anderson & Ringrose, 320 Market St., at \$247,632 awarded contract by Bd. Pub. Wks. for general construction of Le Conte School. Other contracts let are: Mechanical Equipment, Wm. J. Bays, 3921 Grove St., Piedmont, Calif., \$16,043; plumbing, A. Lettich, 365 Fell St., \$13,043; electric work, Standley Electric Constr. Co., 80 Natoma St., \$879.

LOS ANGELES, Cal.—Bd. Pub. Wks. authorizes ornam. lights under 1911 act in Martel Ave. and Vista St., bet. Normandie St. and Melrose Ave.; Curson Ave., bet. Melrose and Rosewood Aves.; Ogden Dr. and Genesee St., bet. Wiloughby and Melrose Aves.; Stanley Ave. bet. Melrose and Rosewood Aves.; all concrete posts.

SAN DIEGO, Cal.—Until 10:30 a. m. April 20, bids will be rec. by city for ornam. lights in 6th St., bet. B and F Sts., 32 ornam. c. posts; 1911 act. A. H. Wright, city clerk. F. A. Rhodes, city engineer.

LOS ANGELES, Cal.—Council declares intent to install ornam. lights under 1911 act in: Main St., bet. Florence and Manchester Aves.; pressed steel posts; Ogden Dr. and Genesee St., bet. Wiloughby and Melrose Aves.; conc. posts; 6th St., bet. Normandie and Western Aves.; conc. posts; Hillhurst Ave., bet. Los Feliz and Hollywood Blvd., conc. posts; 53rd St., bet. Normandie and Western Aves.; conc. posts; Stanley Ave., bet. Melrose and Rosewood Aves.; conc. posts.

SACRAMENTO, Cal.—Council, H. G. Denton, clerk, declares intent to install electric roller system in portions of 16th St., etc., known as Electroliter District No. 16. Protests April 23.

WHITTIER, Cal.—K. D. Miller, Whittier, awarded cont. by city at \$2915 for ornam. lights in Comstock Ave., bet. Philadelphia and College Sts.

LOS ANGELES, Cal.—J. C. Rendler, Inc., 625 S. Main St., awarded cont. by bd. pub. wks. April 6 at \$55,555 for ornam. lights in Alvarado St., betw. Glendale Blvd. and 6th St.

FRESNO, Fresno Co., Cal.—Until April 23, 10 a. m., bids will be rec. by H. S. Foster, city clerk, to install electroliters in Dudley Ave., bet. Echo and Fortcamp Sts.; Res. of Inten. 32-D. Cert. check 10% payable to city reg. Spec. on file in office of clerk. Wm. Stranahan, city eng.

LOS ANGELES, Cal.—Elec. Lighting Supply Co., 214 W. 3rd St., sub. low bid to bd. pub. wks. at \$1790 for ornam. lights in Harcourt Ave., bet. 5th and Pico Sts.

MACHINERY & EQUIPMENT

SANTA ROSA, Sonoma Co., Cal.—Irey & Horton, Ltd., bidding \$2500 each, awarded sub. of two 3-wheel gasoline road rollers no longer required for county use.

YREKA, Siskiyou Co., Cal.—Following equipment in storage at Maintenance Yard of California State Highway Commission at Yreka, is being advertised for sale: 1 Mogul tractor, 12-13 hp., 2 wagons, Arm. Escort; 6 Western dump carts; 1 wagon, heavy platform springs, no body; 4 Fresno scrapers; 40 steel wheel barrows; 100 feet rubber hose, assorted sizes and lengths; 35 shovels, used; assorted lot of white enamel dishes.

LOS ANGELES, Cal.—Until 3 p. m. April 10, bids will be rec. by L. A. pub. serv. comm., 207 S. Broadway, for 4 wheel roller trailers; spec. P-560-475.

Bids, same date, for portable conc. mixer. Spec. P-350-476. Jas. P. Vroman, secretary.

SACRAMENTO, Cal.—Until April 9, 9:15 p. m., bids will be rec. by H. G. Denton, city clerk, to fur. and del. one 1924 used motor truck with side screen hood and cab installed, cost not to exceed \$1000. Further information obtainable from clerk.

LOS ANGELES, Cal.—Bids rec. by bd. pub. wks. for two tandem motor rollers were: C. W. Powell, \$3170, with allowance for two used rollers, \$2400, making net price \$5770; Austin Western Rd. Mch'y. Co., \$5400, allowance, \$400, net price, \$5000. The Contractors' Equip. Co., Inc., \$9000, \$1000 allowance, net price \$5000.

SAN DIEGO, Cal.—Until 11 a. m. April 13, bids will be rec. by city pub. dept., for one portable air compressor; spec. on file at office of W. H. Cameron, city purch. agent. Cert. check 5%.

RAILROADS

BRAWLEY, Cal.—Santa Fe Ry. plans line through Imperial Valley, bet. San Diego and Parker, Ariz.

SAN FRANCISCO—Eaton and Smith, 715 Ocean Ave. at \$101,853.19 submits low bid to Board of Public Works to construct Ocean View Extension to Municipal Railway. Other bids were: A. W. Gorrill \$113,946.72
 A. J. Grier 115,573.50
 Schultz Cons. Co. 119,135.30
 Robt. W. Jamison 124,081.23

FIRE ALARM SYSTEMS

EL CERRITO, Contra Costa Co., Cal.—Election will be called at once to vote bonds of \$12,000 to install signal fire alarm system.

FIRE EQUIPMENT

EL CERRITO, Contra Costa Co., Cal.—Election will be held shortly to vote bonds of \$13,500 to finance purchase of motor fire truck.

LA GRANDE, Ore.—Election will be held June 3 to vote bonds of \$45,000 to finance purchase of additional fire apparatus.

RESERVOIRS & DAMS

PHOENIX, Ariz.—Proposed Coolidge dam on the Gila river near San Carlos, Ariz., for which \$50,000 has been appropriated for initial survey, will be approximately 200 ft. high, impounding 1,000,000 ac. ft., for the irrigation of Pima Indian lands and other public and private lands. The bill signed June 6, 1924, provides \$5,500,000 for the work.

ARCHITECT URGES HIS FELLOW WORKERS TO BE CREATIVE

"Modern architecture should represent new creative instinct, a fresh inspiration, and should be symbolic of our age and not a copy of the work of the past," Raymond Hood, one of America's most talented architects and a leader of the so-called "younger school," told the Yale art school at New Haven, Conn.

"The buildings we design should be distinctive, embodying a style we can call our own, although good architecture

has always been modern," Hood told the students. "In every age, individuality can be remarked in some periods more than in others.

"The Renaissance work of Italy was modern in its day as was the Francis the First's work of France. The artists of these periods took their courage in both hands and added something to the world's storehouse of wisdom and art.

"America today is full of people who feel not only satisfied but take great credit to themselves if they reproduce what other ages did for them. They are parasites.

"People who copy are not playing the game squarely. We can study the work of other ages and incorporate what is good and beautiful in our own work without copying. We should take methods, not details, from the old masters.

"What we should ask ourselves is what will our grandsons think of our civilization, of what we have done. Are we adding to what exists for them to study or have we merely warmed over to our own needs the work of others? It is time to take stock and face the truth.

"It is up to the architects of our day to build something new that will stand as a monument to our epoch. Architecture should be fully representative of its own age."

BAD DRIVING MAIN CAUSE FOR HIGHWAY ACCIDENTS

Statistics of highway accidents involving motor vehicles, which seem to point clearly to congestion of traffic as the principal cause, have recently been compiled from newspaper reports of accidents in the States of Montana, Oregon and Washington by the Bureau of Public Roads of the United States Department of Agriculture. The bureau's study shows that Montana with the lowest registration has the smallest number of accidents per 1,000 cars, while Washington with the largest registration has the most accidents per 1,000 cars. This does not agree with national estimates which indicate that the rate of accidents decreases with increased numbers.

During a period of eight months newspaper reports of 1,666 accidents in the three States mentioned were secured, and from the accounts given the causes of accidents classified as follows: Faulty operation by driver, 1026; faults of others than drivers, 191; faulty equipment, 181; faulty highway conditions, 214.

The detailed statement of the causes of accident shows that 711, or more than 40 per cent of the total, were caused by reckless or careless driving.

Of the 214 accidents caused by faulty highway conditions, 19 were caused by narrow roadways and 150 by skiddy surfaces.

EASTERN ENGINEER PRAISES CALIFORNIA'S HIGHWAYS

After spending several weeks motoring over California state highways, T. J. Wassser, of Newark, New Jersey, former state highway engineer of that state, expressed his appreciation of the state's road system and particularly to commend the maintenance work which had come under his observation.

"I had no conception of California's highway problems," said Wassser, "until I spent sometime in Southern California and then motored northward to Sacramento. Maintenance methods and requirements necessary in one part of the state must be changed altogether in some other section, but, despite this fact, your state highways are uniformly well maintained and a credit to those in charge. Thorough maintenance is worth every cent it costs.

"California and North Carolina, in the opinion of Eastern engineers, are the two outstanding states of the Union in highway building.

"The excellence of the pavements placed in these two states in the last few years cannot be questioned. Your reconstruction methods, too, are interesting as well as thoroughly practical. I was especially interested in the use you make of asphalt for widening and thickening some of your concrete highways.

"In New Jersey, we have been building highways twenty feet wide for a number of years but we have not the great mileage of roads you have in California. The extensiveness of your system is one of the marvelous things about it.

"You have laid the foundation for a great highway system, and I can see no reason why a gasoline tax to complete it is not equitable. It is the only way you can get anything out of folks like me who come here to enjoy the matchless scenery and other attractions of your beautiful state. I have discussed this question with other out of state visitors and I find them perfectly willing to contribute the small gasoline tax you are proposing.

"In New Jersey, by means of a heavy license fee, a tax motorists many times what you do in California."

From Sacramento, Wassser plans to return to San Francisco for a motor trip over the Redwood Highway as far north as Eureka. Having visited other sections, State Highway Engineer R. M. Morton suggested a trip through the Redwoods, if Wassser desired to study difficult maintenance problems. In this section, the commission is now expending \$100,000 for removal of slides caused by the heavy rains of the past winter.

OAKLAND BUILDING IN THREE MONTHS TOTAL \$9,525,066

The building permits issued in Oakland during the first quarter of 1925 exceeded the total for the same period in 1924 by \$2,358,914, according to figures compiled by Building Inspector A. S. Holmes. The total permits issued for the first three months of 1925 aggregated \$9,525,066.

OAKLAND FIRM BUYS YOSEMITE PORTLAND CEMENT STOCK

The launching of the Yosemite Portland Cement Corporation has been attended with success, according to Geo. D. Roberts & Co., of San Francisco, who underwrote the issue. It is now announced that a block of the issue has been acquired by M. A. Debeau & Co., of Oakland. The offering consists of \$1,500,000 of 8 per cent cumulative participating common stock which has a first lien on the properties, plant, and all other assets of the corporation.

The company was organized by industrial leaders of the San Joaquin valley, among whom are A. Emory Wishon, president, who is known in the valley as vice president and general manager of the San Joaquin Light and Power Corporation.

The land acquired by the corporation consists of 1000 acres in Mariposa county. It contains all the clay deposits required in the manufacture of Portland cement. Extensive field examinations have established the fact that there is sufficient high grade raw material now owned by the corporation to run the plant at full capacity for more than fifty years.

The other officers and directors are: W. A. Sutherland, Fresno banker, vice president; Murray Bourne, general counsel, San Joaquin Light & Power Company, secretary-treasurer; Clyde Waterman, president Commercial Securities Corporation, Cons., and John B. Oleace, manager Bank of Italy, Bakersfield.

TAX RETURNS OF CONSTRUCTION SHOW WHERE DOLLARS GO

Construction is one of the key industries of this country. Its record activity in the past few years has made a large contribution to the prosperity enjoyed.

Tax returns which construction firms make to the federal government show the average distribution of each dollar which goes into building. These returns come from corporations distributed throughout the United States and engaged in every class of construction from the building of small homes to great city office buildings.

The cost of materials and wages takes 68.3 cents of each dollar received by construction firms. The next largest factor is miscellaneous expense. Salaries of officers take 4.3 cents. Profit takes 2.1 cents.

The profit shown by this analysis is not the profit on the investment. It is merely the share of each dollar that goes to profit. It does not necessarily prove that the construction business is one in which profits are below the average in other businesses. It does tend to show that the average building firm operates on a small turn-over.

It is estimated that for the year 1924 the money paid for new buildings in this country totaled about five billion dollars. An average profit of 2.1 cents for each dollar, as shown by the tax returns, would mean that builders received a profit of \$105,000,000 during the year, which broke all building records.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Manufacturers of gypsum plaster will hereafter be permitted to bid on contracts for school buildings being erected by the San Francisco Board of Education. This decision was reached at a special conference with plaster concerns. Protest was recently made by plaster firms that specifications, prepared for school buildings by City Architect John Reid Jr., prevented them from bidding for the jobs. The specifications called for lime plaster gaged with Keene cement. This would prevent the use of the gypsum material. The acoustic properties of the gypsum plaster were questioned by members of the Board of Education, and it was stated that there is little difference between the two materials.

Reports to the United States Department of Commerce at Washington from Santiago say Chile is planning to manufacture iron and steel. A company has been formed to construct a hydroelectric plant, the energy of which is to be applied in the production of iron and steel. Government attitude is favorable, and it is expected that aid will be given the enterprise. Chile is extremely rich in mineral and water resources, and local ores will be utilized. The costs that have been arrived at from estimates for making pig iron and steel would give a fair margin of profit while underselling foreign manufacturers.

Chas. De Le Master, past snark of the universe of the Order of Hoo-Hoo, the lumbermen's national fraternal organization, in a talk before the Turlock Chamber of Commerce, urged his listeners to "think, talk and live forest conservation." In 100 years from now the timber in this country will all be gone if the present rate of destruction is kept up, he said. There are now 200,000,000,000 feet of lumber on the Pacific coast and this is being used at the rate of 1,250,000,000 feet a year, Le Master declared.

Nine building trade unions in Seattle have secured the five-day week according to the American Contractor. So far as is known this is the only city in the country where the movement has made any headway this year. Earlier in the season a number of trades in some of the larger cities of the East and Middle West demanded it, but following the conference of employers in Cleveland on January 5th no concerted effort was made to secure it.

A movement is under way in the national capital to head off demands for increased wages on the part of the building trades. Local builders have been in conference to discuss ways and means of preventing additional increases, in anticipation of demands from several of the trades. Builders feel that wages in the building trades there are now, if anything, too high.

The year 1925 has started out to be the banner building year for Berkeley, despite the unusually high records of the last three years. Since the first of the year \$2,509,342 has gone into building against \$2,312,620 for the first three months of the last year. March building totaled \$1,029,452 against \$656,950 for March 1924.

Delay in commencement of construction of the Oakland estuary tube is anticipated as a result of the failure of the A. J. Crocker Co. of San Francisco, contractor, to provide the required \$1,942,000 bond. The county supervisors granted an extension of 14 days. The company was awarded the tube contract March 23 at a figure of \$3,882,927. The only other bid was that of the Healy-Thibbs Company, whose figure was approximately \$1,000,000 higher. Crocker blamed his failure to produce the bond on the inability of San Francisco bonding houses to raise the sum on such short notice. He pointed out that this is the largest bond ever required on any contract in this state.

Inaugurating a new service for the movement of cement from the new \$5,000,000 plant of the Pacific Portland Cement Company, the McCormick Steamship Company steamer, Silverado, will call at Redwood City, on San Francisco Bay, the latter part of this week to load a heavy cargo of the commodity. The Silverado will be the first deep water vessel to call at the new plant and the steamer will take a load of cement to Portland. The call of the Silverado likely will mean the establishment of a regular service for the movement of the cement from the new plant, which recently was constructed and has a production capacity of 2500 barrels of cement daily.

The Assembly has favorably considered an amendment by Senator A. R. Johnson of Pasadena, which would exempt from taxation forest timber, except merchantable timber, for a period of forty years after the time of planting or removal of the original timber for commercial purposes. The proposed amendment having already been adopted by the Upper House, the measure will now go on the ballot at the next election.

Raymond Matthews, for three years manager of the Glenn-Colusa Irrigation District, has tendered his resignation to the Board of Directors to accept a position with the Nevada Irrigation District as chief assistant engineer with headquarters at Grass Valley. The Nevada Irrigation District contemplates construction of irrigation works costing seven and one-half million dollars.

According to word from Vancouver, B. C., the Campbell River Company of White Rock is reported to have purchased outright all the holdings and equipment of the James Logging Company of Vancouver and to be negotiating for the purchase of the Empire Lumber Company on Vancouver Island. The James Logging Company deal is said to involve more than \$5,000,000.

Chairman Gary of the United States Steel Corporation denies that directors of the corporation contemplate further reductions of prices in steel products. "We are sitting perfectly quiet, steady and immovable and we are satisfied," Judge Gary declared.

Great Northern Railway has completed plans to electrify approximately 30 miles of its lines through the Cascade Mountains. The work is estimated to cost \$1,500,000.

ALONG THE LINE

Co-ordination of the development of the water resources of California for public protection is the aim of a bill appropriating \$200,000 and providing for a water survey of the state passed by the Senate. The bill was introduced by Senator Creighton of Bakersfield and has the backing of the California Development Association, chambers of commerce and other bodies throughout the state. The investigation provided for in the act is to be carried on under the direction of W. F. McClure, state engineer, and a report is to be submitted to the Legislature when the work is completed.

The James Allen Engineering Company has been incorporated at Olympia, Wash. The new firm, headed by James Allen, former Washington state highway engineer, will engage in highway construction work and other contracting. Associated with Engineer Allen is William Yeager Jr., former Thurston county engineer and district engineer for the state of Washington. In the Olympic peninsula area, Hugh Govan of Port Angeles is also a member of the new firm, which will have its headquarters at Olympia.

A total of 503.38 miles of county roads are being maintained by the San Joaquin County Highway Department, according to a report submitted to the supervisors by F. E. Quail, county surveyor. The total mileage is divided into 359.79 miles of oiled macadam; 124.88 miles of water-bonded macadam and 18.71 asphaltic roadway. The total cost of maintenance was \$237,495.67, with an additional \$131,564.60 for reconstruction and betterment.

The Assembly has voted approval of a new general law providing for licensing of engineers by a board of five engineers appointed by the Governor and who have had at least twelve years' experience. A registration fee is to be charged each engineer. The measure was introduced by Assemblyman Robert B. McPherson of Vallejo and has been the subject of much debate among the engineers of California.

James A. Ligatiphe, 65, electrical engineer, former associate of Thos. A. Edison, died in Los Angeles, April 10. Death was due to pneumonia. Since 1908 he had been chief electrical engineer of the Southern California Edison Company.

The Sacramento Section of the American Association of Engineers has installed the following officers: R. E. Pierce, president; W. S. Kingsbury and J. C. Hammond, first and second vice-presidents; J. C. McCloud and H. D. Stover, executive councilmen.

Floyd Aldrich, consulting engineer, Los Angeles Cal., has been appointed Secretary of the Los Angeles section, American Society of Civil Engineers, succeeding Floyd G. Dessery, resigned.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

ORNAMENTAL IRON MEN FORM ORGANIZATION IN SOUTH

Ornamental Iron Manufacturers' Association of Southern California is the name of a new trade organization which has just been formed. It has for its objects the establishment of a code of ethics of the uplift of the business, discussion of trade problems and the creation of a more friendly spirit among those engaged in the business. Meetings will be held every two weeks.

Officers of the new association are: President, J. E. Hill of the Triangle Iron Works, Los Angeles; vice-president, G. C. Waterhouse of the Waterhouse Mfg. Co., Pasadena; secretary, A. W. Jackson of Jackson Iron Works, Los Angeles; treasurer, O. Earl Tresler of Tresler Iron Works, Los Angeles.

The board of directors consists of the president, vice-president and secretary, and the following: Phillip Friedman of Friedman Iron Works; C. R. Fleishman of A. J. Bayer Company; C. James of James Iron Works, and A. W. Kennett of City Iron Works, all of Los Angeles.

SUPPLY DEALERS PREDICT A BIG BUILDING YEAR

That builders should expect and make preparations for a big building program this year throughout northern California, was the message brought by the 25 delegates to the regular monthly meeting of the California Builders' Supply Association held at the Vendome Hotel, San Jose, April 10. W. J. Feary, president of the northern section of the association, presided.

Representatives were present at the meeting from San Francisco, Oakland, Berkeley, Richmond, Santa Rosa, Stockton, Hayward, San Leandro, San Mateo, Burlingame, Palo Alto and San Jose.

The meeting opened at noon with a luncheon, after which the delegates devoted themselves to a business session lasting throughout the afternoon.

The next meeting of the association will be held in Stockton on May 8.

GLAZIERS STRIKE IN CLEVELAND

Cleveland glaziers have been on strike since March 31 following refusal of the contractors to grant them a new wage rate of \$1.50 per hour. Some little time ago the painters and glaziers presented a demand to the painting contractors that carried a wage rate of \$1.50 and the five-day week. The painters to date have gone along under the old agreement and have not supported the glaziers in their strike.

TO BAN PLUMBER JOKES

The National Trade Extension Bureau of the plumbing and heating industries thinks it is time to stop making plumbers "the butt of superannuated jokes." It is spending \$250,000 a year "to create better public relations and higher prestige for the plumbers."

THE BUNGALOW GIRL

Hats off to the Sioux Falls Argus Leader which declares that the flapper should be called the bungalow girl, as she is shingled on top, has paint on the sides and nothing in the attic.

S. F. Builders' Exchange Wins Its Appeal on "American Plan" Decision

Associated Press dispatches dated "Washington, April 13," carry the following message:

The Sherman anti-trust law was not violated by the Builders' Exchange, the Industrial Association and others of San Francisco in the fight for the open shop, the Supreme Court decided today in reversing the lower courts.

Under today's decision the case was remanded to the California court "with instructions to dismiss."

The court held that the builders opposing the union were not guilty of restraining interstate commerce in building materials.

The permit system enforced by the builders during the controversy, under which building materials were withheld from those who did not maintain open shop, was found by the court not to have been illegal. The extent to which the federal government may intervene in an industrial strike within a state was at issue in the case.

The powers of the federal government in railroad, coal mine and other strikes affecting directly interstate commerce have been well established, but the contention in the San Francisco "open shop" contest was that it had no interstate aspect and hence was a matter for the state government alone.

San Francisco had long been known as a "union" city prior to February, 1921, when the "open shop" case had its genesis. The building industry there had particularly been dominated by labor unions, and the trouble began when members of labor unions not only refused to work alongside non-union labor, but also refused to work with union men not members of local or-

ganizations. Arbitrators in April of that year reported failure to bring the employers and employees into agreement, and the union workmen went on strike to prevent "open shops."

The employers joined issue, determined through their control over building material to gain mastery.

U. S. Entry
In May, 1923, the federal government entered the field. It contended that conditions had developed into a restraint of interstate commerce in violation of the Sherman anti-trust act. It brought suit against the Industrial Association and other commercial and industrial organizations which had been co-operating in fighting the unions.

"Restraining Trade"
The federal district court at San Francisco, while disclaiming any intention to interfere in the industrial conflict, found that there had been a restraint of interstate commerce, and enjoined those engaged in fighting for an "open shop" from placing any restrictions upon those who could purchase building materials coming into the state in interstate or foreign commerce, from interfering with the free movement of building materials, plumb-ers and other supplies produced outside California, and from attempting to prevent the shipment of such supplies into the state.

Insisting that the lower court had been in error in finding that there had been any restraint of interstate commerce, the Industrial Association and others associated in the appeal asserted that the strike had terminated before the government acted, and that the grounds of complaint urged by the government had ceased to exist.

SANTA CLARA COUNTY BUILDERS' EXCHANGE INCORPORATES

A certified copy of articles of incorporation of the Builders' Exchange of Santa Clara County has been filed with the county clerk at San Jose. The document sets out that Ray M. Dutcher, Guy M. Latta, William F. Serpa, W. M. Herman and J. C. Provenzano, all residents of San Jose, have associated themselves together for the purpose of forming a corporation under the laws of the state of California for social and benevolent purposes and not for pecuniary profit, with their principal place of business in San Jose and the term of the corporation is fifty years.

The document further narrates that their purpose is to promote harmonious and social intercourse among individuals and firms engaged in the building trades and to promote civic welfare and to do all things in pursuance thereof. The interest and right of each member is to be equal states the document.

ESSENTIAL BUT NOT NECESSARY

The following ad once appeared in the Pittsburgh papers:

WANTED — Civil Engineer for construction work in the Wheeling district. Young man preferred. Must be able to read blue prints. Write C-219 Chronicle Telegraph.

Evidently professional qualifications are high in the "Wheeling District."

S. F. LUMBER MEN TO AID IN LUMBER SALE DRIVE

Under the plan originated by Secretary Hoover to have industry help the commerce department to help industry, 50 practical lumber exporters have agreed to accept membership on the department's lumber export committee with the view to increasing the sales of American lumber abroad. Hoover has appointed three San Franciscans to the committee: A. B. Hammond of the California Redwood Association; Louis A. Ward, California White and Sugar Pine Association, and A. A. Baxter of the Douglas Fir Exploitation and Export Company.

A large share of the commerce department's success in selling American goods in foreign markets is due to the co-operation of leading exporters in different commodities, according to Julius Klein, director of the bureau of foreign and domestic commerce. There are now nearly 70 of these committees.

Working through the commodity experts of the commerce department the advice of these men is imparted to the government trade representatives in various parts of the world who, in turn, send in reports to provide American industry with information that will help in developing new markets and increasing business in those already existing.

G. G. BRIDGE WOULD BE ASSET TO ENTIRE COMMUNITY

"San Francisco is the only city of its size in the world which has but one road of ingress and egress. We who are urging the building of the bridge across the Golden Gate have been told again and again we are in advance of our times—visionaries, chasers of rainbows. We are, however, dealing with the destiny of San Francisco. We have crystallized public opinion to deal with, and when the public wants the bridge it will build it," said Supervisor R. J. Welch in addressing the highways and harbor development section of the Commonwealth Club. Welch had been asked to speak on the financial aspects of the bridge building.

"Capable engineers have acknowledged that the building of the bridge is feasible," Welch continued. "If the northern counties develop as can be expected, the responsibility of the bridge will become a fifty-fifty matter between San Francisco and those counties affected. The bridge will be an asset, not a liability. Toll charges, based on computations of present bay ferry system traffic, would be sufficient to meet interest on \$20,000,000. In regard to the building of the bridge affecting San Francisco's 15 per cent bonding ability, I should say it has nothing to do with it any more than state matters have. With the establishment of a bridge district San Francisco merely becomes a bondholder in an entirely separate undertaking, carrying with it but a stockholder's share of the burden. The bridge will link San Francisco directly on four wheels with New York City and the East, and will open up a vast empire to the north."

BETTER HOMES BLUE BOOK TO BE ISSUED AT SACRAMENTO

The Sacramento Better Homes Committee under the auspices of the Women's Bureau of the Chamber of Commerce along with their big program this year are sponsoring the printing of a Home Builders Blue Book. This book is to contain concrete information that the home builder should know. These subjects are treated in a brief and to the point manner.

Ten thousand of the books are to be distributed by the Chamber of Commerce, Building Material Exhibit and the advertisers. The cost of printing is covered by advertising. The advertisers who have a full page of advertising can have a page for editorial and can select their title from among the ones that have been named or name one of their own.

It will be an attractive book with a shade of blue with gold letters on the cover.

REDUCED STEEL LOCKER LIST NOW IN EFFECT

Action taken by a general conference of manufacturers, distributors and users of steel lockers reducing the "recognized variety" of steel lockers from 65 to 17 become effective April 1, it is announced by the Division of Simplified Practice, Department of Commerce. The application of the "recognized list" was formally endorsed by a sufficient proportion of the entire group, whose members pledged their best efforts to promote the use of these sizes and to eliminate the wastes due to any lack of standard sizes. The Superintendent of Documents, Government Printing Office, Washington, D. C., has issued the Simplified Practice Recommendations as a part of the "Elimination of Waste." The price is 5 cents.

Fire-Resistant Materials are Urged to Curb U. S. Fire Losses

The short sighted policy of exploiting the public through promotion of more home building without an adequate program of fire prevention, was severely criticized in a resolution presented at the National Conference on Home Building, held at Chicago, March 25 and 26. The resolution, one of the features of the conference, was presented by A. J. R. Curtis of the Portland Cement Association. In emphasizing the importance of the subject, Mr. Curtis called attention to the fact that the annual fire loss in the United States amounts to more than \$500,000,000 or \$4.00 per capita. This is twice the interest paid out last year on all savings bank accounts.

Resolution Offered

The resolution was presented as follows:

Whereas, the annual fire loss in the United States has reached the rate of \$16.00 per second, or \$60,000 per hour day and night, more than doubling in the past decade, bringing American losses to the total of \$4.00 per capita while those of England are 90 cents, France 49 cents and Holland 11 cents; and

Whereas, this tremendous loss in the United States has been estimated to equal the cost of a row of dwelling houses 2000 miles long; and

Whereas, there is a dwelling fire every three minutes day and night on the average; and

Whereas, the loss in human life by fire exceeds 15,000 per annum, be it hereby

Resolved, That this conference accord preference to fire-resistant methods and materials in the construction of American homes and dwellings, and be it

Further Resolved, That in recognition of the fact that approximately three-fourths of all residence fires of known origin start in basements, masonry types of construction which contain first floors with at least two hour fire rating be commended to the public for their superior fire-resistant qualities.

Fire Losses Increase

While builders and real estate men stage shows designed to increase the interest of the people in home building,

and while contractors, architects, and engineers are working to reduce the cost of homes for people of moderate means, insurance companies report an increase in losses due to fire. Much time and effort has been devoted to reducing costs of building, with the result that there is small hope for further progress in reducing costs without sacrificing some necessary elements of safety. The damage done by fire in this country is not alone a personal problem affecting the owner of a burned building. It concerns the entire country in the destruction and loss of natural resources that go up in smoke, and in the waste of capital. Added to this is the sacrifice of human lives; 15,000 people being killed last year by fires.

The recent hotel fire at West Palm Beach, Fla., in which the Breakers hotel was destroyed with a loss of \$4,000,000 is a case in point. But while this particular fire was given wide publicity, it is an insignificant part of our yearly fire loss. On the average there is a farm building fire every seven minutes. There is an average of fifteen hotel fires, five school house fires, and five church fires every day in the year.

Permanent Materials Urged

The remedy for this condition, as pointed out by the resolution is a more widespread use of permanent building materials. Selection of the material will depend, of course, upon the type of house wanted. Approximately three-fourths of all residence fires of known origin start in basements. Masonry types of construction containing first floors with at least a two-hour fire rating are therefore recommended by the resolution. For wall construction, engineering tests have proved that Sacco-on-concrete masonry is permanent and firesafe. Concrete block, brick and tile are standardized as to size and shape so that they can be used in any type or size building. Standard practices also have been adopted for the application of portland cement stucco, a material which is adapted to a wide variety of finishes and colors and can therefore be used with all architectural types or motifs.

Building Costs Show Decline in March

Lower prices of structural materials are reflected in the monthly construction cost index number for the United States. Engineering News-Record reports. The number is 209.55, which compares with 210.20 on March 5 and 221.60 a year ago. In the construction industry there have been comparatively few wage revisions for common labor, the average rate for the month being 34½ cents an hour, for the entire country, corresponding with the February average.

Materials Used

Actual quantities of materials used in March showed no change from the total for the corresponding period in the peak year 1924. In money value, however, the total was 5 per cent under that of March a year ago. The moderate drop in construction costs was brought about by lower prices for lime, brick, lumber, cast-iron and sewer pipe, steel sheets and lined oil. Firm prices prevailed for stone paving materials, asphalt, tie rivets, nails and rope.

Construction activity was greater than a month ago, or one year ago, in New England and the states immediately west of the Mississippi. Substantial gains over February were reported in the Middle West. Construction in the Far West was slightly greater in vol-

ume than a year ago. Construction of sewers and industrial and commercial buildings was not only heavier, but also showed a substantial gain over March, 1924. Compared with a month ago, and one year ago, current lettings show a slight drop in bridge undertakings, excavations, dredging, drainage and irrigation projects, and federal government work.

Contract Values

The value of contracts let in the past month in the United States and Canada for bridges, sewers, waterworks, excavation and dredging, streets and roads, industrial and commercial buildings, federal government work and various unclassified building projects reached the total of \$159,470,000, as against \$143,275,000 in February and \$170,312,000 in March a year ago. Contracts let in March in New England were valued at \$19,160,000; Middle Atlantic states at \$15,839,000; Southern states at \$13,381,000; Middle West, \$25,675,000; West of Mississippi, \$24,153,000; Far West \$18,675,000; Canada, \$2,559,000. Contracts included in the totals do not cover any lettings under \$15,000 for waterworks or excavations; \$25,000 for other public works, \$10,000 for industrial and \$150,000 for commercial buildings.

STATE RAILROAD COMMISSION ORDERS LUMBER RATES CUT

Effecting an approximate annual saving of more than \$400,000 to lumber consumers and shippers of Central and Southern California, the State Railroad Commission yesterday ordered substantial reductions in the railroad rates on lumber, box shooks and lumber by-products. The territory affected reaches from south of San Francisco bay region to the Arizona state line.

The decision was the result of protests on railroad rates made by the Los Angeles Lumber Products Company, which cuts its trees in British Columbia and ships the lumber to San Pedro, and alleges that the prevailing rail rates were excessive and discriminatory and prevented free entry into the consuming markets.

Lumber interests with mills at Madera, Pinedale and Merced Falls filed similar complaints with the commission.

The hearing was held jointly before the state board and the United States Interstate Commerce Commission, as some of the rates applied to lumber carried from Oregon and Washington to California.

There is no percentage reduction in the new rates announced by the California commission, but they are substantial enough to permit the San Pedro mills to compete with other state shipping points on an equal basis, it was said.

The decision of the Interstate Commerce Commission on the same matter is expected to be announced from Washington shortly.

OREGON PUMICE TO BE SHIPPED SOUTH FOR BRICKS

Vast quantities of pumice north of Kirkford, Ore., and adjacent to the Southern Pacific line extension north of Kirkford, will soon be shipped south for manufacture into bricks, according to word from Klamath Falls. Determination of the firm of Agard & Turner of Berkeley, Calif., to tap the source of pumice for building material is evident, reportedly, from their successful effort to secure a commodity rate from the Southern Pacific Railroad. Last November, W. A. T. Agard shipped one carload of the pumice to Chicago, where it was to be tested as to its value for bricks. That the test was successful is evident from the petition of the firm for a commodity rate.

THEATRE CURTAIN PATENT IS GRANTED WESTERN STUDIO

L. A. Abrott, general manager of the Western Scenic Studio, 1527 Jackson street, Oakland, announces having been granted a patent on a theatre curtain operated with Abrott's Improved Slote Box, permitting easy and smooth operation. It is said to be the only two channel Slote built and the two operating lines are enclosed eliminating the possibility of dangling unsightly ropes to become entangled. The Western Scenic Studio manufactures and markets the product, in addition to stage scenery, canopies, draperies, interior decorations, artistic floats, etc.

NEW CATALOGUE

The Butte Electric & Manufacturing Company, 956 Folsom street, San Francisco, has issued a twelve-page illustrated catalogue describing products handled by that concern. Most of the equipment is of a special nature and covers "Schockpruff" panel and switchboards, relays, remote control switches, watertight floor receptacles, power wall receptacles, special equipment for fire alarm systems, electrical specialties and theatre equipment.

TRADE NOTES

The United States Gypsum Company will enlarge its plaster and sheet rock plant at Sweetwater, Tex., this spring, the second time since it went into operation last May. In February, new equipment was installed which increased daily output of fireproof wall-board 50 per cent. The new improvement, which will be started at once, will add 100 per cent more. With purchase in January of 275 acres of mineral bearing land adjoining the company's other property, these expansions will increase the company's investment in Texas by several hundred thousand dollars.

Plant, equipment and good will of the Washington Building Products Company, 6551 East Marginal Way, Seattle, Wash., has been taken over by the Schumacher Wall Board Corp., with offices in several Pacific Coast cities. The factory site covers four acres with a floor space of more than 50,000 square feet. Plant expansion is contemplated. In addition to manufacturing Schumacher wall board, the new owners will also manufacture Washington plaster wall board.

Atlas Rock Co., of Oakdale, is operating at full capacity, having secured a contract from H. Peterson, highway contractor, of San Diego, to furnish 500 carloads of sand and gravel for six and one-half miles of state highway in Merced county. The present capacity of the plant runs between fifteen and twenty cars a day.

McLaughlin Sheet Metal Works of Sacramento is having plans prepared for a new plant to be erected in that city. The structure will be one and one-half stories in height, covering an area of 80 by 160 feet and will cost between \$25,000 and \$30,000. It will be of brick construction.

Edward Hebern, 60, president of the Hebern Electric Code Company, Oakland, will meet the stockholders of the company April 17 and attempt to adjust their complaints that he sold them stock at more than the listed value. Hebern is accused by the state corporation commissioner of selling stock in excess of his permits.

The Sterling Foster Company of San Francisco has been incorporated with a capital stock of \$10,000 and will engage in the building construction business. Directors are Sterling Foster, George Wagner and E. H. Edwards, all of San Francisco.

Pacific Lime & Plaster Company will commence operations on the May quarry near Columbia within the next week, taking out a high grade of limestone reported to contain approximately 40 per cent magnesia. The rock will be sent to Sonora for treatment.

Carmel Thermotite, Inc., a concern organized to manufacture thermotite units as building material has filed articles of incorporation at Salinas. The company is capitalized at \$25,000. Directors are: Albert Otey, Emma Otey and Ella Maughn.

A. F. Jackson and J. Luchesi will operate in San Francisco under the firm name of Sunset Grading Company.

Savage & Sons, plumbers of Reno, Nevada, took first prize in the national competition for window displays sponsored by the National Plumbers' Association. Three prizes were offered by Proctor & Gamble, manufacturers of Cincinnati, for the most attractive plumbers' window displays throughout the country and the awards were determined upon photographs of the displays. A bathroom scene in the Savage window brought first prize, a check for \$25.00.

Sun Portland Cement Company, 802 Wilcox Bldg., Portland, Ore., announces its plant is turning out two colors of cement, light and dark. The dark cement is reported to be particularly good for paving and sidewalk, the light being especially suitable for stucco work and general construction purposes. The company is reported to be the only manufacturers on the Pacific Coast turning out two colors of cement of the same quality.

The Standard Gypsum Company of California has leased a suite of offices in the Alaska Bldg., Seattle, these quarters to be used in connection with the operation of the company's \$300,000 plant to be erected on property leased immediately south of the Harbor Island plant of the Todd Drydock Company, Seattle.

Thos. F. Smith and John E. McEnhill have formed a partnership and will operate under the trade name of Pacific Plumbing & Heating Company with offices and shop at 924 Folsom St., San Francisco.

The Porterville Lime Rock Co., with principal place of business in San Francisco, has been incorporated with a capital stock of \$10,000. Incorporators are M. Martinson, W. H. Knight and W. A. Powell.

City Sash & Door Co., capitalized at \$50,000, has been incorporated in San Francisco with the following directors: H. S. Thomson, M. R. Carey and Ralph Crothers.

Coast Hardware Company of San Francisco has been incorporated. The concern is capitalized at \$50,000 and has the following directors: H. C. Seibel, M. F. Griffin and Leslie Collins.

Crowe Glass Company of San Francisco has been incorporated with a capital stock of \$100,000. Directors of the company are: Eugene Palmuth, G. E. Bridge and P. C. Jones.

The Aetna Hardwood Floor Company, formerly located at 1232 California St., has moved to larger quarters at 150 Franklin street, San Francisco.

The Sheet Metal Shop formerly located at 498 Sixth street has moved to larger quarters at 511 Sixth street, San Francisco.

A. M. Lynes will operate under the firm name of Producers' Marble Company with offices at 1104 Hobart Bldg., San Francisco.

Frank E. Carlson will operate from 1950 McAllister Street, San Francisco, under the trade name of Star Roofing Company.

APARTMENTS

SEATTLE, Wash. — Western Construction Co., Seaboard Bldg., at \$100,000 awarded contract to erect 5-story apartment at Eastlake Ave. and Republican St.; will contain 44 two and three room apts. John A. Creutzler, architect, Leary Bldg., Seattle.

To be Done by Day's Work.

APARTMENTS Cost, \$18,000
SAN FRANCISCO. NE Fulton and
Pierce Sts.

Three-story and basement frame (12)
apartments.
Owner—C. Rapp, 825 Monadnock Bldg.,
San Francisco.

Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.

To be Done by Day's Work.

APARTMENTS Cost, \$30,000
SAN FRANCISCO. SE Filbert and
Franklin Streets.

Three-story and basement frame (27)
apartments.

Owner—C. A. Metcalfe, 311 Turk St.,
San Francisco.

Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.

Contract Awarded.

APT. HOUSE Cost, \$150,000
SAN FRANCISCO. S Post 137 West
Leavenworth.

Six-story and basement class C apart-
ment house, containing 53 apts.
Owner—Post & Leavenworth Realty
Co.

Architect—Sylvain Schnaittacher, 233
Post St., San Francisco.

Contractor—G. P. W. Jensen, 320 Mar-
ket St., San Francisco.

Plans Completed.

APARTMENTS Cost, \$16,000
SAN FRANCISCO. S Geary St. at
Parker Ave.

Three-story frame and stucco apart-
ment house containing four 3-room
apts. Tile roof.

Owner—W. M. E. Farnsworth.
Architect—Edward A. Eames, 357 Sac-
ramento St., San Francisco.

Bids are in. Contract will be awarded
in a few days.

Contract To Be Awarded.

APARTMENTS Cost, \$16,000
SAN FRANCISCO. S Geary St. at Par-
ker Ave.

Three-story frame and stucco apart-
ment house containing four 3-room
apts., tile roof.

Owner—W. M. E. Farnsworth.
Architect—Edward A. Eames, 357 Sac-
ramento St., San Francisco.

Contract will be awarded to Cox
Eros, 1309 9th Ave., San Francisco.

Contract Awarded.

APARTMENTS Cost, \$12,500
OAKLAND. Alameda Co., Cal. 6006
Genoa St.

Two-story 12-room apartments and ga-
rage.

Owner—M. Laclanstra, 1636 Franklin
St., Oakland.

Architect—None.

Contractor—California Builders Inc.,
1636 Franklin St., Oakland.

Completing Plans.

STORES & APTS. Cost, \$20,000
SAN FRANCISCO. Eighteenth and
Guerrero Sts.

Two-story frame and stucco store and
apartment building (6 stores and
4 3-room apts.)

Owner—Withheld.

Architect—R. R. Irvine, Call Bldg., San
Francisco.

Plans will be ready for figures in
about a week.

Sub-Bids Being Taken on All Portions
of the Work.

APARTMENTS Approx. \$1,000,000
SAN FRANCISCO. NE Cor. Sacramento
and Mason Streets.

br. and plas. facing, comp. rfg., steel
sash, plate glass, steam hgt. sys., incin-
erator, vacuum cys. sys., aut. refriger. sys.
2 elev. elevators, ornam. iron, tiled
baths and drainbds, pine and hwdw.
trim, tile and hwdw. flrs., marble wk.,
wall beds; \$100,000.

BONDS

EUREKA Humboldt Co., Cal.—Elec-
tion will be held May 4 in Field School
District to vote bonds of \$10,000 to
finance erection of new school. A.
Sappingfield, W. S. Attwell and W. C.
Rhodes are trustees of the district.

AUBURN Placer Co., Cal.—Super-
visors sell \$12,000 bond issue of Ophir
School District; proceeds of sale to
finance erection of new school.

VASCO Kern Co., Cal.—Election will
be held April 25 to vote bonds of \$15,-
000 to finance additions to grammar
school.

BERKELEY Alameda Co., Cal.—
Special tax will be voted May 5 for
\$120,000 to finance construction of new
High School. E. M. Hann, city clerk.

YUBA CITY, Sutter Co., Cal.—Elec-
tion will be held shortly to vote bonds
of \$30,000 to finance construction of
gymnasium annex to high school.

SANTA CRUZ, Santa Cruz Co., Cal.—
Until April 23 bids will be received by
Supervisors for purchase of \$20,000
bond issue of Pacific School District;
proceeds of sale to finance erection of
new school.

MERCED, Merced Co., Cal.—Election
will be held April 30 to vote special
tax of \$21,000 to finance 3-room addi-
tion to Muir school and painting of
manual training building at K and 26th
Sts. J. A. Keck, Walter Mink, C. H.
Wright, J. W. Spagnoli, C. F. Wuer-
ter, are trustees. N. Merced Elementary
and N. School District.

SAN BERNARDINO, San Bernardino
Co., Cal.—Election will be held May 5
to vote on a \$450,000 bond issue for
a new county jail and court house.

MARTINEZ, Contra Costa Co., Cal.—Pacheco School District votes bonds of \$14,000 to finance erection of new school building.

BAKERSFIELD, Kern Co., Cal.—Election will be held May 8 in Randsburg School District to vote bonds of \$10,000 to finance erection of new school. Trustees of district are: Mrs. Anna K. Young, Mrs. Winifred E. Morgan and C. A. Skaggs.

CLEARWATER, L. A. Co., Cal.—Clearwater school district will vote again on a \$65,000 school bond issue May 12th. At election Mar. 27th bonds were rejected.

NEAR HAWTHORNE, L. A. Co., Cal.—Wisburn school district near Hawthorne, will vote on a \$55,000 school bond issue May 12th.

CHURCHES

Contract Awarded.
CHURCH Cost, \$60,000
SAN FRANCISCO, Cor. Sixteenth, Noye and Market Streets.
Frame, part concrete and brick, brick veneer church building with terra cotta tile roof.
Owner—Trinity Methodist Episcopal Church, Premises.
Architect—Wythe, Blaine & Olson, 1800 Telegraph Ave., Oakland.
Contractor—Thos. J. Cutler & Son, 1766 12th Ave., San Francisco.

Preliminary Sketches Approved—Working Drawings Being Prepared.

CHURCH Cost, \$—
BERKELEY, Alameda Co., Cal. Spruce St., bet. Cedar and Vine Sts.
Church, 100x50 feet; seating capacity 500, probably be of concrete block construction, tile roof.
Owner—3rd Church of Christ, Scientist Berkeley.
Architect—H. H. Guttererson, 526 Powell St., San Francisco.

TULARE, Tulare Co., Cal.—C. H. Smith, Tulare, at \$27,746 awarded contract to erect Catholic church. Bids do not include furnishings which will bring cost to \$35,000.

LONG BEACH, L. A. Co., Cal.—The Grace Methodist church of Long Beach will institute a campaign to raise \$200,000 with which to finance erection of church bldg. and Sunday school. Dr. R. C. Harker, pastor.

CULVER CITY, L. A. Co., Cal.—L. J. Bystow, 1915 Santa Monica Blvd., Santa Monica, has contr. for 12-rm. 2-story 50x38 ft. rectory and 6-rm. 2-story 35x42 ft. side add. to convent at Culver City, for Roman Catholic Bishop of Los Angeles and San Diego, Culver City Parish, Rev. John O'Donnell, pastor; Emmett G. Martin, 620 Citiz. Natl. Bank Bldg., Los Angeles, archit.; frame and plas., tile and iron, rfg. part basement, gas unit htg. sys., hwd. flrs, tiled baths, pine trim, mantels.

Tucker, clerk, Reese School District, to fur. materials and erect galv. iron pipe fence, 270 ft. long, 3 ft. high. Specifications obtainable from clerk. See call for bids under official proposal section in this issue.

Pratt's Concrete Mix

Clean by Sand Pratt

IN THIS age.
OF WOMAN'S equality.
WITH THE men folks.
SANDY PRATT, producer.
OF CLEAN, sharp sand.
HARD, CRUSHED rock.
AND WASHED gravel.
DESIRES TO tell father.
"HOW TO care.
FOR THE baby."
WHILE MOTHER attends clubs.
AND EVERYTHING.
FIRST, NEVER feed goat's milk.
TO THE baby.
IF YOUR darling.
IS A girl.
IT MIGHT.
MAKE HER a "social climber."
WHEN SHE grows up.
IF FATHER bathes the child.
AND BABY turns blue.
THEN THE water.
IS TOO cold.
ADD STEAM, not ice.
IF YOUR offspring.
TURNS RED or scarlet.
THE WATER is too hot.
ADD COLD water immediately.
IF MOTHER is detained.
AT THE club.
AND IT is necessary.
TO CHANGE baby's clothing.
THAT IS buttoned on
WITH SAFETY pins.
FATHER CAN tell.
IF THE safety pins

ARE FASTENED to the flesh.
FOR BABY will immediately cry.
NOW, SOME of Sandy's readers.
MAY WONDER why.
SANDY PRINTS this stuff.
BUT HOW many fathers.
COULD WALK into a hospital.
AND PASS an examination.
FOR A trained nurse.
AND NOW that the ladies.
ARE SERVING as mayors.
GOVERNORS OF States.
IN CONGRESS and elsewhere.
SOMEONE MUST start.
TO TEACH men.
TO CARE for babies.
AND SANDY PRATT.
HAS THE "sand."
TO START the movement.
SANDY OFFERS a million "rocks,"
TO BUILD a college.
TO TEACH fathers.
TO CARE for the baby.
"I THANK you."

This picture explains, in a way, Sandy's above story. Mother was detained at the club, baby is crying and father is getting nervous. Why doesn't he give the baby a sandwich or a piece of rock produced by Sandy Pratt at Marysville, Matlock, (near Polson), Sacramento, Prater (Monterey County) and San Francisco.

EUREKA. Humboldt Co., Cal.—Until May 4, 7:30 p. m. bids will be received by Geo. B. Albee, city supt. of schools, to grade high school stadium site involving 24,000 yds. earth excavation. Cert. check 5% payable to Eureka High School District req. Plans obtainable from office of Board of Education.

Official Proposals

NOTICE TO BIDDERS

(Wire Fencing—Santa Rosa)

Notice is hereby given that sealed bids will be received and opened by the Board of Education of the City of Santa Rosa School District, Sonoma County, State of California, in the present High School Annex building, Santa Rosa, at 5:00 o'clock P. M., April 27, 1925, for furnishing and building approximately 470 lineal feet of woven wire fence around the tennis courts at the Fremont School, in accordance with plans and specifications on file at the office of the Clerk of the Board of Education of the said school district, in the High School Annex building, Santa Rosa, California.

Each bid must be accompanied by a certified check on some responsible California bank in a sum of not less than five per cent (5%) of the amount bid, made payable to Sara N. Hatch, Secretary of the Board of Education of the City of Santa Rosa High School District.

The Board reserves the right to reject any or all bids.

Bids must be delivered to the undersigned secretary of the Board of Education at her office in the present High School Annex building in the said City of Santa Rosa at the time and place of meeting above stated, or at any time prior to the hour of opening said bids. (Signed) SARA N. HATCH, Secretary Board of Education, City of Santa Rosa School District.

NOTICE TO BIDDERS

(Filing Equipment—Alameda County)

Office of the Clerk of the Board of Supervisors of Alameda County, State of California.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, California, at his office until Monday, May 4th, 1925, at 11 o'clock A. M. (the day when said bids will be opened and said contract awarded) for the installation of certain equipment consisting of the metal files, shelving and grilles in the office of the County Treasurer, Hall of Records Building, Oakland, Alameda County, California.

Complete plans and specifications are on file in the office of the County Clerk, open for inspection. Copies may be obtained by applying to the Purchasing Agent of Alameda County in the Hall of Records Building, Oakland, Calif.

Each bid must be accompanied by a check for at least ten per cent of the amount of the bid or proposal, certified to by some responsible bank and made payable to GEO. E. GROSS, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the party or parties to the contract should be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

(SEAL) GEO. E. GROSS, Clerk of the Board of Supervisors of the County of Alameda.

Dated: April 6th, 1925.

NOTICE TO CONTRACTORS

(Marine Island—Painting)

The Bureau of Yards and Docks invites attention to the fact that it will open bids, in the near future, on Specification No. 5094, Painting Marine Barracks, Navy Yard (Marine Barracks), Mare Island, California. The project consists of painting exterior woodwork of the marine barracks (Building No. M-37).

In the event that this work is of interest to you, you should be awarded to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare

Island, Calif., a check or postal money order for \$5 payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the specification.

It is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

NOTICE TO CONTRACTORS

(San Francisco—Elevator—Bureau of Yards and Docks)

SEALED PROPOSALS, indorsed "Proposals for Elevator, San Francisco, Calif., Specification No. 5091," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock A. M., May 6, 1925, and then there publicly opened, for an electric passenger elevator at the Marine Corps Depot for Supplies, San Francisco, Calif., Specification No. 5091 and accompanying drawing may be obtained on application to the Bureau or to the Commandant, Twelfth Naval District, San Francisco, Calif. Deposit of a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specification. L. E. GREGORY, Chief of Bureau, April 2, 1925.

NOTICE TO CONTRACTORS

(Fencing—Reese School District)

Notice is hereby given that the trustees of the Reese School District, of County of Sacramento, State of California, will receive sealed bids for the construction of a galvanized pipe fence 270 feet long, 3 feet high; the contractor to furnish all labor and material and install said fence on the school property of said school district. Specifications of said fence may be obtained from A. H. TUCKER, Florin Cal. Sealed bids will be opened at the school house in said district at 8 p. m. on April 25, 1925.

Signed: A. H. TUCKER, Clerk of the Board of Trustees of the Reese School District of the County of Sacramento, State of California.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 215 Forum Building, Sacramento, Cal., until 2 o'clock p. m., on May 11, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Humboldt County, cleaning and painting five bridges as follows:

Bridge over South Fork of Eel River at Dyerville (I-Hum-1-C).

Bridge over Eel River about 3 miles south of Scotia (I-Hum-1-E).

Bridge over Eel River about ½ mile north of Scotia (I-Hum-1-E).

Bridge over Eel River about 1 mile north of Rio Dell (I-Hum-1-E).

Bridge over Eureka Slough at easterly city limits of Eureka (I-Hum-1-G).
El Dorado County, between Camino and two miles east of Sportsman's Hall (III-E-D-11-E & F), about five and eight-tenths (5.8) miles in length, to be graded and portions surfaced with crushed gravel or stone.

Kern County between Beardsley Canal and Lerdo (VI-Ker-4-D), about eight and two-tenths (8.2) miles in length, to be widened with Portland cement concrete shoulders and surfaced with asphalt concrete.

All bids are to be compared on the basis of the State Highway Engineer's estimate of the quantities of work to be done.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.

R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated April 13, 1925.

10-108.—Los Angeles, Calif. Individual wishing to go into touch with local leather and varnish manufacturers.

10-112.—Kansas City, Mo. Oil and refining company wishes to get in touch with local stores selling office furniture.

Interior of Grauman Metropolitan Theatre, Los Angeles. Done entirely in concrete. William Lee Woollett, Architect.

TRULY CREATIVE

AMONG advanced achievements in concrete is the interior of Grauman Metropolitan Theatre, Los Angeles.

From lobby to proscenium the conception has been executed in the same basic material used to insure structural soundness and economy.

Especially worthy of note are the rough, form-marked walls with murals painted on them, the great open trusses and massive beams, the decorated columns and the symbolic statuary—all of concrete.

The result is a daring creation indicating possibilities through the medium of concrete undreamed of a few short years ago. And it may well be that this truly creative work will serve as an inspiration for other individual achievements destined, perhaps, to herald a new era in architecture.

* * *

Competently supervised, modern workmen can produce concrete in any form, texture or color the architect may direct. If you are interested, we shall be most happy to send further information. Simply address the nearest office listed below.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

BUSINESS OUTLOOK FOR ROCK PRODUCTS COMPANY FAVORABLE

C. E. Clough, president of the Rock Products Company, operating a plant at Emeryville, Calif., at the annual meeting of stockholders of the company in Reno, Nevada, April 8, reported completion of the sale of \$50,000 worth of the company's preferred stock recently offered.

W. J. Walmsley, general manager, recently returned from an extensive trip in Northern and Southern California reported a bright outlook for 1925 business.

"Prospective installation amount to a very large volume of business," Walmsley reported. "For Nevada, we have in view prospective contracts for nearly 90,000 square feet of flooring, for northern California, nearly 150,000 square feet, and for southern California about 370,000 square feet."

SAVING OLD MATERIAL REDUCES RAILROAD COSTS

Manufacturing scraping knives from old shovels, conduit from discarded boiler tubes, wrapping twine from rope scrap, drawn bars from steel axles, and chisels from worn out files, are a few of the many ways in which the Southern Pacific Company saves hundreds of thousands of dollars annually by salvaging obsolete and scrap materials and supplies.

In announcing this, A. S. McKelligon, general storekeeper for the company, stated that rigid economy is practiced by the railroad in salvaging used materials.

Various machines and devices, themselves constructed of salvaged material, have been invented by the company's employees to reclaim supplies which otherwise would be thrown away as useless.

Following are some of the articles manufactured from scrap:

Car lining paper from heavy wrapping paper; pipe clamps from sheet metal, torpedo cases from car roofing, velocipede handles from old steel, gaskets from lead, packing hooks from coil springs, water glass holders from galvanized iron, pin trays from type-writer metal covers, indicator numbers from car roofing, whistle nipples from axle steel, flange oilers from old brass, center punches from tool steel, stove pipe from sheet iron and locomotive pilots from boiler tubes.

STATE WATER PLAN WOULD REQUIRE REBUILDING OF COLGATE POWER PLANT

Rebuilding of the Colgate power plant of the Pacific Gas & Electric Company would have to be undertaken if the proposed water storage dam on the Yuba River, under study as part of the state-wide survey of water resources on which Paul Bailey, engineer in charge, has just reported to the state legislature, is ever constructed.

Discussing the Yuba River unit, which would be part of the plan to include the Kennett, Oroville and American River reservoirs in the Sacramento Valley storage system, Bailey says in his report:

"The Yuba River is the fourth most important tributary of the Sacramento system. Its mean seasonal run-off is 2,650,000 acre-feet. The only dam site below the junction of the forks is at the Narrows, near the town of Smartsville.

"Information on the dam site was obtained from borings made by the California Debris Commission and the Yuba River Power Company. A survey of the reservoir has not been made. Preliminary estimates of the cost have been made as follows:

"Preliminary Cost Estimate of Narrows Reservoir on Yuba River.

Height	Total	Capacity	Cost per
5 feet	cost of	in acre-	acre-
freeb'd	reservoir	foot	foot
350	\$16,750,000	247,000	\$68.00
400	20,500,000	353,000	\$58.00

"The lands flooded in this reservoir site are of little value, and the only improvement of importance is the Colgate power plant of the Pacific Gas & Electric Company, a 15,575 k.v.a. installation. This plant would have to be rebuilt at a higher elevation, with a consequent loss of power."

HALF MILLION DOLLARS FOR FOREST HIGHWAYS

Highway projects costing approximately half a million dollars will be undertaken in California during the fiscal year 1926 by the United States Forest Service, according to information furnished the good roads bureau of the California State Automobile Association by Paul G. Redington, district forester. Most of this work will involve the continuation and extension of projects already under way.

This work will be made possible as the result of the Federal aid authorizations made by the recent Congress which authorized appropriations of \$7,500,000 for forest roads and trails for each of the fiscal years 1925 and 1926, according to A. E. Loder, manager of the Automobile Association's good roads bureau. It is expected that the money will be made available by the end of the present calendar year and that contracts will be let early in 1926.

Of the total authorization of \$7,500,000 made by Congress for the fiscal year 1926, Loder said that \$4,500,000 would be used for forest highway projects and the balance for other purposes including forest development roads. California's total appropriation for forest highways amounts to \$683,034.

MANUFACTURING IN CALIFORNIA SHOWS INCREASE

The Department of Commerce announces that, according to a summarization of the data collected at the biennial census of manufacturers 1923, the value of products (at factory prices) of manufacturing establishments in California aggregated \$2,216,639,000. This aggregate represents an increase of 26 per cent as compared with \$1,758,682,000 in 1921.

Those figures relate to manufacturing establishments whose output during the year was valued at \$5000 or more. The elimination of data for the smaller establishments has only a slight effect on the totals.

In making use of the statistics for value of products, it must be remembered that, because of the fact that the products of many manufacturing establishments are used as materials by other establishments, the aggregate value of the products of all manufacturing industries combined is considerably in excess of the total value of finished manufactured products in the form in which they reach the ultimate consumer.

The average number of wage earners employed during 1923, 246,975, exceeded by 24.5 per cent of the number reported for 1921, 198,334; and the total wage payments in 1923, \$353,205,000, show an increase of 24.2 per cent as compared with \$284,373,000 in 1921.

The "lumber and timber products" industry (embracing logging camps and saw mills), is the leading one in California, as measured by number of wage earners. In this industry the average number of wage earners employed during the census years increased from 19,290 in 1921 to 24,772 in 1923, the per cent of increase being 28.4.

Measured by total value of products, however, the petroleum-refining industry is the most important in the state. This industry, which employed only 7106 wage earners in 1923—less than one-third as many as were employed by the "lumber and timber products" industry—reported a total output valued at \$267,383,000, an increase of 3.3 per cent over the 1921 total, \$258,746,000.

LOS ANGELES TO BAR HORSES IN TRADE AREA

Under a traffic ordinance that goes into effect on July 1, next, horse drawn vehicles will be barred from the downtown business district of Los Angeles. The ordinance also provides for traffic lanes and rules for pedestrians, the same as motorists. There will be "No walking" and "No standing" signs. Fine and imprisonment will be the punishment for disregarding them. The signs for pedestrians will be painted on sidewalks. Jay-walking is forbidden and those who cross the streets afoot are to be compelled to signal their intention with the upraised arm, just as autoists signal for turns. If an unfortunate walker carries bundles in both arms he can make two trips each time with one armful, but he must hold the disengaged palm up or tell it to the judge. Some long street blocks will have pedestrian-crossing zones painted in the middle.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

ALONG THE LINE

The Assembly has passed and sent to the Governor the bill by Senator Boggs, Stockton, approving the report of the California Debris Commission, which recommends expenditures totaling \$51,000,000 for flood control work on the Sacramento and San Joaquin rivers. The report was prepared by a corps of army engineers and has been transmitted to Congress for approval. The project would be financed on the one-third participation basis, the State Government, Federal Government and property owners affected each contributing one-third to the total cost.

Conditions in Fresno should be looked upon with optimism, Ross Cox, manager of the San Joaquin Valley Industrial Association, told members of the Fresno Round Table at their regular weekly luncheon held in the Hotel Fresno. "New buildings already under construction or planned for the near future total \$5,000,000 for this year as compared with a building total of only \$1,500,000 last year," said Cox. "This does not include homes or the altering of buildings."

A uniform building code for the East-bay cities, designed to govern construction of residences is to be ready for adoption by the various municipalities about July 1. Many of the present building laws are obsolete and a new and uniform building code is essential if building progress is to keep pace with community growth in the East-bay, backers of the uniform code declare.

According to Public Health Report, the California District Court of Appeal, Third District, has held that a permit issued by the state board of health authorizing a city to discharge sewage effluent into a river does not authorize the city to create or continue a nuisance or in anywise limit the power of the court to abate the same if found to exist. (People v. City of Reedley et al., 226 Pac. 408.)

The forty-eighth annual convention of the National Electric Light Association will be held in San Francisco, June 15-19. The sessions will be held in the Exposition building and the program, in addition to reflecting the varied activities of the association, will embrace many outstanding features of value to the industry. It is expected there will be a very large attendance from all parts of the country.

An amendment to the building laws of San Francisco which, it is declared, will save 10 per cent on the cost of steel in steel-frame buildings, has been approved by the Supervisors' building committee. The amendment increases the allowed stress, permits of cutting down the amount of steel by 10 per cent and will greatly increase steel-frame building in San Francisco.

Southern California Edison Company will start construction about July 1 on \$2,500,000 double steel tower line traversing Kern county for a distance of 100 miles. The line will be a unit in the system connecting Huntington Lake with Los Angeles.

Stockton has voted bonds of \$3,000,000 to finance a deep water project.

A judgment by the superior court of San Joaquin County awarding \$1950 to the Davis-Heller-Pearce Company of Stockton in payment for services as architects rendered for L. Boscou, also of Stockton, has been affirmed by the third district court of appeal. Boscou contested the payment of the claim on the ground that the plans and specifications prepared by the architects did not meet his requirements. It appears from the records, however, that the architects stood ready to modify the building plans at his bidding.

Officials of the Reno Central Trades and Labor Council and Washoe County, Nevada, Building Trades Council have signed an agreement with the board of governors of the Reno 1925 exposition to prevent any labor troubles during construction of the buildings. The board of governors has agreed that only union labor will be employed. Should any labor trouble develop all matters will be referred to a board of arbitration, whose decision shall be binding.

The Senate has approved an \$8,500,000 state bond issue for a \$3,000,000 addition to the University of Southern California at Beverly Hills, a \$3,000,000 addition for the University of California at Berkeley, \$1,125,000 for a state building in Los Angeles and \$1,125,000 for completion of state capitol group at Sacramento. The issue will be ratified at the polls.

Kay F. Herrod, purchasing agent of the Pacific Portland Cement Company, consolidated, and president of the Purchasing Agents' Association of Northern California, at the April meeting was unanimously elected delegate to represent the association at the annual convention to be held in Milwaukee, May 25 to 28.

C. E. Cornwall has applied to the State Railroad Commission for permission to operate automobile truck service for the transportation of cement and cement containers between the plant of the California Portland Cement Company at Colton, San Bernardino County, and Los Angeles, and along the Sacatela storm drain.

The electric service companies of the United States during 1924 had a gross revenue from the sale of electrical energy of \$1,335,100,000, the operating and maintenance expenses of these companies for the same period was \$690,500,000.

Eastbay builders, contractors and hardware men have promised support to the Oakland Chamber of Commerce in its campaign to raise a \$60,000 industrial promotion fund. Frank W. Bilger, Oakland paving contractor, is a prime mover in the campaign.

Atchison, Topeka and Santa Fe Railway is reported to be planning early construction of a railroad from Bakersfield to Los Angeles, via the Tejon Pass.

J. W. McQueen, of Birmingham, Ala., president of the Sloss Sheffield Steel Company, died of pneumonia at the Waldorf Astoria Hotel, New York, April 20.

William Mulholland, of Los Angeles, and C. E. Grunsky of San Francisco, as consulting engineers, have been commissioned by the directors of the Sacramento Utility District, to review the report of Manager Albert Glavan on the Silver Creek project. The resolution adopted by the directors authorizes the engineers to submit a joint report of their findings, and requests that they begin their work at the earliest possible time.

Examinations for surveyors, engineering draftsmen, surveyors' field assistants and inspectors of streets and sewers, will be held on April 23, April 29, May 2, and May 9, respectively, according to an announcement of the San Francisco Civil Service Commission. Application forms and further information are available from the offices of the commission, Room 154 City Hall.

James T. Narbett, Richmond Architect, left for New York April 16 to attend the annual convention of the American Institute of Architects to be held in that city. Mr. Narbett goes as a delegate of the San Francisco chapter. He expects to be gone about three weeks.

Wm. Wright of the Wright Lumber Company of Stockton was a recent visitor to the San Francisco Builders' Exchange. Before opening yards at Stockton, Mr. Wright was engaged in the lumber business in Modesto and prior to that time operated in the San Francisco Bay District.

Stuart C. Morton, 38, San Francisco civil engineer, shot himself through the head in his apartment, 1740 Washington Street, San Francisco, April 16. He had been in ill health for the past three years. A widow and five year old son survive.

R. D. Merilith, for the past year connected with the city engineer's office at Santa Cruz, has accepted a position with the Nevada State Highway Commission Surveying Department.

Andrew M. Jensen was elected commissioner of public works of Fresno, at the recent municipal election, defeating Wm. Stranahan, the present incumbent.

Marin Municipal Water District defeats bond issue for \$1,500,000. Proceeds of the sale of the bonds were to be used to finance extensions to the present system.

Howard Schroder, architect, formerly located at 357 Twelfth Street, Oakland, has moved to larger quarters at 354 Hobart street, Oakland.

Senate has passed bill appropriating \$250,000 to deepen and widen mouth of San Joaquin and Sacramento rivers.

L. D. Esty, designer and builder of homes, has opened offices in the Alta Building, Santa Cruz.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

SONOMA COUNTY PLUMBERS FORM TRADE ORGANIZATION

The Sonoma County Plumbers' Association was perfected in Santa Rosa, April 16, at a largely attended meeting of plumbers from Petaluma, Sebastopol, Sonoma and Santa Rosa. The principal objects of the new organization are to secure the enactment of rules and regulations for the enforcement of sanitary and healthful plumbing in the homes of Sonoma County.

F. A. Van Beber, of Petaluma, was elected president; E. G. Metcalf of Sebastopol, vice president; O. C. Hughes of Santa Rosa, secretary-treasurer. Among the visitors at the meeting were H. G. Newman, president of the State Master Plumbers' Association; Wm. Goss, another state official, and C. C. Newkirk, traveling state secretary.

Among the Sonoma county plumbers present were E. Peterson and H. Marcey, Sonoma; F. J. Holrup, P. A. Van Beber, E. Hobbie, C. O. Jones and A. M. Anderson, Petaluma; E. G. Metcalf and W. D. Callahan, Sebastopol; J. R. Mailer, O. C. Hughes, A. F. Todd and G. Mitchell, Santa Rosa.

ELECTRICAL SHOW PLANNED

Electrical dealers of Marysville and various sections of Yuba County are planning to hold an electrical show in the Memorial Auditorium at Marysville during the month of September. R. E. Lance, a member of the Ways and Means Committee of the Merchants' Association of Marysville is in charge of arrangements. The show will be staged to educate the public as to the many uses of electrical appliances and to further the sale of such appliances.

WITHDRAW DEMAND

The bricklayers union of Rochester withdrew its demand for an increase of \$1.00 per day and signed a contract at the 1924 rate prior to the first of April. Nearly all of the other major trades had signed agreements before that time to go along under last year rates. Laborers and hoisting engineers will continue to work without agreements. The agreement with the plumbers has another year to run.

TRADES SCHOOLS URGED

A movement is on foot in Louisville, sponsored by the local chapter of the Associated General Contractors of America, to introduce the building trades into the new Vocational School being built in that city. A survey is being made by the association to determine what trades are in need of apprentices as well as the number of boys that should be learning one of the building trades.

NAMED OFFICIAL ORGAN

The Master Builder, weekly construction newspaper of Portland, Ore., has been named the official organ of the Northwest Contractors' Association. Bruce O. Rowan, executive secretary of the organization, will act as editor of the organization's department in the publication, and through this means will keep the membership informed on association affairs.

Good Roads Bureau Analyzes Road Programs in Various States

With 14 states planning to spend \$8,000,000 on the construction of new state highways during 1925, California must make adequate provision for financing new highway construction in this state if it is to maintain its well advertised position as a national playground, as well as an agricultural and industrial commonwealth.

This statement is issued by the California State Automobile Association together with an analysis made by its good roads bureau of highway construction rates in other states. Unless some feasible financing plan is evolved by the Legislature now in session, the expenditure per motor vehicle for state highway construction in California during the present year will be the lowest in the nation with the exception of Rhode Island and Massachusetts.

According to figures furnished by A. E. Loder, manager of the Association's good roads bureau, the expenditure during 1925 for new state highway construction will be \$8,000,000 or more in each of 14 states. It will be \$10,000,000 or more in nine states. Six states will expend \$15,000,000 or more each, and five will expend \$20,000,000 or more.

Pennsylvania leads in the amount of money planned for expenditure on new state highway construction during 1925 with \$45,000,000 for new construction and an additional \$21,000,000 for maintenance and reconstruction. Illinois is a close second with \$42,000,000 for new construction alone. New York with the largest motor vehicle registration slightly exceeding California, will expend \$27,000,000 while Missouri with less than one-half the number of motor vehicles in California, will expend \$23,000,000 in 1925 for new state highway construction.

Loder pointed out that the state of Florida, with a registration of only 210,000 motor vehicles and with comparatively small population and resources, is expending \$8,000,000 in 1925 on new roads, having found that its state highway system is bringing wealth into the state so rapidly as to make highway building one of the state's most profitable investments.

A careful study of the situation in California, Loder said, shows that un-

less some new provision is made by the Legislature, the total amount of money available from all sources, including Federal aid, for new highway building in this state during 1925 will amount to but \$4,500,000.

The number of vehicles is a direct measure of the traffic to be carried in each state, according to Loder, who pointed out that a comparison of the tabulated rates of annual expenditure from all sources per registered motor vehicle for new construction is of especial interest and shows some surprising results.

The average rate of construction per vehicle in the United States for 1923 will be \$22.26, while Nevada heads the procession with \$136.41 per vehicle.

California with only \$4,500,000 in sight at the present time for new construction in 1925, stands at \$3.33 per vehicle, which is the lowest rate of all except Rhode Island and Massachusetts both of which are pioneers in state road building and because of small area have practically completed their initial improvements.

If California's rate for new construction were increased to \$10,000,000 for 1925 it would stand at \$6.21 per vehicle on that year's estimated registration, while at \$12,000,000 per year it would be \$7.45, leaving it still only fourth from the lowest of all states.

A number of states with large annual expenditures for new work, such as New Jersey, New York and Pennsylvania, have been building state highways at a substantial rate for many years. The state of Illinois during 1924 alone constructed nearly half as many miles of heavy state highway pavement as have been paved in California from state and federal funds since the beginning of state work. During the same year, by an overwhelming popular vote, Illinois started on a new \$100,000,000 construction program to be entirely paid for by motor vehicle taxation.

California, with its unexcelled natural resources, travel attractions, and rapid growth in population must be adequately served by a state highway system if it is to maintain its well advertised position as a national playground, as well as an agricultural and industrial commonwealth.

FRESNO ENGINEERS NAME COMMITTEEMEN

Committee chairmen for the year have been appointed by President George Swenson of Fresno Chapter, American Association of Engineers.

The committee chairman are: S. P. Laverty, A. L. Finney, J. A. Ross, W. F. Kantzma, S. A. Chapman, C. W. Manley, J. Allen Hall, Dr. F. E. Twining, E. K. Barnum, Max Enderlein, Chris P. Jensen, Edgar C. Smith, Charles Kaupke, L. J. Moore, C. B. Merriek, J. W. Jordan and William Stranahan. The delegate to the national convention is J. M. Buswell with E. K. Barnum as alternate.

TO LICENSE PLUMBERS

Whether or not a license fee of \$50 levied on Palo Alto plumbers under a proposed plumbing ordinance would throttle competition in Palo Alto is a question the city council must settle at its next regular session. Preliminary discussion of the proposed measure provided frank expressions of opinion from both the plumbers and city fathers.

The plumbers claim a license fee will discourage "fly-by-night" artisans operating in this part of the county and are strongly in favor of the measure but the council members insisted that it be given a thoroughgoing investigation.

TRADE NOTES

R. N. Nason of R. N. Nason & Co., 151 Potrero Ave., San Francisco, who established one of the first plants on the Pacific Coast nearly forty years ago for the manufacture of paints and varnishes, has retired from active business. Direction of the company's affairs now rests upon its new president, D. J. Tight, who has been associated with the company since 1921. Simultaneously with his connection with the R. N. Nason Company came the appointment of W. W. Holt as vice president and L. N. Carlson of San Francisco and L. T. Bradley of Los Angeles as directors.

The Los Angeles Wall Bed Company in an eight by four inch advertisement in San Francisco newspapers advises the public of a patent infringement suit brought in the U. S. District Court against the Rip Van Winkle Wall Bed Company, alleging an infringement of patent rights. The advertisement warns prospective purchasers of wall beds to investigate the patent rights of the Los Angeles Wall Bed Company before purchasing.

California Granite Company, operating a quarry on Rock Hill, six miles east of Porterville, has been awarded a contract to furnish granite for a mausoleum to be erected in Los Angeles County. The contract price runs in the neighborhood of \$40,000.

Tyre Bros. Glass Co., 666 Townsend street, San Francisco, is having plans prepared for a concrete and steel plant to be erected at Seventh and Cypress streets, Oakland. The structure will be one-story, of special height, to permit the installation of a craneway.

N. E. Lund of Oroville has purchased equipment and will open a plant for the manufacture of brick from clay deposits near Oroville. A plant with a daily capacity of 40,000 brick is contemplated.

L. F. King and E. T. Russell of San Jose have formed partnership and will operate in San Jose under the trade name of King-Russell Electric Company.

L. L. Dougan, formerly of the firm of Houghtaling & Dougan, architects, Gearin Bldg., Portland, Ore., has established offices at 309 Western Bond and Mortgage Bldg., Portland, Ore.

Acme Gravel Company of San Francisco, capitalized at \$100,000, has been incorporated with the following directors: E. P. Hulme, E. Wright, R. Ferbeck, A. M. Cole and G. L. Dillman.

Withington Iron Works, 780 Brannan street, San Francisco, announces a change of name to Sullivan Iron Works. Wm. H. Sullivan is the owner of the company.

F. A. Dailey will operate from 330 Hialto Bldg., San Francisco, under the firm name of Ajax Construction Company.

R. L. Ingham will operate from 4430 California street, San Francisco, under the firm name of Richmond Window Shade Factory.

The Gazette Lumber Co., operating in Siskiyou county, has been taken over by J. R. Roberts of Medford, Ore.

D. R. Capito has opened a plumbing and electrical shop at Meridian, Calif.

\$44,456,918 Is Pacific Coast Building Expenditure for March

A grand total of \$44,456,918 in building permits were issued during March in 79 cities of the seven Pacific Coast States, the highest monthly total since March of last year. This figure shows a 12% gain over the total for February, but a 16% reduction from the figures of last March, an 11% reduction from the March total of 1923, but a 31% gain over March of 1922. This is shown by an analysis of building statistics comprised in the Pacific Coast section of the National Monthly Building Survey of S. W. Straus & Co.

Following are the official March, 1925, building permit figures reported by building department executives from 79 cities comprised in the Pacific Coast Section:

	March, 1925	March, 1924	February, 1925
ARIZONA:			
Phoenix	\$ 233,789	\$ 118,000	\$ 409,351
Tucson	126,146	115,175	109,787
Total	\$ 459,935	\$ 233,175	\$ 519,138
CALIFORNIA:			
Alameda	\$ 154,717	\$ 193,289	\$ 125,059
Alhambra	328,925	859,520	174,420
Anaheim	40,814	221,515	7,053
Bakersfield	204,968	59,790	88,757
Berkeley	1,029,452	956,950	669,639

Plans obtainable from Bureau of Architecture 2nd floor, City Hall.

AMERICAN RIVER at 12th Street.

APRIL 22, 1925.

SANDY PRATT is here.

WATCHING The American River.

BRING DOWN clean sand.

AND SANDY has nothing.

TO WRITE about.

SO SANDY said.

TO MRS. Proficient office-manager.

AT SANDY'S sand plant.

"I HAVE no 'Concrete Mix.'

FOR THIS week's paper."

SHE SAID, "Tell them.

ABOUT YOUR real 'concrete mix.'

MADE OUT of Prattrock gravel.

AND PRATTROCK concrete sand.

FROM PRATTROCK (near Folsom).

BECAUSE WE now have.

A REAL "concrete mix."

AND MAYBE Mrs. Proficient.

THINKS THIS near comedy.

OF SANDY Pratt's.

IS THE bunk.

MANY THINK so.

MANY THINK Sandy is conceited.

BECAUSE SANDY writes.

ABOUT HIMSELF.

AND SANDY'S clean sand.

AND HARD, crushed rock.

SANDY HOPES.

HE IS not conceited.

IT IS a terrible affliction.

BUT ABOUT real "concrete mix."

MADE OF sand, rock and gravel.

AND NOT a bunch.

OF WORDS ("Pratt's Concrete Mix.")

SANDY'S COMPANY is producing.

AT PRATTROCK (near Folsom).

A "CONCRETE mix."

SUITABLE FOR good concrete.

AND NOT suitable.

TO FILL newspapers.

WITH BUM reading matter.

LIKE THIS near-comedy,

THE SAND in this mix.

IS CLEAN and sharp.

AND WELL graded.

THE ROCK or gravel.

IS EVERYTHING.

THAT SANDY says.

FOR THE sand.

AND THEN some.

SEVERAL DEALERS and contractors.

SAID SANDY'S concrete mix.

(NOT HIS newspaper kind).

IS THE best.

IN THE west.

BUT THAT'S too strong.

THESE OVER enthusiastic friends.

SHOULD SAY.

"PRATT'S CONCRETE Mix."

MADE OF sand, rock and gravel.

IS AS good.

AS THE best.

"I THANK you."

The above illustration depicts the attitude our proficient Sacramento office-manager takes when now and then a prospective buyer is slow to be convinced that Pratt's Concrete Mix is one of the best on the market. The favorite slogan of Mrs. Proficient, Office Manager is, "Pratt's Concrete Mix is better than the best."

LOS ANGELES, Los Angeles Co., Cal.—Architect T. Franklin Power, 2615 W. 7th St., is preparing plans for new college buildings on 16th St. west of Vermont Ave. for Loyola College. Graf, 1179 Market street, head of the
"Little Theatres of America" Corpora-
tion, announces that twenty theatres
of various types of construction and
size will be built throughout the state
this year. Options are being secured
at this time, and it is stated, construc-
tion to start as soon as property is
secured, and plans drawn. No archi-
tect has been named in connection
with the project at this date.
Mr. Graf is also contemplating the
construction of a Motion Picture Pro-
duction Plant in the Sunset District.

(Continued on Page 20)

Official Proposals

NOTICE TO BIDDERS

(Merced Irrigation District)
(Spillway Gates and Other Equipment)

Notice is hereby given that sealed proposals will be received at the office of the Board of Directors of Merced Irrigation District in the Bancroft Bldg., Merced, California, until Tuesday, June 2nd, 1925, at 10 o'clock A. M., for the furnishing of the Spillway Gates and other equipment of the Eschschuer Dam and Power Plant of the Merced Irrigation District consisting of the following materials:

- 14 Plate Steel Gate Leafs with structural steel and cast steel frame.
- 14 Cast Steel Bearing Plates.
- 84 Semi-Steel Crest Plates.
- 4 Sets of Plate Steel Wall Plates.
- 14 sets of Gate Operating Gearing, consisting of Cast Steel Gears and Backs with screw stems on cast steel bed plate, and worm and bevel gear drives.

2 Motor-driven Gate Operating Cars.
1 Travelling Crane.
1 Centrifugal Pump.
1 Hydraulic Ejectors.
1 High-Pressure Oil Pumping System.
Specifications for said material can be seen at the office of said Board and copies thereof will be furnished upon application to the Secretary of said Board accompanied by a deposit of \$20 to be repaid to all bidders and to all others upon return of the plans and specifications in good and acceptable condition not later than the day set for opening bids.

Said Board will be in session at its office at 10 o'clock A. M., on Tuesday June 2, 1925, and open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Board reserves the right to reject any and all bids.

Bidders may submit bids upon any or all of the schedules, but no schedule will be subdivided. Each proposal must be accompanied by a certified check for five (5) per cent of the amount of the schedules bid upon, payable to the order of the Merced Irrigation District as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five (25) per cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications, said Bond to be approved by said Board.

The proposal forms must be properly filled out by the bidder, and the plans and specifications, including the proposal must be submitted intact with the bid in a sealed envelope addressed to the Board of Directors of the Merced Irrigation District, and marked to indicate that it is a proposal for Spillway Gates and other equipment for the Eschschuer Dam.

Done in pursuance of an order of the Board of Directors of the Merced Irrigation District, this 14th day of April, 1925.

H. P. SARGENT,

Secretary of the Board of Directors of the Merced Irrigation District.

NOTICE TO BIDDERS

(Redwood City—Cast Iron Pipe, Etc.)

Public notice is hereby given that sealed bids will be received by the Board of Trustees of the Town of Redwood City, California, up to and including Monday, the 4th day of May, 1925, at the hour of 3:00 o'clock P. M., of the following materials to be delivered f. o. b. cars at Redwood City, to-wit:

- 1700 lineal feet of six (6) inch cast iron water pipe.
- 2000 lineal feet of four (4) inch cast iron water pipe.
- 1 six (6) inch cast iron tee.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

- 6 six (6) inch by six (6) inch by four (4) inch cast iron tees.
- 6 four (4) inch cast iron tees.

All pipe to be of bell and spigot pattern, in lengths of not less than twelve (12) feet, and fittings shall conform to American Water Works Association specifications Class B.

The Board of Trustees invites and will receive alternate bids upon the above quantities of pipe and fittings for deLavaud centrifugally cast iron pipe, Class 150, and McWane cast iron pipe.

All pipe and specials to be subject to inspection by the Superintendent of Water System of the Town of Redwood City and rejected pieces to be stored at the expense and subject to the order of shipper.

Delivery to be made within ninety (90) days after placing order, and contract to be entered into within five (5) days after acceptance of bid.

Bids to be accompanied by a certified check made payable to the President of the Board of Trustees of Redwood City. Checks of unsuccessful bidders to be returned at once and check of successful bidder to be returned upon acceptance of goods ordered.

The Board of Trustees reserves the right to reject any and all bids.

By order of the Board of Trustees of the Town of Redwood City, California.
Dated: April 5, 1925.

W. A. PRICE,

Clerk of the Town of Redwood City.

NOTICE TO CONTRACTORS

(Bureau of Yards and Docks—Specification No. 5097)

The Bureau of Yards and Docks invites attention to the proposed work under Specification No. 5097, Marine Railway Accessories House, Naval Operating Base (Navy Yard), Pearl Harbor, Hawaii, on which bids will be opened in the near future. The project consists of a building having steel frame, concrete foundations and footings, concrete floor on coral fill, structural steel columns, girts and roof trusses, galvanized corrugated steel siding and roofing, steel sash, metal covered doors, electric lighting and plumbing, and fire protection systems.

In the event that this work is of interest to you, you should forward to the Bureau, to the Commandant, Navy

Yard, Mare Island, Calif., or to the Commandant, Naval Operating Base, Pearl Harbor, T. H., a check or postal money order for \$10 payable to the Chief of the Bureau of Yards and Docks as security for the safe return of the drawings and specifications.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

NOTICE TO BIDDERS

(Metal Shelving and Lockers—Bureau of Yards and Docks)

Sealed Proposals, indorsed "Proposals for Steel Lockers and Shelving for Marine Corps Depot for Supplies, San Francisco, Calif., Specification No. 5096" will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock A. M., April 29, 1925, and then there publicly opened, for adjustable metal shelving and lockers to be installed where directed in the Marine Corps Depot for Supplies, Spear and Harrison Streets, San Francisco, Calif., Specification No. 5096 and accompanying drawing. Plans may be obtained on application to the Bureau or to the Commandant, Twelfth Naval District, San Francisco, Calif. Deposit of a check or postal money order for \$10.00, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specification. L. E. GREGORY, Chief of Bureau.

NOTICE TO CONTRACTORS

Teachers' State College, San Francisco

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Tuesday, May 19th, 1925, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the Plumbing, Heating Work, and the Electrical Work for the Kindergarten Building and Boiler Plant Building, San Francisco State Teachers' College, San Francisco, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California. The Kindergarten Building will be completed under the terms contemplated by this Contract but the Boiler Plant Building will be left in a rough stage of completion and only a small amount of roughing-in is included. Separate proposals will be received for "Plumbing and Heating Work" and the "Electrical Work." Bids must be submitted in forms prepared and furnished by the State.

Cash, a bidder's bond, made payable to the State of California, or certified to the State Engineer by the "State Engineer," Department of Public Works, in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of plans and specifications to the said Division of Architecture, at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and waive any informality in any bid received.

All bids must be addressed to Geo. B.

A Variety of Work on the Same Machine

In addition to business correspondence the modern
 office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
 c. cutting, writing on ruled forms and many other
 kinds of office work can all be done on the L. C.
 Smith & Bros. typewriter.

The decimal tabulator and the variable line
 spacer are part of the inbuilt service of every L. C.
 Smith & Bros. machine.

Typewriters Rented

OPENING BIDS IN PUBLIC

Let us go on the question of opening bids in public. If we can put this across we will have taken a long step towards eliminating the greatest temptation that confronts the owner, the architect and the general contractor, to violate the ethics of our profession.

It will force the owner and the architect to select a comparable list of firms when compiling their list of bidders. It will eliminate the old game of playing one contractor against the other to force a lower figure. We all know what our costs are and should be willing to stand by our first proposition. We are not fair to ourselves or our fellow-members when we become party to shopping after bids are opened. We enter into the competition with the idea of winning. It costs us from \$100 to \$1,000 or more to figure a set of plans and our competitors a like figure. Assuming there are ten bidders, that means from \$1,000 to \$10,000 has been spent to get the job.

Is it fair that one firm should have any "inside" on another, all things being equal? Certainly after spending the time and money to prepare a bid we are entitled to know where we stood. If an owner or architect wants a certain firm to get a job, let him give it to them on a fee basis or any other basis that is mutually agreeable, but once a job is put out for competitive figures, let us insist on public opening.

Competitive bidding implies fair play for all. Let us make it so by opening bids in public. We can do this if we stand together, by taking the stand that we will not figure plans unless they are opened in public.

If we do this we cannot help but win.—(K. P. Lowell in the August News Letter of the Southern California Chapter, Associated General Contractors).

L. A. BUILDING FOR MARCH

Building permits issued in Los Angeles for the month of March, 1925, totaled 4264 with an estimated valuation of \$14,714,002 as compared with 5256 permits with an estimated valuation of \$17,279,758 for the same month a year ago. March was the peak month for building in 1924. For February, 1925, the number of permits was 3336 and the estimated valuation was \$10,834,244.

Class A construction started during March amounted to \$2,389,000 for 10 structures, and Class C construction amounted to \$1,745,033 for 78 structures. Class D all frame construction totaled \$6,634,310 for 2976 buildings.

For the first three months of 1925 Los Angeles building total was \$36,769,408, or \$9,752,288 less than for the first three months of 1924.

Housing operations for March were represented by 1590 permits for dwellings and apartments with an estimated valuation of \$6,611,413, or 37.3 per cent of the entire number of permits and 44.9 per cent of the entire valuation for the month. Accommodations will be provided by these buildings for 2362 families.

CONCRETE SPECIFICATIONS ARE CRITICIZED

The usual method of specifying concrete as 1-2-4 or 1-2-3 mixtures received some hard raps at the twenty-first annual convention of the American Concrete Institute held in Chicago the week of February 24. In the presentation of papers descriptive of field methods of controlling concrete mixtures it was repeated again and again that specified proportions of aggregates and cement have absolutely no meaning when the facts regarding the bulking of sand, the variation of voids in gravel, and workability are considered.

The enthusiasm with which engineers, architects and contractors received such statements points to the probability of a radical change in future concrete specifications. Actual field results indicate that contractors are now losing money by using more cement than would be necessary if proper control of proportions were a general practice. They indicated that owners were losers because they have

not received concrete of the quality that the materials can develop if properly proportioned and controlled.

The discussions of the institute centered on job practice rather than on theory. When mention was made of 2000-pound concrete at 28 days from mixtures averaging less cement than usually required for a 1-2-4 mix, the speakers were telling of actual job experiences with average crews of workmen. Such tests of theory are the only practical tests that can be made. They prove, as no theoretical discussion or laboratory research could ever prove, that the industry is still in its infancy when it comes to getting the most out of portland cement.

Novo Power, January edition, is devoted to Novo road building equipment. Air compressor outfits, drag lines, pressure pumps, portable air compressors, industrial hoists, are featured. Novo Power is published by the Novo Engine Company, Lansing, Michigan.

CLYDE

HOISTS and DERRICKS

"Equipped by Clyde" has become a mark of distinction in the construction field. More and more are complete Clyde outfits being purchased. The resulting splendid service justifies the expenditure.

Illustrated here is a Clyde 20-ton guy derrick with a 115 foot boom operated by a Clyde two drum electric hoist. Both are owned and operated by the Phoenix Utility Company on the \$10,000,000 development for the Minnesota Power & Light Co., at Fond du Lac, Minnesota.

The outfit handles all material excavated for a large power house and was one of six similar installations used on the project.

Clyde Electric Hoists are built with all the thoroughness found in any other Clyde unit. They are provided with especially designed motors, automatic mechanical brakes in addition to foot brakes, rugged drum type controllers, semi-steel friction drums, and gears with machine cut teeth. The lever arrangement is designed for easy and instantaneous control.

Additional information given cheerfully.

You'll Take Pride in Your Clyde!

AS OUR NEIGHBOR SEES US

The Southwest Builder and Contractor, the construction publication of Los Angeles, in the current issue says: "Apparently the people of San Francisco are pretty well satisfied with the operation of the 'American Plan' in the construction industry. Building has prospered under it despite the predictions that it would bring calamity on the city. There has been entire freedom from strikes for the last two years, which has meant a great economic gain. Workers in the building trades have received as good wages as are paid in the average large city, which means that as much money has been distributed as would have been paid through the construction industry under any other plan. Establishing of the 'American Plan' in San Francisco has made it a stronger competitor of Los Angeles than it would have been otherwise. It has enabled that city to add materially to her industries and to forge ahead in many lines which offered little promise of expansion. There has been talk recently that the 'American Plan' was waning in San Francisco, but there has been no surface indication of it, at least."

BIDS ARE ASKED FOR \$1,900,000 BRIDGE

Bids will be considered by the Multnomah County Commissioners, Portland, Ore., on May 26 to construct the new Ross Island bridge over the Willamette river. The structure is estimated to cost \$1,900,000 not including engineering fees. The bridge will be 3701 feet long, including approaches, with a retaining wall 341 feet in length. The main structure will be 1819 feet long, the west approach 1482 feet long and the east approach 400½ feet long.

The middle span will have a clearance of 123 feet above low water and will be 535 feet in length. The bridge will have a roadway 38 feet wide between curbs, with two five-foot sidewalks, the total width being 51 feet 7½ inches, including railings. The main structure will consist of five steel truss deck spans with reinforced concrete viaducts as approaches.

Bids will be received for the whole bridge or separately for the approaches and for the main river spans. The approaches contain, among other items, approximately 17,400 cubic yards of concrete and 2,150,000 pounds of reinforcing steel. The main river spans contain, among other items, approximately 10,250,000 pounds of structural steel; 200,000 pounds cast steel; 19,400 cubic yards concrete and 480,000 pounds of reinforcing steel.

Gustav Lindenthal is consulting engineer and Hans H. Rode is resident engineer on the project.

NEW BUILDING INSPECTORS

To keep up with the phenomenal growth of building in San Francisco, as shown since the first of the year, the San Francisco Civil Service Commission announced twenty-one new building inspectors who have qualified for assignment to duty as needed.

The new inspectors are:
C. Harris Potts, Charles F. Armstrong, George W. Marsh, Ivan Flamm, William C. Hume, Axel E. Elfstrom, Cornelius F. Dempsey, Frederick E. Patterson, Richard P. Gorman, Michael Steele, Alexander Cleland, Robert J. Cairns, John Placans, Gustave T. Stahlberg, Leslie J. Sullivan, Henry J. Broderick, Timothy J. Dolly, Charles V. Lynch, David L. Stewart, Luke T. Curran, Arthur L. Christiansen.

BRITISH ARCHITECT WINNER OF U. S. MEDAL

The gold medal of the American Institute of Architects will be given to Sir Edwin Lutyens, British architect, at the convention of the American Institute of Architects and the Architectural and Allied Arts Exposition, both of which open in New York, April 29.

The award will be for conspicuous service and only the sixth time it was conferred in 19 years.

It was Sir Edwin Lutyens who designed the famous Queen's Doll House, a miniature palace presented to Queen Mary of England. He has also designed many buildings in this country, including the chapel at West Point and the Nebraska state capitol.

TO REDUCE SIZE VARIETIES IN SIDEWALK GLASS

Initial steps for the reduction of the variety of sizes and types of sidewalk glass were taken at a preliminary conference of manufacturers representing some 90 per cent of the production of this commodity. The conference was held under the auspices of the Division of Simplified Practice, Department of Commerce, and E. W. Ely of the Division presided.

The discussions revealed that the last decade has seen large sums spent by the industry in the improvement of its product and in overcoming technical problems. They also disclosed that from some 500 types and sizes of sidewalk glass in use 15 years ago, the present day variety has been reduced to less than a tenth of that number.

The meeting named a Simplified Practice Committee of the industry comprising Davis Carpenter (chairman) of Davis Carpenter & Company, Inc., New York City, Charles P. Mills of the American 3 Way-Luxfer Prism Company, Long Island City, N. Y., and L. W. Mulford, of the American Bar Lock Company, Inc., Long Island City, N. Y.

This committee will undertake a survey of existing variety and will prepare recommendations which will be presented at a general conference of manufacturers, architects, construction and technical organizations and distributors early in the fall for action.

INCORPORATION ARTICLES FILED BY MCCORMICK LUMBER CO.

Articles of incorporation of the Charles R. McCormick Lumber Company, organized under the laws of Delaware and capitalized at \$15,000,000, have been filed in the office of Frank C. Jordan, secretary of state.

The company is believed to be the reorganization of five different lumber and steamship companies throughout the state, with headquarters in San Francisco, and controlled by the McCormick interests and all bearing his name. The Charles R. McCormick Company is one of the largest lumber and shipping concerns on the coast.

Directors of the newly organized company are: Charles R. McCormick, Sidney M. Hauptman, J. Arthur Olson, Theodore M. Levy, Hunt C. Hill, Joseph J. Geary, Chalmers G. Graham and Charles L. Wheeler, all of San Francisco; Thomas M. Hencken of Oakland, James S. Brown of Berkeley and Ira S. Lillick of Atherton.

RAILWAY EXTENSION PLANNED

The Bureau of Engineering of the San Francisco Department of Public Works is making surveys for the proposed extension of the Municipal Railway into the Excelsior district. The unit will be an extension of the Potrero avenue line. The proposed routing would be from Potrero avenue and Army street southerly parallel to San Bruno road and thence along the right-of-way of the old Ocean Shore railroad, recently acquired by the city, directly into the Excelsior district.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

ALONG THE LINE

In the interests of the Southern California plaster board industry a comprehensive program of research and experimentation on gypsum-centered plaster lath will be undertaken immediately by a special testing laboratory, which has just been established at the University of Southern California, under the direction of Prof. R. M. Fox, head of the university civil engineering department. According to O. D. Goetz, member of the General Committee of Plaster Board Industries, representing the \$1,000,000 Southern California industry, the program of experimentation and research will include fire tests, experiments to determine the maximum stress capacity, development of new uses and the technical analysis of the product in its relation to interior and exterior backings of plaster.

The United States circuit court cleared the way for the city of Seattle to begin construction of the Montlake bridge, a municipal enterprise, when it overturned an injunction proceeding against the bridge which had been instituted by the Strauss Bascule Bridge company. The company had held that the construction of the city project would be an infringement on some of its claims to certain bridge fittings and appliances. The lower court held that there was no contention in the plea and the circuit court upheld this judgment.

In a decision in the case of the C. R. McCauley Co. (No. 342, Docket No. 12, submitted Feb. 17, 1925, decided April 6, 1925), the United States Board of Tax Appeals ruled that on a reinforced concrete building in good condition an allowance for depreciation at the rate of 2 per cent per annum is reasonable. The building in question is a four-story and basement reinforced concrete building, 100x100 feet, erected in Brooklyn, N. Y., in 1905-6, at a cost of \$150,000.

Work on the construction of the estuary tube, to connect Alameda with Oakland at Harrison street and entailing the removal of the Webster street bridge, will be started at once by the A. J. Crocker Co., the successful bidders on the project. The county supervisors have approved the two bonds of the company for \$1,942,000 each.

Ten million dollars to improve existing parks and to create new ones and to develop Municipal Railway extensions will be available to San Francisco if the voters at the municipal for that amount which will be on the ballot.

Oakdale Irrigation District and South San Joaquin Irrigation District will vote May 18 on proposal to issue bonds of \$2,200,000 to finance construction of the proposed Melones reservoir and power plant project.

Friermuth Pipe & Sheet Metal Company of Watsonville has been incorporated with a capital stock of \$50,000. Directors are: H. D. Friermuth, Geo. P. Friermuth, A. M. Earle, Vincent J. Friermuth and Thomas C. Jameson.

A trade school for the training of marble setters is being conducted in connection with the engineering department of the University of Tennessee. The school, which is said to be the only one of its kind in the country, was opened in September 1924. It was established through the cooperation of the marble manufacturers with the University officials for the purpose of training men in the trade which was rapidly becoming a lost art. On account of the scarcity of skilled mechanics in this trade, architects have been specifying substitute materials with the result that there has been a considerable falling off in the amount of marble used.

Lumber manufacturers declare the forests of the country are needlessly drained and \$140,000,000 worth of wood wasted by insistence on long lengths of boards. This sentiment was expressed at a conference of the trade extension committee of the National Lumber Manufacturers' Association, preliminary to the opening of the annual convention of the association at Chicago, April 27. The committee agreed that the people must be dissuaded from refusing short, odd lengths of lumber.

Tentative plans for the consolidation of about seventy-five of the largest sawmills in Oregon, Washington and Northern California with a capitalization of \$130,000,000, are being laid before some of the principal owners. Two of the largest operators on Coos Bay have been approached with the proposition. Identity of the interests back of the proposed merger was not disclosed.

Agreement was reached in Washington at the closing session of the meeting of the joint board of State and Federal highway officials to create a group of interstate roads to be known as "United States highways," which will be designated with uniform markers. The first regional meeting will be held on the Pacific Coast in May, probably at San Francisco.

The San Francisco Board of Supervisors has voted—unanimously to join the proposed bridge and highway district which removes the chief obstacle in the construction of the proposed Golden Gate Bridge. Under the plan, San Francisco will join with northern communities in financing the project.

R. O. Deacon Lumber Company has filed articles of incorporation at Fresno. The company is organized under the laws of Delaware and is capitalized at \$1,000,000. The incorporators are given as T. L. Croteau, L. L. Miller and M. A. Bruce, all of Wilmington, Del.

Yuba River Lumber Company of Marysville has been incorporated with a capital stock of \$50,000. Directors are Jas. D. Poole, J. A. B. Smith and W. F. Mandery.

The United States Department of Labor reports that of 541 labor disputes submitted to it in 1924 that it settled 482.

The Senate has passed the McPherson bill regulating the practice of professional engineering and providing for the creation and establishment of a State Board of Registration for professional engineers. The measure has been the bone of contention of various groups of engineers throughout the State.

H. A. Storrs, for the past two years consulting engineer for the Modesto Irrigation District, has tendered his resignation to the directors of the district, giving as his reason that the project has been far enough advanced to enable the district to dispense with his services. The resignation is to become effective in thirty days.

J. M. Turton, Napa architect, died in that city April 27 following an illness of two years duration. Deceased was born in Nebraska in 1862. He came to California in 1876. He graduated from the old Collegiate Institute in Napa and later studied architecture in San Francisco. A widow and daughter survive.

Warren H. Swayne, president of the Swayne Lumber Company, died in Oroville April 26 from acute appendicitis. Mr. Swayne was 40 years old, a native of San Francisco. He went to Oroville from Alameda in 1909 with his father, Robert H. Swayne, establishing the Swayne Lumber Company with a mill at Stanwood.

Felix Marcuse, pioneer San Francisco contractor, died at his home 103 Third avenue, April 22. Death was due to heart disease. He was eighty years old and came to California in the early 60's making the trip from Germany by boat around Cape Horn.

James James, Engineer of San Mateo, has been named city engineer of Burlingame, succeeding Carl A. Torello. Mr. James was formerly connected with the Lang Realty Company, engaged in subdivision work in Hillsborough Acres, San Mateo County.

Yuba Manufacturing Company of Marysville has contracted to construct five 13½ cubic foot dredgers for the Soviet Government of Russia to be used in platinum mines. The contract runs in the neighborhood of \$2,000,000.

Fresno county contemplates a bond election for approximately \$500,000 of which \$350,000 would finance additions to courthouse and \$150,000 for additional buildings at the county hospital grounds.

R. A. Herold, Sacramento architect, accompanied by Mrs. Herold, is in New York attending the First International Conference on City Planning.

Bids will be asked at once by the U. S. Engineer's office for dredging in the Oakland Estuary. The estimated cost is placed at \$885,000.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

TRUCE DECLARED IN N. Y. BUILDING DISPUTE

As a result of a meeting arranged by the Building Trades Employers Association of New York, which was held in that city on April 6, between the officials of the Operative Plasterers' & Cement Finishers' International Association and the Bricklayers, Masons and Plasterers' International Union, a truce has been declared and officials of both organizations have agreed to return their men to work. The Executive Boards of the two organizations will meet in New York shortly and endeavor to come to an understanding on all the points in dispute.

Jobs in New York, Chicago and Philadelphia, which were tied up when the trouble started some two weeks ago, are now going ahead pending the final outcome of the controversy. It was feared at the time the trouble started that it would spread to other cities and eventually tie up building construction all over the country.

The dispute, which came to a head in Miami, involves the right of plasterers to organize in locals under the control of the Operative Plasterers' and Cement Finishers' International Association. In a statement given to the New York papers, Walter Price, vice president of the Bricklayers, Masons and Plasterers' International Union, set forth the position of his organization in the controversy as follows: "There is no dispute between the bricklayers and plasterers as to who should do stucco work as has been charged. If there were, there is a body that would settle it without any strike—the National Board for Jurisdictional Awards in the Building Trades. We have never claimed to do stucco work. The grievance of the bricklayers has as its basis the desire of the plasterers' organization to take over the work that properly belongs to masons and bricklayers, such as artificial stone setting. The trouble was started by the Plasterers' Union setting up rival locals in territory organized and controlled by us for twenty-five years and more. In conferences in Washington and Miami we asked for restoration of the old relations and insisted upon the establishment of old conditions. After the conference failed the plasterers notified all the bricklayers that the agreement was at an end and that all bricklayers and masons who might be at work must join that union."

PORTLAND CONTRACTORS PLAN TO BOND AND LICENSE

The Northwest Contractors' Association, Portland, Ore., has appointed a legislative committee, C. L. Iffenbacher, chairman, to co-operate with the city administration, loan companies, building material dealers and manufacturers, in getting behind a movement for licensing and bonding contractors and for the more careful grading of building construction. The committee sent out numerous letters to the different financial institutions and other associations, asking for an expression from them regarding this matter. The movement is being heartily endorsed.

"American Plan" Move is Defensive—Citizens' Alliance of St. Paul, Says

The aims and purposes of the open shop movement are defined as follows in a bulletin issued by the Citizens Alliance of St. Paul:

"Few people ever get far enough into the intricacies of this industrial problem of the open shop to realize what a baffling thing it is. Proponents of the closed shop insist that it is a movement to bust all unions. As a matter of fact, it is a defensive movement to keep the autocratic power accompanying the closed shop from busting everything the public has, including our government itself.

"If it were only a movement to bust the unions, the open shop advocate would have an easy time of it. Consequently, we cannot endorse the busting of the unions, and we hate to admit that is what it seems to do. This is the fault of the unions themselves, because they have built themselves up on false premises, adopted unethical and un-American standards and arrogated to themselves a power which no group should have under our American freedom. Taking by sheer force of numbers what you are not otherwise able to get is hardly a principal of action that we could afford to permit others to adopt.

"For instance, suppose the farmers adopted organized labor's plan — 30,000,000 farmers. The public would then realize too late what they permitted, and organized labor

would realize too late what they had started for the farmers' closed shop would have both the public and organized labor by the throat. That should not be permitted by government, and no government can remain stable that permits it.

"It is urged that the farmers cannot organize. They can, if they can be made class conscious, and here in the Northwest we know what class-conscious farmers can do.

"Organized labor has the public by the throat now, but the public does not realize it fully. Personally, we are not willing to consent to the breaking down of the working man's defense given by organization, in spite of the fact that we neither can agree with the so-called demands of the present unions nor sanction many of their methods.

"Greater problems than this were solved at the dawn of our government and with enough men of intelligence and conscience working on it, we can solve it with fairness to all. The difficulty is to get men to think. Those in the combat are influenced by the heat of the hour. Most teachers and preachers, although well intentioned, are too theoretical and inclined to make the mistake of trying to 'gentle rattle-snakes' to aid materially. Those socially minded simply clutter up the landscape.

TILE MEN ORGANIZE

Representatives from twelve tile firms in the San Francisco Bay District attended an organization at the San Francisco Builders' Exchange, April 2, and formed an association, electing A. S. Mangrum, president; J. J. Daly, vice-president; Robert Howden, second vice-president; Thomas Duffy, secretary and H. Ginsberg, treasurer.

A Committee on Constitution and By-Laws composed of Thos. F. O'Connor, O. Anderson and E. H. Peterson was appointed by the president. The Association will meet every Tuesday at the San Francisco Builders' Exchange.

L. A. BUILDERS ELECT OFFICERS

Lynn S. Atkinson, general engineering contractor, has been elected president of the Los Angeles Builders' Exchange, succeeding Godfrey Edwards of the contracting firms of Edwards, Wilday & Dixon. G. E. Arbogast of the Newbery Electric Co. was re-elected first vice-president and J. C. Hanley, second vice-president and Lmll Brown was re-elected treasurer.

The federal trade commission's suit to compel the Claire Furnace company and 21 other steel corporations to make reports concerning their output, capacity, production cost and other information which has been in the supreme court since December 6, 1923, was restored for argument on November 2.

PENINSULA ELECTRICAL INTERESTS PERFECT ORGANIZATION

Alfred E. Werry of Palo Alto was elected president of the Peninsula Electrical Development League, at the organization meeting of the League in Burlingame, April 23. Fred A. Peck, district manager for the Pacific Gas & Electric Company at Redwood City, was elected secretary.

The meeting was attended by electric dealers from San Francisco, San Mateo and Santa Clara counties. J. F. Keefe acted as temporary chairman.

Addresses were made by C. B. Kenney, president of the San Francisco league; Chester E. Hershey, president of the Santa Clara league; J. C. Ross, Victor Lemore, H. E. Sandeval, Edward Martin and Walter F. Price, secretary of the California Electrologists, all of San Francisco.

The directors of the new organization are Charles F. Shurk of South San Francisco, Seth Cohn of San Mateo and L. H. Cook of Menlo Park, together with the two officers.

BUSINESS IS GOOD

W. A. Brigham, president of the Brick Contractors' Association of Alameda County, reports that members of his organization are busy. Brigham says the use of brick has been greater this year than in the past few years and attributes the increase to the national advertising campaign which is featuring brick as the most economical and most lasting building material for home or office building.

Permit System Wins—Extracts From U. S. Supreme Court Decision

On April 18, the Building and Eng. News published a Washington dispatch Court, in the case entitled *The Industrial Association of San Francisco and Santa Clara County and the California Industrial Council, et al., appellants, versus the United States of America.*

The case was an appeal from a decision by Judge Dooling in the federal district court of San Francisco against the appellants named, in a suit brought by the Building Trades Council and other organizations of labor unions, to have the "permit system" of an organization of "open shop" employers declared an interference with the interstate commerce, and so unlawful.

Judge Dooling's decision was to that effect. The appeal was then taken direct to the United States Supreme Court, which reversed his judgment and ordered the original case dismissed in the district court.

In view of the importance of the final decision, and its future bearing in all parts of the United States on the "open shop" issue, Bldg. and Eng. News has selected from a complete copy of the judgment of the supreme court the following extracts, word for word, which fully present the material points involved and decided.

The suit was brought in the name of the United States against a number of voluntary associations, corporations, and individuals, charging them with engaging, and threatening to continue to engage, in a conspiracy to restrain trade and commerce in building materials among the several states, in violation of the Anti-Trust Act of July 3, 1890. It prayed for an injunction restraining the further execution of the alleged conspiracy; for a dissolution of certain of the associations as illegal, and for other relief.

After a hearing, Judge Dooling of the federal district court declined to dissolve any of the appellants, or interfere with their general activities, but entered a decree enjoining them specifically from requiring any person for the purchase, sale or use of building materials or supplies produced without the state of California and coming into that state in interstate or foreign commerce; making, as a condition for the issuance of any permit for the purchase, sale or use of building materials or supplies, any regulations that would interfere with the free movement of building materials, plumbers' or other supplies produced without the state; attempting to prevent or discourage any person without the state from shipping building materials or other supplies to any person within the state; or aiding, abetting or assisting, directly or indirectly, individually or collectively, others to do anything of the kind.

A reversal of this decree was sought upon the ground, mainly, that the evidence wholly failed to show any contract, combination or conspiracy in restraint of interstate or foreign trade or commerce, or a violation in any respect of the provisions of the Anti-Trust Act.

Extracts from the unanimous decision of the United States Supreme Court are published herewith.

"That there was a combination and concerted action among the appellants is not disputed. The various agreements, courses of conduct and acts relied upon to establish the case for the government arose out of a long continued controversy—or, more accurately, a series of controversies—between employers engaged in the construction of buildings in San Francisco, upon the one side, and the building trade unions of San Francisco, of which there were some fifty in number with a combined membership of about 99 per cent of all the workmen engaged in the building industries of that city, upon the other side.

The "Closed Shop" Enforced

"The unions rigidly enforced the 'closed shop'—that is, they denied the right of the employer to any workman, however well qualified, who was not a member of a San Francisco union; and this applied to a member of a labor union in another locality, who, moreover, practically was precluded from joining a San Francisco union by reason of the cost and onerous conditions imposed. They were confederated under the name of the Building Trades Council, by means of which their combined power was exerted in support of the demands and policies of each, until they had acquired a virtual monopoly of all kinds of building trade labor in San Francisco, and no building work of any consequence could be done in that city except in subordination to those demands and policies."

"The American" Plan

The decision, after outlining the history of labor troubles in San Francisco, proceeds to say:

"One of the appellants, the Builders' Exchange of San Francisco, with a membership of more than 1000 building contractors and dealers in building materials, in co-operation with the Industrial Association and other appellants, devised and put into effect, what is called the 'American Plan.'"

"The basic requirement of the plan was that there should be no discrimination for or against an employee on account of his affiliation or non-affiliation with a labor union, except that at least one non-union man in each craft should be employed on each particular job as an evidence, it is suggested, of good faith. In effect the 'American Plan' and the 'open shop' policy are the same.

"PERMIT" SYSTEM ADOPTED

"The principal means adopted to enforce the plans was the 'permit system,' the object of which was to limit sales of certain specified kinds of material to builders who supported the plan. To render this restriction effective, the person concerned was required to obtain a permit from the Builders' Exchange, specifying the kinds and quantities of materials to be furnished and the particular job on which they were to be used.

"The materials specified were cement, lime, plaster, ready-mixed mortar, brick, terra cotta and clay products, sand rock and clay products, sand rock and gravel. Substantially all of these were California productions and were deliberately selected for that reason, in order to avoid interference with interstate commerce.

"The only material exception was plaster, which was brought in from the outside, but consigned to local repre-

sentatives of the manufacturers or to local dealers in San Francisco, and brought to rest in salesrooms and warehouses and commingled with other goods and property, before being subjected to the permit rule.

Enforcing The "Permit" Plan

"There is evidence of efforts to extend the 'American Plan' to other cities and states. Permits were extensively withheld in respect of buildings where the 'American Plan' was not adopted or not enforced. Builders and contractors were constantly urged to observe the plan and were warned that failure to do so would result in a denial of future permits. A check was kept upon shops and building jobs by inspectors, and daily reports were made as to whether the plan was being observed. Whenever it appeared in any case that the plan was not being lived up to, a warning letter was sent out. Under appropriate by-laws, members of organizations subscribing to the plan, who violated it were fined and in some instances expelled; and other methods, not necessary to be recited, in part persuasive and in part coercive, were adopted and enforced in order to secure a thorough-going maintenance of the plan.

The Legal Issue Involved

"With the conflict between the policy of the 'closed shop' and that of the 'open shop,' or with the 'American plan,' per se, we have nothing to do. And since it clearly appears that the object of the plan was one entirely apart from any purpose to affect interstate commerce, the sole inquiry we are called upon to make is whether the means employed to effectuate it constituted a violation of the Anti-Trust Act; and, in the light of the evidence adduced, that inquiry need be pursued little beyond a consideration of the nature of the permit system, what was done under it, and the effect thereof upon interstate commerce.

Findings of The Lower Court

"The bases of the decree, which, in the opinion of the court below, were established, may be briefly and categorically stated as follows:

"1. Permits were required for the purchase of building materials and supplies produced in and brought from other states into California.

"2. Permits, even if limited to California produced materials, nevertheless interfered with and prevented the free movement of building materials and supplies from other states into California.

"3. Persons in other states were directly prevented or discouraged from shipping building materials and supplies into California.

No Interference Intended

"It will be well, in limine, to emphasize certain clearly established general facts, in the light of which these grounds must be considered. Interference with interstate trade was neither desired nor intended. On the contrary, the desire and intention was to avoid any such interference, and, to this end, the selection of materials subject to the permit system was substantially confined to California productions.

"While about 28,000 permits in all were issued, there is a significant absence of evidence that any of them

(Continued on Page 42)

Building News Section

APARTMENTS

Contract Awarded.

STORE & APTS. Cost, \$41,348
SAN FRANCISCO. Cor. Irving St. and Twentieth Ave.
 Three-story frame and stucco store and apartment building (10 apts. and 5 stores).

Owner—G. B. Jackson & Son, 1929 Irving St., San Francisco.
Architect—E. E. Young, 2002 California St., San Francisco.
Contractor—Carl Olson, 963 Sanchez St., San Francisco.
 Apartments will be thoroughly modern, steam heating plant, etc.

To Be Done By Day's Work.

APARTMENTS. Cost, \$15,000
SAN FRANCISCO. N Sacramento 81 E Divisadero Street.

Three-story and basement frame (6) apartments.
Owner—Shetter & Sons, 2201 Washington St., San Francisco.
Designer—Klaus Adler, 2210 Balboa St., San Francisco.

To Be Done By Day's Work.

APARTMENTS. Cost, \$40,000
SAN FRANCISCO. NW Thirty-fifth Ave. and Geary St.

Three-story and basement frame (18) apartments.
Owner—Wm. McDonald, 6140 Geary St., San Francisco.
Architect—M. Morrison, 601 42nd Ave., San Francisco.

Sub-Contracts Awarded.

APARTMENTS. Cost, \$250,000
SACRAMENTO. Sacramento Co., Cal. SE Eleventh and N Sts.
 Nine-story reinforced concrete apartment house (48 2 and 3-room apts.).

Owner—Manuel Lewis
Architect—Geo. C. Sellen & Co., California State Life Bldg., Sacramento.

Contractor—Wm. C. Keating, Forum Bldg., Sacramento.
Electrical Work—J. C. Hobrecht & Co., 1030 K St., Sacramento.

Reinforcing Steel and Steel Joists—Truscon Steel Co., 1015 10th St., Sacramento.

Millwork—Capital City Planing Mill, 815 S St., Sacramento.
Plastering—Thos. Scollan Co., 2919 T St., Sacramento.

Structure will be of Italian Renaissance style of architecture with flanking pavilions. Will have waterproof sandstone effect at base supporting a buff lime-stone colored exterior. Clay tile mansard roof. Top floor will house ball room.

Contract Awarded.

APARTMENTS. Cost, \$10,000
OAKLAND. Alameda Co., Cal. SE cor. 45th and Shafter Aves.
 One-story 15-room (5) apartments.
Owner—Morris & Meyers, 4109 Terrace St., Oakland.
Architect—None.
Contractor—Carl H. Franzen, 2574 Grove St., Oakland.

Additional Contracts Awarded.

APARTMENTS. Cost, \$150,000
SAN FRANCISCO. S Post St. 137 W Leavenworth St.
 Six-story and basement Class C apartment house, containing 53 apts.
Owner—Post & Leavenworth Realty Company.

Architect—Sylvain Schnaittacher, 233 Post St., San Francisco.
Contractor—G. P. W. Jensen, 320 Market St., San Francisco.

The following additional contracts have been awarded by the architect and owner:

Electrical Work—Smith Elec. Co., 50 Natoma St., San Francisco.

Plumbing and Heating—Scott Co., 243 Minna St., San Francisco.
Structural Steel—Central Iron Works, 2050 Bryant St., San Francisco.

Contract Awarded.

APARTMENTS. Cost, \$16,610
SAN FRANCISCO. Seventeenth St. near Castro Street.
 Three-story frame, brick veneer and plaster apartment building.

Owner—Hahn & Co.
Architect—Kuhn & Edwards, Commercial Bldg., San Francisco.
Contractor—Wm. Martin, 180 Jessie St., San Francisco.
 Store will occupy the ground floor.

Plans Completed.

APARTMENTS. Cost, \$50,000
SAN FRANCISCO. S Market St. 315 W Sanchez St.

Three-story and basement reinforced concrete and frame (12) apartments and stores.

Owner—Jennie Steineke, 1317 Hyde St., San Francisco.
Architect—E. H. Denke, 1317 Hyde St., San Francisco.

Completing Plans.

APARTMENTS. Cost, \$30,000
SAN FRANCISCO. South line of Pacific Ave. and Franklin St.

Six-story reinforced concrete apartment house to contain 24 three-room apts.

Owner—J. Greenbach, 180 Jessie St., San Francisco.
 Segregated bids will be taken in about ten days.

Building will have all modern conveniences, including steam heat, etc.

Painting and Flooring Contracts Awarded.

APARTMENTS. Cost, \$75,000
SAN FRANCISCO. Bush and Hyde Sts.
 Seven-story and basement reinforced concrete apartment house containing 42 two-room apts. Garage in basement to accommodate 15 cars.

Owner—J. Greenbach, 180 Jessie St., San Francisco.
Architect—None.

Painter—A. Zelinsky, 180 Jessie St., San Francisco.

Hardwood Flooring—Royal Floor Co., 620 4th St., San Francisco.

As previously reported concrete contract was awarded to the Mission Concrete Co., 125 Kissling St.; plumbing to E. V. Lacey, 180 Jessie St.; heating and sheet metal to Atlas Heating & Ventilating Co., 557 4th St.

To Be Done By Day's Work.

APARTMENTS. Cost, \$30,000
SAN FRANCISCO. N California 162 E Arguello Blvd.

Two-story and basement (16) apartments.

Owner—D. Emanuel, 325 Monadnock Bldg., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

 Sacramento.

NOTE.—Following K.C.B.-like "gems of literature" arrived at Sandy Pratt's crushed rock, clean sand and washed gravel emporium. It looks like Captain George Thomas, traffic manager for the Mack truck wrote it. Here is his stuff, stars and all—Sandy Pratt.

SANDY PRATT of Prattrock fame.
SELLS CLEAN, sharp sand.
TO A lot . . .
OF THE boys.
AMONG WHOM is Tommy Butler.
NOW, TOMMY Butler.
OWNS A sand bunker.
AT SEVENTH and Berry streets.
AND FROM that modern bunker.
BUTLER LOADS Sandy Pratt's sand.
FROM PRATTCO (Monterey County).
INTO STURDY Mack trucks.
MACK TRUCKS haul this sand.

SOLD TO Tommy Butler.
BY SANDY Pratt.
OF THE Pratt Building Material Co.
DOUGLAS 300—"easy to remember."
TO ALL points.
IN SAN Francisco.
THAT MAKES a great trio.
SANDY PRATT'S Amber sand.
TOMMY BUTLER'S bunkers.
HAULED IN Mack trucks.
EVER SO often.
CAPTAIN GEORGE Thomas.
WHO SELLS Mack trucks.
CORNERS TOMMY Butler.
GETS TOMMY.
INTO THE Mack plant.
AND BEFORE Tommy.
CAN SHAKE his blond head.
CAPTAIN GETS Tommy's name.
ON AN order.

FOR ANOTHER Mack truck.
THEN, TOMMY.
TAKES MORE orders.
AND BUYS more sand.
FROM SANDY'S sand plant.

AT PRATTCO (Monterey County).
AND THE new Mack truck.
IS KEPT busy.
HAULING "PRATTCO Amber" sand.
SO SANDY likes.
TO SEE Tommy Butler.
IN TOW by Capt. Thomas.
BECAUSE SANDY knows.
THAT TOMMY.
IS BUYING more Mack trucks.
TO SELL more Monterey sand.
"I THANK you."

Billy Feary, head of the Holmes Lime Company's ready mixed mortar plant, Bill told Sandy Pratt, president of the Pratt Building Material Co. and producer of hard, crushed rock; washed gravel and clean, sharp sand, that he would buy "Prattco Amber No. 4 (coarse) sand (from Monterey County) from Tommy Butler to put in his ready mixed mortar, because it improves the mortar.

Terazzo Sub-Contract Awarded.
SCHOOL. Cost, \$450,000
EUREKA, Humboldt Co., Calif.

Official Proposals

NOTICE TO CONTRACTORS

Columbian Park School—Oakland, Cal.
Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 12th day of May, 1925, at 9:45 o'clock A. M., at which time said bids will be opened for the erection and completion of the Columbian Park School Building, of the Oakland School District, facing on 72nd Avenue, and further described as Lots Nos. 5, 6, 7, 8, and 9 and 10 of Block D, being a portion of a one hundred acre tract described in deed to Mutual Investment Union, a corporation, dated March 31, 1904, and recorded April 15, 1904, in Liber 3600 of Deeds at page 267, in the office of the County Recorder of Alameda County, State of California. These bids will be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, Room 415, 532 16th Street, Oakland, California.

On a deposit of Twenty-five (\$25) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned and in each case shall be returned within ten (10) days after securing same. To the Superintendent of Buildings, if the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Oakland School District, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000) Dollars, but for all bids of less than Fifty Thousand (\$50,000) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 12th day of May, 1925, at 9:45 A. M., in the Board Room, 211 Second Floor of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO CONTRACTORS

Standard School District—Kern County

Pursuant to the direction of the Board of Trustees of the Standard School District of the County of Kern, sealed bids will be received at the place and time hereinafter mentioned by the School Board of said Standard School District for the construction and erection of a four-room brick building for school purposes, to be erected at a place to be designated by the Board of Trustees of the said Standard School District, the said four-room brick building to be constructed according to the plans and specifications for the same

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worthy while contractor and materialman in Central and Northern California who bids on public work.

Later: 10 cents per line, per insertion.

But official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

now on file with the Clerk of the Board of School Trustees, to-wit, Bert Brown, Post Office Address, Oildale, Kern County, California, and also on file in the office of Smith, Glass & Dupes, Architects, Room 25, New Fish Building, Bakerfield, California.

The said contract will be let to the lowest and best bidder.

That said bids must be accompanied with a certified check for ten per cent of the amount of the bid, said check to be returned in the event of the rejection of said bid or in the event of the bid being accepted, then the said certified check to be returned upon the execution and delivery to the Board of Trustees of the School District of a good and sufficient bond for the faithful performance of the said contract proposed to be entered into for the erection of said building.

Said bids must be sealed, directed to the said Clerk at the above address and delivered to the said Clerk at the above address or delivered to the said Architects for consideration by the Board prior to the 7th day of May, 1925, and thereafter the said bids will be opened on the 7th day of May, 1925, at the hour of 9 o'clock P. M. at the office of the Clerk of said School Board.

The Board reserves the right to reject any and all bids.

Ten Dollars must be paid by any bidder withdrawing the plans and specifications from the Architects or Clerk of the School District as security for the return of said plans and specifications, to be forfeited in case the plans and specifications are not returned.

W. E. SNELL,
BERT BROWN,
A. R. GANN,
Trustees of Standard School District.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on May 23, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

QUANTITY SURVEYOR
Valuation Engineer
ARTHUR PRIDDLE
603 Mission Street, at Third St.
San Francisco, Calif.
Telephone Douglas 2-0203
General Listing Bureau
Architect's Preliminary Estimates

Monterey County, between one mile north of Bradley and San Lucas (X-Mon-2-6, 11 & 1), about twenty-three and one-tenth (23.1) miles in length, to be widened with waterbound macadam shoulders.

San Diego County, a reinforced concrete girder bridge 30 feet wide, across San Mateo Creek about one mile north of San Onofre (VII-S.D-2-D), consisting of eight 50 foot spans on a concrete abutments and concrete piers.

San Bernardino County, between Santa Ana River and Redlands (VIII-S.D-26-A), about five and five-tenths (5.5) miles in length, three (3.9) miles to be paved with Portland cement concrete, and two and five-tenths (2.5) miles to be widened with Portland cement concrete shoulders and surfaced with asphalt concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Wilhite Building, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quality of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed to be the best interests of the State.

M. M. TOY,
LOUIS EVERING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: April 27, 1925.
(May 1-8-15-22)

NOTICE TO CONTRACTORS

A Variety of Work on the Same Machine

In addition to business correspondence the modern
Office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
cya cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.
Smith & Bros. machine.

Typewriters Rented

PERMIT SYSTEM WINS

(Continued from Page 6)

so issued related to other than such listed materials.

"Upon the proof, we reasonably cannot accept the view that these letters are enough to show a departure from the declared and established purpose of the movement on the whole, to avoid interference with interstate trade by confining the permit system substantially to California produced articles.

The Issue As To Plaster

"It is true, however, that plaster, in large measure produced in other states and shipped into California, was on the list; but the evidence is that the permit requirement was confined to such plaster as previously had been brought into the state and commingled with the common mass of local property, and in respect of which, therefore, the interstate movement and the interstate commercial status had ended.

"Second: That the permit requirement for California produced materials interfered with the free movement of materials and supplies from other states. No doubt there was such an interference, but the extent of it, being neither shown, nor perhaps capable of being shown, is a matter of surmise. It was, however, an interference not within the design of the appellants, but purely incidental to the accomplishment of a different purpose.

A Comparison With Strikes

"If an executed agreement to strike with the object and effect of closing down a mine or a factory, by preventing the employment of necessary workmen, the indirect result of which is that the sale and shipment of goods and products in interstate commerce is prevented or diminished, is not an unlawful restraint of such commerce, it cannot consistently be held otherwise in respect of an agreement and combination of employers or others to frustrate a strike and defeat the strikers by keeping essential domestic building materials out of their hands and the hands of their sympathizers, because the

means employed, whether lawful or unlawful, produce a like indirect result.

A Local Situation

"The alleged conspiracy and the acts here complained of, spent their intended and direct force upon a local situation—for building is as essentially local as mining, manufacturing or growing crops—and if, by a resulting diminution of the commercial demand, interstate trade was curtailed either generally or in specific instances, that was a fortuitous consequence to remote and indirect as plainly to cause it to fall outside the reach of the Sherman Act.

"Third: That persons in other states were directly prevented or discouraged from shipping into California. In respect of the alleged instances of direct interference with interstate sales and shipments, the evidence is sharply conflicting, with the preponderance in most cases, we think, on the side of appellants. In many of them the interferences had no connection with the 'American Plan' or the system and efforts employed to effectuate it but were in furtherance of independent trade policies or other isolated and disconnected purposes.

Exceptions of Slight Weight

"By the foregoing process of elimination, the interferences which may have been unlawful are reduced to some three or four sporadic and doubtful instances, during a period of nearly two years. And when we consider that the aggregate value of the materials involved in these few and widely separated instances, was, at the utmost, a few thousand dollars compared with an estimated expenditure of \$100,000,000 in the construction of buildings in San Francisco during the same time, their weight, as evidence to establish a conspiracy to restrain interstate commerce or to establish such restraint in fact, becomes so insignificant as to call for the application of the maxim, *de minimus non curat lex*. (The law takes no account of the inconsequential).

"To extend a statute intended to reach and suppress real interferences with the free flow of commerce among the states, to a situation so equivocal and so lacking in substance, would be to cast doubt upon the serious purpose with which it was framed.

"The decree of the court below must be reversed and the case remanded with instructions to dismiss the bill."

Illustration shows a Clyde three drum Steam Hoist with swinger attached operating a Clyde Guy Derrick handling the coal supply for the Hydro-Electric Light & Power Co., Connorsville, Indiana.

Wherever you go, you will find Clyde Hoisting Equipment playing an important part in the industrial life of the Nation.

Congress of March 3, 1879.

POWER DEVELOPMENT PLANNED

To help defray the cost of an extensive program of expansion on many portions of its territory in the San Joaquin Valley, the San Joaquin Light and Power Corporation has asked the railroad commission of California for authority to issue and sell \$1,000,000 par value of its 7 per cent prior preferred stock.

Foremost among the improvements contemplated are the erection of new substations at Kingsburg and Le Grand to cost \$250,000 and 300,000 respectively.

The entire program is to be undertaken under the annual budget appropriations aggregating approximately \$8,000,000, and will be an important step in the power corporation's preparation for a great increase in the demand for power, both for agricultural, industrial and domestic purposes.

In addition to the two new substations, additional equipment is to be installed in the substations at Kearney, Coarse Gold, Caruthers, Raymond, Henrietta and Weed Patch, and the Merced gas plant is to be rebuilt.

Southern Pacific Railroad will construct 12-mile extension of company's line from Valley Springs to site of Calaveras Cement plant at Kentucky House, one mile south of San Andreas in Calaveras county.

CALIFORNIA RANKS THIRD IN CEMENT PRODUCTION

California has been one of the leading Portland cement producing states since the installation of the first plant in this state in 1898 and now ranks third in the manufacture of this product, according to information contained in United States geological survey reports. This state also bears the distinction of being the leading cement producer west of the Mississippi.

The importance of the Portland cement industry to California is best exemplified by the consumption of fuel, in which it is second only to the petroleum industry. Last year the Portland cement industry used well over three million barrels of fuel oil. This industry, which converts rock into a highly manufactured product, enriches the state by about \$30,000,000 yearly.

In the case of Portland cement, California leads all states with a per capita quota of about two and a quarter barrels. California produced cement builds California road, street and alley pavements, homes, factory and office structures, and is used in myriad other ways.

In the building of concrete streets, California again topped her sister states. Last year this state contracted for the building of about 269 miles of pavement of the average width of 30 feet. California now has 1007 miles of this type of pavement. About twenty miles of concrete alley paving were also contracted for last year.

This state now ranks second in the total mileage of concrete rural highways, with 3466 miles. Illinois forged into the lead by building 1204 miles in 1924. California built only 173 miles last year, but indications are that this mileage will be exceeded in 1925. However, this state may well be proud of her system of improved highways, which is methodically being added to each year.

In 1924 this state produced about 11,615,000 barrels, an increase of about 5 per cent over the previous year. At the end of 1923 the California mills had a surplus of 290,183 barrels, and the production in 1924 was 121,000 barrels greater than the year's shipments, making a total surplus of some 400,000 barrels.

RECLAMATION HEAD GOES EAST TO DISCUSS IRRIGATION

A. T. Spencer, president of the state reclamation board, has left for Washington to discuss with government officials the Boggs plan for spending \$51,000,000 on reclamation and irrigation work in the San Joaquin River Valley.

If bills introduced by Senator Frank S. Boggs of Stockton and passed by both houses of the legislature are signed by the governor the state will contribute one-third of the money contingent upon a similar appropriation from the federal government.

Land owners in the valley have already pledged themselves to pay the remaining \$17,000,000 and Spencer's purpose in the national capital will be to promote the federal aid.

STATE WIDE MINERAL CONFERENCE SLATED FOR LOS ANGELES

California producers and users of minerals, as well as executives of related industries and utilities will assemble at the statewide mineral conference to be held in the New Chamber of Commerce building in Los Angeles, May 15 and 16. This meeting was called by the California Development Association at the request of the Department of Mines and Mining of the Sacramento Chamber of Commerce. All mining men interested are urged to attend. Vice President C. E. Jarvis, and Manager Bert F. Hews, will represent the Department.

President R. B. Hyle of the Association will be the general Chairman, while the session chairmen will be:

Morning May 15, W. J. Loring of the Northern Mining Group; Afternoon, Chairman Rush T. Sill, of the Southern Mineral Group; Morning, May 16th Executive Secretary Edwin Higgins of the Los Angeles Chamber of Mines and Oil.

Speakers and subjects will include: Paul Shoup, Vice President, Southern Pacific Company, "Relation of Transportation to our Natural Resources;" John Treanor, Riverside Portland Cement Co., "Cement Industry of California;" Athol McBean, President Gladding, McBean Corp., "Clay Products Industry of California;" W. J. Loring, Past President, American Mining Congress, "Increasing the Production of Metallic Minerals in California;" Max Y. Seaton, president Sierra Magnesite Company, "California's Production of Magnesite and Non-metallic." One of the Power Company's representatives will also speak on Hydro-electric Power and the Mining Industry.

Special problems to be considered include: Mineral production and consumption study, with view towards encouraging new markets and new mineral manufacturing payrolls; investigation of tariffs to obtain just protection against foreign competition in minerals; studies of taxation, transportation, labor, mining, and metallurgical problems; publicity campaign to broadcast the mineral opportunities in State and Coast; co-ordination of mineral and related industrial groups.

SOVIET GOVERNMENT SEEKS TO EMPLOY LOCAL ENGINEER

Reports that John B. Bubb, former superintendent of the Yuba Manufacturing Company's plant here, has been offered a position as consulting engineer for the Union of Soviet, Socialistic Republics of Russia, have been confirmed by Yuba officials.

The impression which Bubb made upon members of a commission from the Soviet government which recently visited America and spent considerable time at the Yuba plant in Marysville, led to his selection for the important post. If he accepts he will advise with Soviet agents in the mining of platinum in the Ural Mountains. The Yuba Manufacturing Company is now engaged on a \$2,000,000 contract for the manufacture of five dredgers for the Soviet power.

Bubb is at present in Seattle on business for the Yuba Company. His headquarters are in San Francisco.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

April building permits in San Francisco, totaling 994 and involving an expenditure of \$6,102,731, establishes another new construction record for this city.

Although the number of permits for the month just passed is somewhat less than for the preceding month when they numbered 1125, nevertheless the expenditures involved in April permits exceeds by \$971,766 those of permits issued in March of this year, the latter amounting to \$5,130,965.

Compared with April of last year, the month just ended shows a gain of \$1,066,058.

A comparison of building activities for the first four months of this year shows that San Francisco's building program is well under way, particularly for this time of year. More buildings are being erected than ever before and at a greater investment cost, proof of the fact that the expansion of San Francisco is developing at a most rapid rate.

The steady and continuous growth of building this year and compared with the corresponding period of 1924 will be seen from the following table:

	No. of Permits	Value	No. of Permits	Value
1925			1924	
January	875	\$3,403,623	773	\$3,178,413
April	994	6,102,731	1045	5,036,673
March	1125	5,130,965	994	4,652,932

There have been less strikes and labor troubles so far this year than in the corresponding period during any of the past ten years, according to the figures compiled on labor conditions by Roger W. Babson, statistician and business authority. "This is not a mere accident," according to Mr. Babson, "but is the result of certain fundamental conditions that are bound to affect the trend of trade unionism during the next ten years." Mr. Babson believes that the trade unions of America will have "poor business" for awhile because of the lack of outlet for surplus manufactured articles. During the war, plant facilities were increased to such an extent that we now manufacture 60 per cent more goods than we have a domestic market for. European trade would ordinarily assimilate this vast surplus, but Europe owes us \$20,000,000,000, and the only way she can pay us is in goods. Under this condition we shall likely see foreign made goods competing in our markets to such an extent that the production in this country will be considerably under the capacity of our greatly enlarged manufacturing plants. Organized labor is most successful in a market where the demand for men exceeds the supply and since conditions will be reversed for some little time to come, Mr. Babson predicts that labor will not be quite so aggressive in the future as it has been during the past few years.

The proposed ordinance which would limit the height of buildings in first and second residential districts in San Francisco will be heard before the City Planning Commission May 15. William H. George, president of the Builders' Exchange, has a petition signed by a number of organizations in protest to the ordinance as it now stands.

Northern Pacific Railway officials vote to construct 150 miles of railroad between Bend and Klamath Falls, Ore., at a cost of \$5,500,000. The line will be an extension of the Oregon Trunk Railway, according to A. D. Charlton, general passenger agent for the Northern Pacific at Portland.

Building permits issued in Sacramento for the first four months of 1925 totaled 1099 in number, valued at \$4,158,426, in comparison with 1214 permits, valued at \$2,819,426, issued for the same period in 1924.

Good concrete can be made from crushed limestone or hollow tile waste, the Bureau of Standards, Department of Commerce, finds. The only drawback to the use of such material is the angularity of the pieces, which makes the concrete flow less readily and makes it harder to handle by the methods used in large construction enterprises. This drawback can be remedied by oversanding, the Bureau believes. Large quantities of waste material accumulate around quarries producing dressed limestone, and the same is true of plants manufacturing hollow tile. An investigation was undertaken by the Bureau of Standards to see if this material could not be used for concrete. Test cylinders were made up, using several standard proportions, and using as the coarse aggregate limestone in some of the cylinders, crushed tile in others, and Potomac river gravel in others. The other conditions were made as nearly the same as possible. In the tests the limestone concrete proved slightly weaker than the gravel, and the tile concrete about one-fourth stronger.

Ed Hebern, inventor of the electric code machine and president of the Hebern Electric Code Company, was arrested in Oakland, May 1, on charges of violating the state "Blue Sky Law." Hebern's arrest followed a meeting of more than 100 stockholders of the company, mostly women, with deputies of the state corporation department and Prosecuting Attorney Fred Donahue. Warrants were also issued for the arrest of J. A. Wright, vice president of the company. It was charged that stock with a par value of \$1 was sold for \$5.

Forest acreage containing from 250,000,000 to 300,000,000 feet of lumber in the Fandango unit of the Modoc national forest, will be appraised and sold to the highest bidder within a short time, according to Paul G. Redington, of San Francisco, federal district forester. The tract is expected to furnish from 10,000,000 to 12,000,000 feet of lumber annually for 25 years and will require the services of 100 men.

J. M. Evans, for the past eighteen months city electrician of Modesto, has tendered his resignation to the city council to accept a more lucrative position under civil service with the state.

ALONG THE LINE

Fire originating in a hot box destroyed the mill of the Modoc Pine Company at Aspergrove, twenty-five miles north of Klamath Falls, Ore., May 5, with an estimated loss of \$125,000. The loss was partially covered by insurance. The mill employed about eighty men and had a daily capacity of 110,000 feet. The yard and offices of the company were untouched. The mill was owned by the Menefee Interests of Portland and did not run last season. It was purchased this Spring from J. O. Goldthwaite, Klamath Falls lumberman.

The Geyser Highway Association has filed articles of incorporation with Secretary of State Frank C. Jordan. The purpose of the organization is to promote the construction of a highway from Oakland to Geyser Springs, passing through Oakland, Pinole, Rodeo, Vallejo, Napa, St. Helena, Yountville, Oakville, Calistoga, Geyserville, Alexander Valley and Layton. The directors are: A. G. Haskell, St. Helena; John D. Cochrane, Napa, and T. D. Kilkenney, Vallejo.

Frank Davis, 26, lost his life at Bakersfield April 30 when he attempted to swim the swift water of the Kern river in the gorge at the Kern river canyon. He was an employee of the state highway commission and met his death after he is said to have volunteered to swim the river to place stakes on the opposite bank for one of the surveyors of the commission.

Albert H. Morgan, Jr., for two years a member of the Berkeley City Planning Commission, was unanimously elected president of the commission at a reorganization meeting of that body. Col. Edwin Landon has been named first vice president and Mrs. Aaron Schloss, second vice president.

Utah Construction Company of San Francisco and Salt Lake City has been awarded a contract by the Department of the Interior to construct the Guernsey Dam on the North Platte reclamation project in Nebraska and Wyoming. The contract price is \$1,288,121.

H. F. Holley has resigned as engineer of surveys and designs for the Nevada Highway Department to become assistant chief engineer of the Automobile Club of Southern California.

Monterey wants a city manager. Applications should be addressed to Arvill Campbell, city attorney, and must be accompanied by full details as to age, education, experience and references.

John L. Bacon, present mayor of San Diego, Calif., and an engineer, has been re-elected for his third consecutive term.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

"CLOSED SHOP" CONDITIONS HAMPER SCHOOL

Closed shop conditions in the building industries are indirectly hampering children of Cleveland, and other American cities, preventing them from being supplied with adequate facilities for their education, according to a report compiled by the American Plan Association of Cleveland, Ohio.

It is the claim of the organization that the cost of constructing school buildings is so much greater than it would be under open shop that funds, which should be ample to provide adequate facilities, do not meet the need for school room.

Based on finding in 58 American cities, the association asserts, it costs on an average of 30 per cent more to erect public schools in communities where the closed shop has sway than it does in cities where there is an open shop.

In Cleveland during 1924 the report states that it cost 47 cents per cubic foot for school buildings under the closed shop plan, as against 21 cents in Los Angeles under open shop conditions.

TRADES IN DES MOINES VOTE TO CONTINUE 1924 RATES

The majority of the building trades in Des Moines, Iowa, have voted to continue 1924 rates for this year. Structural iron workers will continue at the old rate of \$112½ until July 1, when the scale will go to \$1.25 under an agreement expiring March 31, 1926. Plasterers were raised from \$1.37½ to \$1.50 on April 1. Cement finishers were granted an increase from \$1.12½ to \$1.25 on April 1. Other rates are: common laborers, 67½ cents; bricklayer hodcarriers, 77½ cents; plaster tenders, 90 cents; painters, \$1.00; electricians, 1.12½; plumbers and steamfitters, 1.25; carpenters, \$1.12½.

BRICKLAYERS RENEW AGREEMENT

Announcement is made by the Associated Builders of Chicago that the present agreement with the bricklayers has been renewed for a period of one year at the old rate of \$1.50 per hour. The only change in the agreement is the addition of a clause which provides that "all checks issued must have the contractors name, office or home address and telephone number printed thereon."

APPRENTICE SCHOOLS BEING ORGANIZED IN SYRACUSE

The latest addition to the list of large cities where courses in the building trades are offered by the public schools is Syracuse. The classes which are being started will be under the control of joint committees made up of employers, union men and a representative of the Board of Education. Union officials have assured the contractors of their willingness to cooperate, and will compel each apprentice to attend the class in his particular trade.

PLUMBER HONORED

In recognition of two years of service as president of the San Francisco Master Plumbers' Association, in addition to active work before entering that office, the association has presented William P. Goss a beautiful chest of silver.

Electrical Meet Will Draw 2500 to San Francisco Next Month

The pilgrimage westward next month of some 2500 or more Eastern leaders in the electrical industry on the occasion of the forty-eighth annual convention of the National Electric Light Association to be held here June 15 to 19, is an event of great significance to the future development of the entire Pacific Coast.

This is the belief of Western leaders in the electrical field, who are completing plans for the reception and entertainment of what is said to be the largest single industrial organization in the country.

The convention will represent a business capitalized at seven billion dollars, its financing totals more than a billion dollars annually. Although the sessions of the convention will all be held here, the Pacific Coast as a whole will join in being host to these distinguished visitors. The registered attendance of the convention is expected to exceed five thousand.

Four special trains have already organized for Eastern delegations. Others will in all probability be added to these to accommodate sectional groups now being formed. A special housing committee has commandeered all of the best hotel facilities in San Francisco and broadcasted the news to association members that there will be room for everyone.

The interest of the East is two-fold—to attend the deliberations of this

meeting, considered one of the most important in recent years from the standpoint of program, and to see the great hydro-electric development of the West in which this section of the country has been the pathfinder.

The visiting Eastern captains of the electrical industry will personally inspect many of the big projects on the Pacific Coast.

A recent survey indicated that during 1925 alone the Western states will bring in some 585,000 horsepower in new generating capacity to serve the great region this side of the Rocky mountains. This program is conservatively estimated to represent an investment of approximately \$220,000,000 in dams, tunnels, power houses, transmission lines, substations and distributing systems.

One of the big topics for discussion at the convention will be the subject of customer ownership. This subject will be presented to the convention in a report of the public relations committee of the association, which has spent many weeks in study and preparation.

It has been five years since the National Electric Light Association has met on the Pacific Coast. During the intervening years the industries of the West have recorded many achievements which have commanded the attention of the East.

"American Plan" Recommended For Study by Portland Building Interests

O. G. Hughson, editor of the "Master Builder," the official organ of the Northwest Contractors' Association of Portland, Ore., and the Master Builders' Association of that city, recommends that the construction interests in that section study the "American Plan" system as operated in San Francisco in an effort to break "a stranglehold on the building industry" in Portland.

Under the caption "If there ever was a time," Mr. Hughson says:

If there ever was a time when the building contractors of this city should consider their obligation to the public in exerting their utmost endeavor to keep the cost of building construction within reasonable bounds, that time is now.

It was the general opinion of the building contractors not only of Portland but of the Northwest that there was nothing but conditions to justify any material raise in wages for 1925 but nevertheless, since that conclusion was arrived at \$1.00 per day increase has been demanded and granted to the plasterers and the bricklayers, and now the demand of the lathers for another \$1.00 has been granted. After July 1 there will be no more time and

one-half time for over work by the structural iron workers—all over time will call for double time. The wages for carpenters remain at present at \$8.00, but we have heard two contractors say they would not oppose very strenuously should the carpenters seek to place themselves up somewhere near the new scale for the other crafts. And so it goes. In this connection attention is called to the decision of the U. S. supreme court in the case of the district court of California against the material men of San Francisco, in which the decision of the lower court was reversed and thus the American plan becomes a legalized device for combating such conditions as obtained at the Golden Gate.

It would be well for those contractors upon whose shoulders falls the burden of fighting these battles for the public, to carefully post themselves on this San Francisco plan for breaking what was considered a stranglehold on the building industry there.

With the prospective rapid expansion of the city every consideration, it would seem, should be given those who stand ready to "freeze" their capital in the construction of buildings, for it is only by such construction that the city grows.

EXCHANGE TO BANQUET

The fourth anniversary banquet of the Contra Costa County Builders' Exchange, with headquarters in Richmond, will be held Friday evening May 15. Committees have been ap-

pointed and a complete report covering speakers and entertainment features will be submitted at the next regular meeting of the exchange. The event promises to be the biggest social affair undertaken by the organization.

Apprentice Training Movement in Cleveland Meeting With Success

(Special Correspondence)

A new era in the world of education in this country was initiated in Cleveland on Friday, April 10, 1925, when a group of building trade apprentices, who had completed certain prescribed work, were presented with diplomas by the public school system of that city. This is the first time that education has officially placed its stamp of approval as symbolized by a diploma upon men of brawn and skill rather than upon men of abstract learning and theory.

Those who witnessed the impressive ceremony, which was held in the auditorium of the East Technical High School, were convinced that the public educators of the country are beginning to realize their responsibility in the training not only of the minds but the hands of the youth of America.

The opinion was freely expressed on all sides that the first annual commencement of a building trade school, which was in the way of being somewhat a novelty, would within the next few years be a well established institution in every city.

Plumbers Start Movement

The apprentice training movement in Cleveland dates back to 1917 when a night class for sheet metal workers was organized. In 1918, a committee of master and journeymen plumbers decided that some provision must be made to recruit apprentices for that important branch of the building industry. This committee petitioned the Board of Education to assist in the work of starting and maintaining such a school. The request was granted and in the brief space of seven years the movement has grown until now in place of a handful of boys in one trade there are nearly one thousand boys in six trades attending the part-time schools.

All of the schools are conducted under the same general plan, which provides for a joint committee in charge, composed of an equal number of contractors and journeymen and a representative of the public school system. The schools come under the provisions of the Smith Hughes Act, which is a Federal Statute enacted in 1917, that provides for federal and state aid in apprentice training.

The Federal Board for Vocational Education and the State Board for Vocational Education have cooperated in every possible way with the Cleveland committees in making the apprentice schools successful.

Holds Pupil's Interest

One of the strong features of the Cleveland system is that every possible effort is made to keep the boy interested in his job and further to keep him steadily employed. Many trade schools in the past have prospered for a time and then failed utterly because too little attention was paid to these two important factors.

In order to retain the interest of the apprentices they are given instruction in both the theoretical and practical problems of their trade. A bricklayer for instance is not only taught how to lay brick in a wall, but he is also taught something of the history and development of this ancient art. He is also given instruction in the mathematics of his trade and learns how to lay out his work from plans which he himself has drawn. This same course is followed in all the trades with the

result that the apprentice looks upon his chosen trade somewhat in the same light as a professional man does his profession rather than merely as an avenue for a livelihood.

Motion Pictures Used

In addition, from time to time evening meetings are arranged at which moving pictures depicting certain phases of the manufacture of materials used by the students are shown. Not long ago the bricklayers were invited to attend a meeting of this kind where a picture was thrown on the screen showing the processes of manufacturing brick. At this meeting an architect delivered an address relative to the art of bricklaying, in which was emphasized the fact that the skilled mechanic is necessary in the proper development of the ideas which the architect has in mind when he draws a set of plans for a building.

In order to insure an apprentice that he will be given steady employment during his entire four year course each boy is indentured to a contractor in his chosen trade with the understanding that if his employer runs out of work he will be given temporary employment with another employer in that branch. Thus the danger of boys leaving before the expiration of their apprenticeship period due to unemployment is minimized.

Strict disciplinary measures are used on the boys who willfully absent themselves from the class-room or job. Each boy is taught the sacredness of the contract which he himself has entered into, and those who violate their agreement are dealt with severely.

Classroom and Job

Each apprentice spends four hours a week in the class-room for which he is paid by his employer, and the balance of the time is spent on the job. In this way the practical and theoretical parts of his trade are so correlated that when he is through he is a thoroughly trained mechanic.

Plumbers, bricklayers and carpenters to the number of one hundred and fifty made up the first graduating class. In addition to these trades, classes in painting and electrical work were organized early this year, while the sheet metal course, which was started in 1917, is still training apprentices in that trade.

Leaders in industry, labor and education were in attendance to offer their felicitations to the graduates. Secretary of Labor Davis, who was unable to be present, sent a message as did Franklin D. Roosevelt, president of the American Construction Council.

A number of the officers of national contractor associations, international and state labor organizations were in attendance.

One of the speakers of the evening was Matthew Woll of New York, vice president of the American Federation of Labor. He said in part: "Here we have the realization of labor's concept of education. Here is apprenticeship in the hands of the schools, advised by industry as represented both by the employer and the employee."

Apprenticeship Revived

"Apprenticeship is not dead. It is being revived and applied in modern terms. Labor is happy to cooperate with the school system of America, which it helped to nourish. In it we find the great hope of the masses and

the solution of many of our most pressing problems.

"The first attempts to utilize the schools for trade training secured no enthusiasm from labor. It was an attempt to seize the schools and operate them as a factory to produce skilled workers who would operate machines for profit alone. To that we were opposed."

"But we do approve of this, for it produces citizens, not automata. It is developing again a pride in workmanship and it is making the shop not a place of toil alone but a place of education. From that education shall arise a better understanding between employer and employee and a better and more just distribution of the fruits of toil."

"I say to you graduates, value these diplomas as highly as do those entering the professions value theirs. I would rather have the diploma of essential and skilled workmanship than that of any lawyer or doctor. For we are needed as much as they."

J. C. Wright of Washington, D. C., director of the Federal Board for Vocational Education, said in part: "Tuesday marks one of the most encouraging chapters in the development of what has been so well termed—The New Apprenticeship. To have a commencement exercise such as this for a group of apprentices who are completing their preliminary training and are about to enter upon their careers as skilled and qualified craftsmen in the construction trades, marks an epoch in American industry and craftsmanship."

Commends Movement

"This occasion is noteworthy not merely as an indication of the appreciation of well trained and skilled craftsmen in Cleveland, but it is significant in its relationship to a nationwide development of interest in the training of skilled workers. What has been done in Cleveland is being accomplished with varying degrees of success in many other places. The scope of this new apprenticeship extends from coast to coast and from Canada to the Gulf and the work which is being developed in all these places shows a steady and consistent tendency toward greater efficiency."

"While it is true that much is needed in addition to a plan of organization, no scheme of apprenticeship has a chance to succeed if it is built upon an insecure and unstable foundation. The finest possible group of apprentices, the best and most skillful instructors, the latest and best courses of training, the best tools and materials and the best jobs in the world on which to work are of little value unless they are integral parts of a superstructure, which has a solid and substantial foundation with cooperation as its cornerstone. Here in Cleveland effective cooperation in the training of apprentices has been realized. There has been some difficulty, as there always is in connection with the performing of any great or important work, but as Roosevelt said: 'Difficulties are things to be overcome.'"

"The big problem then is how can education and labor be most satisfactorily combined. This is not a new problem and Abraham Lincoln recognized its existence when in 1859 at Milwaukee he uttered these words:

More About Belgian Cement

"Educated people must labor. Otherwise education itself would become a positive and intolerable evil. No country can sustain in idleness more than a small percentage of its numbers. The great majority must labor at something productive. From these premises the problem springs. 'How can labor and education be the most satisfactory combined?'"

Another prominent speaker was Walter Kile of Cleveland, president of the Associated Plumbing Contractors and past president of the National Association of Building Trades Employers. He delivered an excellent address on the romance and development of the construction industry from the beginning of civilization down to the present time. He also outlined the development of the apprenticeship training movement in Cleveland.

Secretary of Labor Davis in his message, which was read by Mr. Wright, said in part: "The old system of apprenticeship under which the master and the apprentice worked side by side cannot be revived. It does not fit into modern production. Education through the public schools offers the modern solution to the problem."

"We are rapidly restoring the dignity of labor and are overcoming that tendency to look upon work with the hands as degrading and menial. Work is happiness. There is no joy that stirs the human heart that is so complete as the sense of work well done, of a task completed."

Industrial Advancement

Mayor Clayton C. Townes brought a message of felicitation from the city administration and called the commencement exercises "another forward step in the social and industrial life of Cleveland." Supt. of Schools, R. G. Jones, in a brief address stated that the public school system of Cleveland welcomed the opportunity of being of service in the work of training apprentices and expressed the desire that more and more interest in the matter might be created.

The diplomas were presented by E. M. Williams, president of the Board of Education. Charles H. Lake, assistant superintendent of schools, presided and the invocation was asked by Rev. L. C. Wright, fraternal delegate from the Federated Churches to the Cleveland Federation of Labor.

Every speaker on the program called attention to the fact that the success of the movement in Cleveland was due to the spirit of cooperation manifested on the part of the participating groups, namely, employers, employee and public school officials.

GAS HEATERS SHOULD BE VENTED

Los Angeles has learned in a striking manner, during the last few months, that a gas heater which merely provides warmth is dangerous, according to a recent statement of A. J. Hartfield, president of the Pacific Gas Radiator Company.

"Heating engineers know that it is just as dangerous to burn a gas heater in an unventilated room as it is to burn a coal or wood stove without a stovepipe to take care of the gases outside," he said.

According to Mr. Hartfield's statement it is not generally known that a vented gas radiator circulates air or draws in air through keyholes, under the door, through cracks in the windows and in a hundred and one places in a room which apparently are closed to outside air.

"It is a recommendation of a vast majority of heating engineers," he added, "that installations in gas heating appliances be made by experts."

"The Knave" in the Oakland Tribune, under date of May 3, discusses the use of Belgian cement in California, as follows:

"Construction circles hereabouts are giving a wondering attention to a veiled threat made by representatives of Belgian cement firms. The recent agitation seeking the use of California cement on highway work done here is said to have brought an assertion from the Belgian competitors that reprisals would be in order and that effects upon the California fruit markets in Belgium may be expected. I have it on good authority that this impression was created and certainly the story has been carried in all parts of the state. When all of the arguments are laid on the table and official Belgium takes cognizance there will be no boycott for it is next to impossible to believe that

the attitude of a few representatives of cement firms will be shared by those who view the question with open minds. California's tax system, levying upon corporations, brings a situation which means a positive saving when the local cement is used. The railroad haul on 7000 tons of cement, an amount recently shipped in from Belgium, amounts to a large sum upon which the state lost \$4000 in taxes. Then there is the tax figure which the state would have netted had California power supplied the energy in making the product. But all of this, even, is more or less beside the point. Belgium would not buy California fruit if she raised the same fruits herself. Indeed, she would seek to have her people consume the local supply, just as Californians are asking that the local cement be used. At any rate, the argument is assuming large proportions."

East Bay Water Co. Moves to Bring in Sacramento River Flood Supply

Asserting that water must be delivered to the East Bay cities within less than two years to prevent a possible shortage in 1927, the East Bay Water Company has filed an application with the Railroad Commission requesting authorization to bring in an additional water supply from the flood waters of the Sacramento river.

Edwin O. Edgerton, president of the water company, in a statement fixed the estimated cost of the project at \$9,500,000 and declared that "The Sacramento can be made an essential unit in the Mokelumne project."

Edgerton's statement follows in part:

"The records of East Bay Water Company show an uninterrupted growth in population and industry in the territory served with water."

"Reliable evidence indicates that there is immediately ahead great forward strides by the east bay communities in growth and prosperity."

"This advance depends definitely upon an adequate water supply."

"The time has come when the public must be bluntly told that unless work starts on a water project immediately, to be completed to the point of actual delivery of water within less than two years, there is a possibility of water shortage in 1927. Each year thereafter the condition may become increasingly critical. Inaction means that the people are gambling the prosperity and growth of the east bay communities on the highly uncertain weather conditions."

"No construction has been commenced and there is no immediate prospect of sufficiently speedy action being taken unless this company acts."

"The people by vote created the East Bay Municipal Utility District in May, 1923, nearly two years ago and in November, 1924, by vote authorized the issuance of bonds to bring in a distant water supply."

"These bonds are now in litigation as serious question has been raised as to their validity and no money is available from this source."

Sacramento River Supply

"The engineers of East Bay Water Company, who for years studied the water supply problems of the East Bay cities have established the following facts:

- "1. Ample flood waters of the Sacramento river are available for delivery to our San Pablo reservoir.
- "2. This supply is the shortest distance of any from our reservoirs.
- "3. This water can be brought in within the shortest period of time.
- "4. The cost of this water would be the lowest as compared with any other supply.
- "5. This water will be delivered to consumers clean, pure, palatable, soft and in every respect satisfactory for domestic and industrial use. As to purity, by actual test this water will meet the most rigid requirements of the health authorities."
- "6 The investment to bring it in would be comparatively small, the estimated cost being \$9,500,000.
- "7. This project will fit into any plan for future water supply.
- "8. The immediate construction of a line from the Sacramento river to our San Pablo reservoir will fully insure the east bay communities against a water shortage in 1927 and thereafter.

Could Join Mokelumne Later

"The proposal of East Bay Water Company would in no degree obstruct or prevent the public from developing the Mokelumne or any other supply, as the Sacramento project can be made an essential unit in the Mokelumne project. We will welcome the cooperation of the Utility District."

"This enterprise would not result in any profit to the East Bay Water Company as it would only be allowed an interest return on the money actually invested."

"This company has a trained organization of experienced men who have demonstrated their ability to economically and efficiently construct works representing millions of dollars. The organization is available immediately to start work on the project."

"Under these circumstances the directors of East Bay Water Company after the most serious consideration have determined to meet this situation by building a system to bring in the flood waters of the Sacramento river."

"To that end application has been made to the Railroad Commission. If the Railroad Commission after public hearing and a complete exposition of the facts gives the necessary authorization, East Bay Water Company will proceed with this project unless prevented by causes beyond its control."

TRADE NOTES

Mayer Construction Co., "builders of distinctive homes," has opened offices at 518-520 Oakland Bank Building, Oakland. The principals in the new organization are Otto W. Mayer and H. H. Canham. The company has a complete building organization, including a department for the development of ideas expressed by the prospective owner. Seven homes are at present under construction. Carl Walstrom, well known in the Oakland section, has been engaged as building superintendent.

Representing the Rock Products Company of Reno, Nevada, Judge Frank H. Norcross, John A. Fulton and W. L. Walmsley, are reported to have closed a deal with Claus Spreckels of San Diego, for the purchase of the plant of the Granite Manufacturing Company at 209 Utah Street, San Francisco. The heavy demand for Rockada products on the Pacific Coast has made necessary the purchase of the plant. The company now has plants in Reno, Oakland and San Francisco.

Leroy H. and Mary A. Lynn of Salinas announce the sale to Clarence Tynan of the Salinas Planing Mill at Salinas. All business transacted after May 1 will be handled by the new owners.

J. H. Collins, for the past seven years operating as a painting contractor in the San Joaquin Valley section, has opened a paint and wall paper store at Manteca, and will handle a complete line of Magner Bros. paints.

General Contracting Company, capitalized at \$50,000, with the principal place of business as San Francisco, has been incorporated. Directors are: J. E. Burke, C. L. McEnerney and P. J. Mullins.

Decker Electrical Construction Co., formerly located at 149 New Montgomery street has moved to new and larger quarters at 538 Bryant street, San Francisco.

A charter has been filed at the State Department, Dover, Del., by E. C. Peck, of Sacramento, California, for the United Lumber Yards, Inc. The capital stock is placed at \$8,000,000.

HIGHWAY COMMISSION TO OIL SKYLINE BOULEVARD

In an effort to relieve the dust situation on the Skyline Boulevard in San Francisco and San Mateo counties, the California Highway Commission has authorized the expenditure of maintenance funds for an application of road oil on the recently graded sections. Because of the heavy traffic over this highway calcium chloride, used as a dust preventive last Summer, was not wholly satisfactory and road oil will be tried this year. Due to the necessity for settlement of heavy grades and fills, a rock surfaced highway will have to be maintained on this route for several years. Other roads in the San Francisco bay district, which will be oiled, include the Black Point cut off in Marin, Sonoma and Napa counties; the recently completed Beltane-Schellville highway in Sonoma county, and sections of the Pacheco Pass highway, east of Gilroy.

Proper Advertising Sells Paint Products in West Indies

Proper advertising is recommended as a means of developing the American paint and varnish trade in the West Indies, according to J. W. Wizeman, Chemical Division, Department of Commerce, in a pamphlet just issued, entitled "Paint, Pigments, and Varnishes in the West Indies." The importance of this market for these materials is evidenced by the fact that American shipments during 1923 (the latest statistics available), amounted to over \$2,500,000, or one-eighth of the total amount shipped from the United States to all countries.

The almost total absence of paint-manufacturing establishments in the West Indies makes the territory an excellent market for imported materials, the pamphlet shows. Mr. Wizeman points out that the need for protection against natural deterioration is great, because of climatic conditions such as heat, copious rains, salt air, etc. In addition, there are the ravages of insects and fungus growths to contend with.

These conditions require special compositions in some sections, according to the pamphlet, and several American manufacturers have developed suitable materials upon which they have built up an excellent trade. Other manufacturers have attained good results by concentrating their efforts on the marketing of a few of their specialties. It therefore behooves manufacturers, it advises, to study their markets carefully and push the sale of the products that they know will render service to the consumer. The United States supplies a large share of the paint requirements of some of the islands, while in others the competition of Canadian and British manufacturers is severely felt.

Though the group of islands in the West Indies comprises Cuba, Porto Rico, Dominican Republic, the Bahamas, Haiti, Jamaica, Trinidad, Bermuda, Barbadoes, Dutch West Indies, Virgin Islands of the U. S. and the French West Indies, all of these save Cuba and Porto Rico are insignificant in their prospects. Cuba, Mr. Wizeman points out, on the other hand, is an ideal market for the American paint manufacturer, both because of its proximity to the United States, the rather large purchasing power of the people, and a tariff preferential granted America paints under the Cuban treaty of reciprocity.

"It will be found decidedly advantageous," says Mr. Wizeman, "to win the support of the interior decorators and house painters through the medium of instructive but brief semi-technical literature printed in Spanish. A wider circulation of American trade journals, as well as occasional advertisements in the Cuban daily papers should promote the sale of American paints in general, and of the brands advertised in particular."

The full report is published as Trade Information Bulletin No. 341, "Paints, Pigments, and Varnishes in The West Indies," and outlines in detail the many phases of trade with all the West Indies, including a discussion of peculiarities and styles of construction requiring paint materials, importance of price considerations, preferred terms, and proper presentation of goods in the island markets. The bulletin may be had upon application to the Superintendent of Documents, Government Printing Office, Washington, D. C., or any district office of the Bureau of Foreign and Domestic Commerce. The price is 10 cents.

Building Officials Witness Severe Timber Test at Madison

The members of the Municipal Building Officials Conference, which held its eleventh annual convention at Madison, Wis., spent a day at the Forest Products Laboratory of the United States Forest Service inquiring into the numerous investigations the laboratory is conducting into the characteristics and qualities of wood as a building material. One of the problems lumber manufacturers and dealers have to deal with is the effect of knots in joists and columns as well as other wooden members of buildings that are subjected to heavy strain. Tests were especially arranged to enlighten the delegates on this point.

The laboratory scientists explained that the load which can be carried by a long column, that is, one whose length is about twenty or more times its least dimension, is dependent on stiffness and not on its crushing strength. Consequently, the effect of knots on bending strength is very great if they happen to be at a critical point while their effect on crushing strength is less and their effect on stiffness is very small. Hence, low grade defective material, if sound, can be effectively used, even for long columns in heavy mill construction. The tests the building officials witnessed are the final ones in a series of tests of southern yellow pine and Douglas fir columns up to twenty-four feet in length. In one of the tests, a very

knotty column twelve by twelve and twenty-four feet long, of Douglas fir, sustained an actual load of 270,000 pounds. The previous test of this column showed that, notwithstanding the knots, it was a very stiff piece of timber and should, theoretically, support 266,000 pounds.

A number of interesting tests of the strength of beams and joists showed that in practice knots do not materially impair it except when they are on the bottom or tension side, and near the center of the load. A knotty joist, having the knots on the bottom, was able to stand a load of only 2,200 pounds, whereas one with the knots on the top or compression side stood 4,300 pounds and an absolutely clear piece 5,470 pounds.

The final results of these tests make it possible to establish rules for the grading of timbers for structural purposes so reliably that builders who are familiar with them can adapt joists, beams and columns according to the loads they are likely to bear, without rejecting material on account of the presence of knots. This is of great importance in a number of ways, not the least of which is the conservation of forest materials, as these large members require large amounts of forest material, and waste on account of apparent but not actual defects in practice would unnecessarily deplete the forests.

**ENCINAL TERMINALS COMPANY TO
BUILD THIRD UNIT OF PIER
PROJECT**

Completion of the second million dollar unit of the Encinal terminal on the estuary next September 1 is to be followed at once by a third pier to be built on a parallel line with the estuary, it is announced by C. M. Covell, president and general manager of the Encinal Terminals company of Alameda.

The completion of the second unit and plans which call for the building of 10 piers at a total cost estimated at nearly \$10,000,000, will mark another step in Alameda's growth as a world port. This event, next September, is to be celebrated with a city-wide carnival being planned under the auspices of the Alameda chamber of commerce and other civic and commercial bodies.

The pier, which is to be completed at that time, will combine with the original pier finished last February, making a docking space 1500 feet in length and nearly 300 feet in width. The two units will represent an investment of nearly \$2,000,000.

The pier will be an open dock, 500 feet long and 80 feet wide, to cost approximately \$100,000. The three piers will then form an "L" shape, each bordering on deep water and with rail connections.

That a fourth may soon be started either on the west side of Alaska basin or in Fortson basin is revealed by Covell, who says the present piers are being used to capacity by shippers and his company intends to increase its facilities just as quickly as the traffic demands.

**PAVING CONCERNS ARE HIT BY
BERKELEY OFFICIAL**

Representatives of patented paving concerns are charged by City Manager John N. Eddy of Berkeley with having inserted "jokers" into measures sponsored in the legislature by the California League of Municipalities which virtually nullified the effect desired by the cities.

"Assembly bills 1294, 1296 and 1298," said Eddy, "have been so emasculated by the paving interests that they will accomplish little, even should they be signed by the governor. In their present form they cover only competitive bidding on sewers, and do not affect paving, the original object in introducing the bills."

The league of municipalities backed senate bill No. 685, designed to bring about competitive bidding on the part of patented paving concerns, but switched to assembly bills No. 1294, 1296 and 1298 when it was found S. B. No. 685 only affected sewers.

Now, said Eddy, "we find that these latter bills have been robbed of their effectiveness by the paving concerns' jokers," so that we have made no real progress in our move to secure real competitive bidding."

**SACRAMENTO ARCHITECTS' AWARD
INSIGNIA PRIZES**

The Architects and Engineers' Club of Sacramento has placed the awards in the competition for a design of insignia to be used by the club. H. W. DeHaven was given first prize; J. Lee Cunningham, second prize, and R. M. Eskil, honorable mention. The judges were Arthur H. Memmler, Eugene Seadler and Frederick Ruckh.

The committee appointed to examine and criticize the proposed building code for Sacramento and other cities written by Mark C. Cohn of San Francisco, announced that it would deliver a complete report at the next meeting. This committee consists of Messrs. C. H. Kromer, Memmler and Ruckh.

Here, There and Everywhere

Special Correspondence

Loss Due To Unemployment

The report of the Hoover committee on waste in industry contains the information that the loss of wages in the building trades due to seasonal fluctuation amounts to \$500,000,000 annually. When to this enormous bill is added the losses sustained by all the other elements in the industry it is apparent that the habit of postponing construction awaiting more favorable weather conditions is a costly one. Much has been done during the past two or three years to correct this condition. From the above figures it is seen that the movement on behalf of winter construction has not been entirely successful, and that much remains yet to be done. However, a start in the right direction has been made. The average contractor is equipped to render just as efficient service in winter as he is in summer. The fault lies largely with the building public which still believes that it is impossible to maintain warm weather efficiency during the winter months. This wrong impression can only be corrected through an intensive publicity campaign in which attention is drawn to specific major construction projects that were successfully put through during the winter season.

Strike Ended

Prompt action on the part of the Associated Building Interests of St. Louis brought an end to the strike of hoisting engineers and further settled the possibility of any serious labor troubles in that city for this year. Although only fifteen members of the union went on strike April 1 in an endeavor to secure an advance in wages the contractors took the stand that the agreement had been violated and proceeded to lock out the rest of the members of the union. As a result of this action many men in other trades were thrown out of work because of the refusal of a small group to accept a renewal of last year's agreement offered by the employers. The engineers returned to work on April 15 after having accepted the demands of the contractors that a new agreement eliminating certain objectionable features be drawn up within thirty days. As a result of the failure of the strike it is believed that the laborers will not press their demands for a 1½ cent increase on June 11.

Long Term Agreements

A long term contract between the building trade mechanics and their employers, in order to stabilize the construction industry in the District of Columbia to take care of the present building boom and the pending large government contracts, will be one of the principal suggestions to be made by John Colpoys, mediator for the Department of Labor, should he succeed in his efforts to bring the union men and the contractors of Washington into a conference. As to what wage rates this would involve seems to be the crux of the situation. It is understood that the men will be unwilling to enter into three year agreements unless higher rates are included, while on the other hand the employers are unfavorably inclined toward signing long term agreements at \$9 a day rates.

Conference Postponed

The conference between officers of the Bricklayers, Masons & Plasterers International Union and the Operative Plasterers & Cement Finishers International Association, which was scheduled to be held in New York on April 16, was postponed. It is understood that another attempt is being made to get the two factions together in an endeavor to have the differences ironed out. The truce between the two groups arranged at a former conference still continues to be in force and the men who were called out on jobs in New York, Chicago, Philadelphia and one or two other cities are back at work.

Sign Agreement

An agreement has been consummated between the Building Trades Employers' Association of Pittsburgh and the Hoisting and Portable Engineers' Union calling for a wage scale of \$13.1¼ per hour when operating any machine under the jurisdiction of the Engineers' Union, excepting steam shovels, Keystone diggers, pile drivers, locomotive cranes, double drum hoists and derricks, for which men will be paid \$6.25 per week of 44 hours straight time not to include pay for holidays.

Voting Employers Offer

The various building trade unions of Boston are voting on the proposal evolved at a recent conference of a committee of fourteen members composed of seven representatives of the Building Trades Employers' Association and an equal number from the Building Trades Council, the terms of which provide for the signing of three year agreements, the wage rate for the first year to be the same as the 1924 scale, after which time either party seeking to change the rate will give proper notice and submit the matter to a board of arbitration. It is believed that all the unions will ratify the proposal inasmuch as it has already met with the approval of the Building Trades Council.

Return To Work

Members of the glaziers union of Cleveland, who have been on strike since March 1, returned to work on April 22 pending arbitration of their differences with the employers. The employers will be represented by the arbitration committee by W. P. Carroll, Secretary of the Building Trades Employers' Association, while the union representative will be Clark Beach, Business Agent of the Painters District Council. Another member will be selected by the present members of the committee.

Seek Increase

Structural iron workers and electricians in Syracuse, New York have served notice on their employers that when their present agreements expire they will expect increases. In the case of the former this amounts to 13½ cents an hour while the electricians have not as yet made known the amount they will demand. Rod workers who now receive \$1 a day less than the structural iron workers are asking to be raised to \$9 a day, the rate now paid the latter.

APARTMENTS

Contract Awarded on Cost Plus Basis
APARTMENTS Cost, \$500,000
SAN FRANCISCO—NW Pacific Ave and Laguna St.
 Ten-story steel frame and concrete community apartment house, 67x137
 Owner—Miss G. A. Shaffer et al, 500 Sutter St., San Francisco.
 Architect—Hyman & Appleton, 68 Post St., San Francisco.
 Contractor—Cahill Bros., 55 New Montgomery St., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$13,000
SAN FRANCISCO W Mission St. 110 N Niagara Ave.
 Three-story frame and stucco apartment flat building (2 apt. flats and 1 store).
 Owner—Jas. Mancuso, 5172 Mission St., San Francisco.
 Architect—J. A. Porporato, 619 Washington St., San Francisco.
 Contractor—John P. Cuneo, 110 Amazon St., San Francisco.

Commissioned to Prepare Plans.
APARTMENT Cost, \$100,000
SAN FRANCISCO SW California and Taylor Sts.
 Fifteen-story Class A community apartment building with adjoining garage for tenants.
 Owner—Huntington Community, Inc., 200 California, Manager.
 Architect—Weeks & Day, 315 Montgomery St., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$42,135
OAKLAND NW 28th and Grove Sts.
 Three-story store and apartments.
 Owner—Guillaume Hourcade, Oakland.
 Architect—Clay N. Burrell, American Bank Bldg., Oakland.
 Contractor—Niles W. Place, 2031 Broadway, Oakland.

Contract Awarded.
APARTMENTS, ETC. Est. Cost, \$35,000
SAN FRANCISCO Mission Street and Richland Avenue.
 Three-story store and apartment house (frame and stucco construction)
 Owner—M. Demecio.
 Architect—Mark T. Jorgensen, 110 Sutter St., San Francisco.
 Contractor—W. E. McDonough, 225 Powell St., San Francisco.
 Building will contain large single market on ground floor, two stories above to contain eight 2 and 3-room apartments and one 6-room apt.

To Be Done By Day's Work.
APARTMENTS Cost, \$17,500
SAN FRANCISCO NE 16th Ave. & Judah.
 Two-story and basement frame (5) apartments.
 Owner—M. Sullivan, 416 Dolores St.
 Architect—J. J. Foley, 770 5th Ave., S. F.

Plans Being Prepared.
APARTMENTS Cost, \$30,000
SAN FRANCISCO St. Francis Wood District.
 Three-story frame and stucco apartment and store building to contain eight 3-room apts. and 3 stores on ground floor.
 Owner—Withheld.
 Architect—Fabre & Hildebrand, 110 Sutter St., San Francisco.

To Be Done By Day's Work.
APARTMENTS Cost, \$18,000
SAN FRANCISCO SE Clement & 8th Avenue.
 Three-story and basement frame (12) apartments.
 Owner—J. M. Foscus, 323 Clement St., San Francisco.
 Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$22,500
OAKLAND NW 49th & Clarke Sts.
 Two-story 24-room apartments.
 Owner—Glia Schwartzfeld.
 Architect—None.
 Contractor—Pacific Coast Bldg. Co., 354 Hubart St., Oakland.

To Be Done By Day's Work.
APARTMENTS Cost, \$12,000
SAN FRANCISCO NW Castro and Alvarado Streets.
 Three-story and basement (5) apartments.
 Owner—James Smith, 914 Folsom St., San Francisco.
 Designer—M. J. Hansen, Civic Center Hotel, San Francisco.

To Be Done By Day's Work.
APARTMENTS Cost, \$15,000
SAN FRANCISCO SE Lincoln Way & 2nd Ave.
 Two-story and basement frame (10) apartments.
 Owner—Fred Warden, 1515 11th Ave., San Francisco.
 Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$50,000
OAKLAND N 10th St., 100 W Grove St.
 Three-story 36-room apartment.
 Owner—M. A. Weaver, 1636 Franklin St., Oakland.
 Architect—None.
 Contractor—California Builders, Inc., 1636 Franklin Ct., Oakland.

To Be Done By Day's Work.
APARTMENTS Cost, \$12,000
OAKLAND E. 23rd Ave., 100 S E 22nd St.
 Two-story 16-room apartments.
 Owner—A. J. Agrelli Jr., 1811 E 19th St., Oakland.
 Architect—None.

Working Drawings Being Prepared.
APARTMENTS Cost, \$28,000
SAN FRANCISCO
 Two-story frame and stucco apartment house containing twelve 2-room apts.; T & G roof; all modern conveniences.
 Owner—Withheld.
 Architect—Richard R. Irvine, Call Bldg., San Francisco.

Plans are being prepared for a contractor whose name is withheld at this time. Will construct by day's labor.

LOS ANGELES, Los Angeles Co., Cal.—Wm. Feigenbaum, 1943 N 37th Pl., will build 4-story, 95-room, 47-family Class C apartment building, 122x40 ft., at 425 S. Bonnie Brae St. for self; ruff. brick face, art. stone, wrought iron, fire escapes, structural steel, pine trim and floors, tiled baths and sinks, skylights, incinerator, automatic electric elevator, Arcola heating and gas-steam radiators. Cost, \$110,000.

LOS ANGELES, Los Angeles Co., Cal.—Arthur C. Wright Co., 1425 W. 6th St., are taking sub bids for four-story, 95-room brick apartment building, 48x139 feet, at 165 S. New Hampshire Ave., for Percy M. Roberts; tile and slate roof, cast stone trim, fire escapes, tile baths and drainboards, gas steam heating system, tile, cement and hardwood floors, pine and hardwood trim, wall-beds, built-in-refrigerators, elevators, landscaping; \$95,000.

SEATTLE, Wash.—Albertson, Cornell Bros. & Walsh, 112 Massachusetts St., at \$325,000 awarded contract by Dr. C. S. Leede to erect six-story and basement, 120 by 120 ft., apartments at Borch Ct. and Union St. Henry Blttman, architect, Securities Bldg., Seattle. Contract does not include plumbing, heating, electric work nor excavation. Will be reinforced concrete construction with terra cotta trimmings containing 77 two and three-room apartments.

BONDS

SACRAMENTO, Cal.—Election will be held May 23 in Sylvan School District to vote bonds of \$18,000 to finance erection of new school. Trustees of district are: Oswald H. Chorley and George R. Gilliam.

BAKERSFIELD, Kern Co., Cal.—Bakersfield School District has sold \$300,000 bond issue to finance school improvements. Plans for the work are now being prepared.

SAN JOSE, Santa Clara Co., Cal.—Until June 1, 11 A. M., bids will be received by Henry A. Pfister, county clerk, for purchase of \$250,000 bond issue of Westside Union High School District, proceeds of sale to finance erection of new high school, plans for which are being prepared by Architect W. H. Weeks, 369 Pine St., San Francisco.

STOCKTON, San Joaquin Co., Cal.—Election will be held May 20 in Island Grammar School District to vote bonds of \$15,000 to finance construction of new school. Trustees of district are: Delbert Brooks, (clerk), Nels J. Lund and J. L. Mullally.

ETHEKA, Humboldt Co., Cal.—Election will be held May 19 in Klamath School District to vote bonds of \$5000 to finance school improvements. Trustees of district are: Sam Tuley, Wm. Bow and Ed. Mitchell.

STOCKTON, San Joaquin Co., Cal.—Election will be held May 22 in Valley Grammar School District to vote bonds of \$30,000 to finance erection of new school. Trustees of district are: Jos. J. Raspo, (clerk), Wiley Burns and Ben Canale.

MERCED, Merced Co., Cal.—Merced Grammar School District votes direct tax for \$21,000 to finance additions to two grammar schools.

ANTIOCH, Contra Costa Co., Cal.—Election will be held shortly in Antioch-Live Oak School District to vote bonds of \$50,000 to finance erection of new school building. Structure will be so designed as to permit additions at later date.

COLTON, San Bernardino Co., Cal.—Electorate defeated proposal to issue bonds in sum of \$45,000 for remodeling city hall and erecting new fire station.

MANTECA, San Joaquin Co., Cal.—\$60,000 bond issue of Manteca Union High School District has been sold; proceeds will finance school improvements.

 SAN FRANCISCO, CALIF.

DAVIS, Yolo Co., Cal.—Steps are being taken to organize joint union high school district, which after formation, would vote bonds to finance construction of new high school in Davis.

OAKLAND, Cal.—Bids are being received by supervisors for purchase of \$50,000 bond issue of Sunol Glen School District; proceeds of sale to finance new school. W. H. Weeks, 369 Pine St., San Francisco, and Tribune Tower, Oakland, architect.

OROVILLE, Butte Co., Cal.—Bonds of \$80,000 voted to finance erection of two schools, one in Southside and another in Eastside district.

CORTE MADERA, Marin Co., Cal.—Election will be held May 27, to vote bonds of \$30,000 to finance erection of new city hall.

REDWOOD CITY, San Mateo Co., Cal.—Redwood City School bond issue for \$90,000 sold for premium of \$4,663; proceeds to finance school improvements.

COLUSA, Colusa Co., Cal.—Bids will be considered by county supervisors June 2 for purchase of \$200,000 bond issue of Colusa Union High School District; proceeds of sale to finance erection of new high school, plans for which are being prepared by Architect Geo. C. Sellon, Sacramento.

BENICIA, Solano Co., Cal.—\$70,000 bond issue of Benicia High School District have been sold; proceeds to finance school improvements.

CHURCHES

WOODLAND, Yolo Co., Cal.—Architect D. A. Walker, Woodland, will shortly take bids to erect social, Sunday school and gymnasium building for Holy Rosary Parish in Walnut street; est. cost, \$15,000. Will be 50 by 125 ft. Rev. Thomas W. Horgan is pastor of parish.

HERMOSA BEACH, Los Angeles Co., Cal.—Arthur G. Lindley, 800 American Bank Bldg., Los Angeles, is preparing plans for a one-story and basement brick and concrete church at the corner of Washington and 16th Sts. and Palm Dr., Hermosa Beach, for Christ Church of Christ, Scientist; auditorium and balcony to seat about 600, classrooms, reading rooms, foyer, etc.; 56x86 feet, pressed brick facing, art stone trim, composition roofing, gas unit heating system, cement and hardwood floors, art glass, pine trim, mechanical ventilating system, indirect lighting, ornamental plaster, organ grille, pipe organ. Cost, \$48,000.

LOS ANGELES, Cal.—Arch. Robert H. Orr, 1300 Corporation Bldg., has complete plans and will take bids this week on segregated contrs. for 2-story and basement brick church, at 501 N. New Hampshire Ave., for Melrose Avenue Methodist Episcopal Church; auditorium to seat 300 and balcony, Sunday sch. assembly hall, classrooms, kitchen, social hall, and gymnasium; 107x112 ft., ruff. br. exter., comp. shgle rfg., art stone trim, hwdwd. and cem. flrs., pine trim, gas furnace hfg. sys., storage water htr., art glass, pipe organ; \$65,000.

GRAFTON, Yolo Co., Cal.—Rev. T. W. Horgan of Catholic Church at Woodland, announces construction will be started shortly on new church building at Grafton.

FACTORIES & WAREHOUSES

Contract Awarded.
FACTORY Cost, \$15,000
SAN FRANCISCO. W. Ninth St. 192 S.
Howard St.
Two-story and mezzanine floor concrete factory.
Owner—L. A. Giacobbi & Son, 150 Post St., San Francisco.
Engineer & Contractor—J. H. Hjul, 128 Russ St., San Francisco.

PALEHMO, Butte Co., Calif.—E. Freeman has contract to erect 5-unit cotton gin for R. P. Mott, president of the Alameda Land Company. Construction will be started at once. Materials are now being purchased by contractor. Will be 40x230 ft.

Contract Awarded.
FACTORY Cost, \$12,000
SAN FRANCISCO. W. Sixth St. 25 S.
Harrison St.
One-story and mezzanine floor concrete factory.
Owner—C. A. Chaquette, 156 Montgomery St., San Francisco.
Engineer & Contractor—J. H. Hjul, 128 Russ St., San Francisco.

PORTLAND, Ore.—L. H. Hoffman, 214 U. S. Bank Bldg., Portland, at approx. \$100,000 awarded contract by Balfour Guthrie Co. to erect grain elevator at Front and Pettygrove Sts.; will be 9 story, crib construction, 50 by 100 ft. Leland S. Rosener, consulting engineer, Insurance Exchange Bldg., San Francisco.

Contract Awarded.
ADDITION Cost, \$10,000
OAKLAND, Alameda Co., Cal. 107th Ave. and Hollywood.
Brick addition.
Owner—Pacel Motor Co., 107th Ave. and Hollywood, Oakland.
Architect—W. J. Wilkinson, 220 Howard St., Piedmont.
Contractor—E. T. Leiter & Son, 3601 West St., Oakland.

Plans Being Prepared—To be Done by Day's Work.
SHOP, ETC. Cost, \$15,000
SAN FRANCISCO. Howard St., between Sixth and Seventh Sts.
One-story reinforced concrete shop and office building, 62x100 feet.
Owner—Withheld.
Architect—Meyer & Johnson, 742 Market St., San Francisco.

Bids Being Taken.
WAREHOUSE Cost, \$100,000
SACRAMENTO, Cal. Portion of block bounded by 22nd, 23rd, R and S Sts.
Two-story brick and concrete distributing and jobbing warehouse.
Owner—Geo. H. Tay Co., plumbing supplies, 165 8th St., San Francisco.
Architect—R. A. Herold, Forum Bldg., Sacramento.

Bids are being taken for a general contract and will be opened Thursday, May 7th, in the office of Mr. Herold at 2 o'clock.

Sub-Contracts Awarded.
FOUNDRY, ETC. Approx. \$194,000
EMERYVILLE, Alameda Co., Cal.
Four concrete buildings, foundry, machine shop, laboratory, etc.
Owner—Pacific Gas & Electric Co., Oakland.
Architect—Eng. Dept. of Owner.

To Mother, tho' I'm far away.
My thoughts are wandering back today.
Back to my childhood's home and you.
My first, best friend, one always true.

NEXT SUNDAY is Mother's Day.

AND IF you are so fortunate.

AS TO have a mother.

SHOWER HER with attention.

REMEMBER SHE loves attention.

SHE LOVES you.

DON'T WAIT till she has gone.

THEN PLACE beautiful flowers.

ON HER casket.

GIVE HER the flowers now.

LET HER enjoy them.

SHE CAN'T see them on the casket.

YES, SANDY knows.

IT IS a little inconvenient.

TO TAKE her next Sunday.

IN THE auto picnic party.

OR PERHAPS the ball game.

OR A game of golf.

IS MUCH more fun.

BUT DO you stop to think.

THAT SHE will not be here always.

YOU HAVE forgotten.

THAT WHEN you were a child.

SHE SACRIFICED day after day.

FOR YOU and your pleasure.

LET YOUR conscience.

BE ABLE to say.

THAT YOU did your duty.

TOWARD YOUR best friend.

HAVE YOU planned on whom.

AND HOW you.

ARE TO be cared for.

WHEN YOU grow old.

YOU KNOW if you never give.

YOU NEVER receive.

AND YOUR children will say.

PAPA AND MAMMA didn't bother.

ABOUT GRANDMA.

WHEN SHE was here.

IF YOUR mother is away from you.

PHONE, WIRE, or write to her.

SEE THAT she hears from you.

ON MOTHER'S Day, Sunday next.

YOUR ATTENTION is better.

THAN RICHES or everything.

IN THIS whole world.

THESE ARE the sentiments.

OF CLARENCE Sand Pratt, President.

OF THE Pratt Building Material Co.

DOUGLAS 300—"easy to remember."

PRODUCER of clean, sharp sand.

FOR LOCOMOTIVES and concrete.

SAND BLASTING and plastering.

ALSO PRODUCER.

OF CRUSHED rock and gravel.

"I THANK you."

out in Life's garden, where sympathy grew
God planted a soul—"twas the soul of you.
Life's wonderful garden, Love, seeking went through.
Till he found a heart—"twas the heart of you.
I have sought through Life's garden of roses and rue,
And I find one sweet blossom all jeweled with dew—
Love, Sympathy, Faith—all unchanging and true—
Are the heart of my flower—dear Mother, 'tis you.

COMPTON, L. A. Co., Cal.—Arch. Wm. Bruce, 525 Chapman Bldg., Los Angeles, is preparing wk. plans for a 3-story frame and stucco, 120x227 ft. hotel and apt. bldg. on Long Beach Blvd. and Temple St., Compton, for A. T. POWER PLANTS

OAKLAND, Cal.—See "Hospitals" this issue. Bids wanted.

LOS ANGELES, Cal.—Southern California Edison Company has been authorized by the Railroad Commission to issue and sell on or before December 31, 1925, 15,000 shares of its seven per cent preferred stock of the aggregate par value of \$1,500,000, and 100,000 shares of its six per cent Series "B" preferred stock of the aggregate par value of \$10,000,000, and to use the proceeds for additions and betterments. Applicant states that its total estimated expenditures during 1925 will be \$25,000,000, of which \$11,500,000 will be spent for new production, and the balance on transmission and general system betterments.

FRESNO, Fresno Co., Cal.—San Joaquin Light & Power Co., Fresno, seeks authority of State Railroad Commission to sell \$1,000,000 of its 7% prior preferred stock, to finance erection of new sub-stations at Kingsburg and Le Grand, costing \$250,000 and \$300,000 respectively. Installation of additional equipment will use up balance of funds.

LAKE COUNTY, Cal.—Plans for a \$1,000,000 extension of the irrigation and power facilities of the Yolo Water and Power Company in Lake County are announced by W. W. Skidmore

Barrett of London, England, representative of British holders of some \$1,500,000 in bonds of the company. The plan contemplates tapping the waters of Clear Lake and construction of canals for irrigation in Indian Valley

The Quito-Esmeraldas railway, for which contract was signed early in February, will be 42-km gauge and divided into two sections of 173 and 190 kilometers, respectively, according to report to the Department of Commerce by the German Mission, Guayaquil. The cost of completing and equipping the Quito-Viaca section is placed at 6,000,000 sucres. Specifications call for the purchase of 9,200 tons of 45-penny steel rails, A. S. C. E. type, with the corresponding splice bars and spikes approximately 300 cross ties, structural and rolling stock, and other equipment. It is known that German manufacturers through their local representatives have already submitted bids for the rails. A copy of the contract, in the original text, with an English translation, is available at the Commerce Department, to accredited agents of the country who are interested. Any delay in getting in touch with the contractors

A Variety of Work on the Same Machine

In addition to business correspondence the modern
Office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
o- cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.
Smith & Bros. machine.
